

VISION Wall Conduits PP/PE

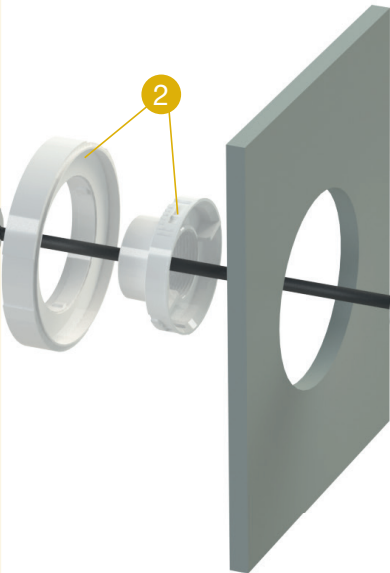

A weldable wall conduit for **PP** (polypropylene) or **PE** (polyethylene) monoblock pools.

Compatible with all **DURAVISION LED lights** size 50 and 100mm.

Strong, solid and **watertight welded joint** on the pool.

Watertight installation, no water in flexible hose.

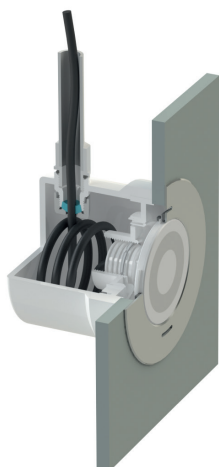

Up to **1,5m of cable storage**, allowing the light to be lifted above the water surface.

High-end finish of the **DURAVISION** light into the pool.

Technical Specifications

		1		2	
		WELDABLE WALL CONDUIT		MOUNTING & SNAP RING	
PRODUCT CODE		PZA-WM-PP	PZA-WM-PE	PZA-WM-FLAT	PZA-WM-FLUSH
Material		PP	HDPE	Polymer	Polymer
Diameter welding end	mm	160	160	-	-
Height	mm	115	115	-	-
Diameter drill hole for light 50	mm	-	-	95	-
Diameter drill hole for light 100	mm	-	-	133	108

Finish 1: in combination with Face Plate Ultra Flat

In combination **with Face Plate Ultra Flat** suitable for DURAVISION 50 and 100mm lights.

Choose either the PP or PE version depending on the pool material. The nut and rubber for watertight sealing towards the flexible PVC hose are included in each wall conduit.

The mounting ring, one side for light 100mm and the other for light 50mm, has a raised edge for easy positioning in the drilled hole.

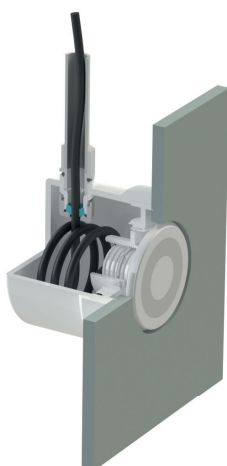

The snap ring clicks into the mounting ring and has a 1,5" internal thread for the DURAVISION light installation.

Finish with a VISION Face Plate Ultra Flat.

OR PZA-WM-PP PZA-WM-PE	PZA-WM-FLAT	PZA-FLEX-800	See p. 29

Finish 2: without Face Plate, light in wall

Without face plate, light in wall suitable for DURAVISION 100mm lights.

Choose either the PP or PE version depending on the pool material. The nut and rubber for watertight sealing towards the flexible PVC hose are included in each wall conduit.

The mounting ring, for the 100mm light only, has a raised edge for easy positioning in the drilled hole.

The snap ring clicks into the mounting ring and has a 1,5" internal thread for the DURAVISION light installation.
