

# DURA Cloud App

MANAGE YOUR POOL AUTOMATION WITH LINK MASTER  
MANAGE YOUR INDIVIDUAL DURA-HI HEAT PUMP

DURA Cloud

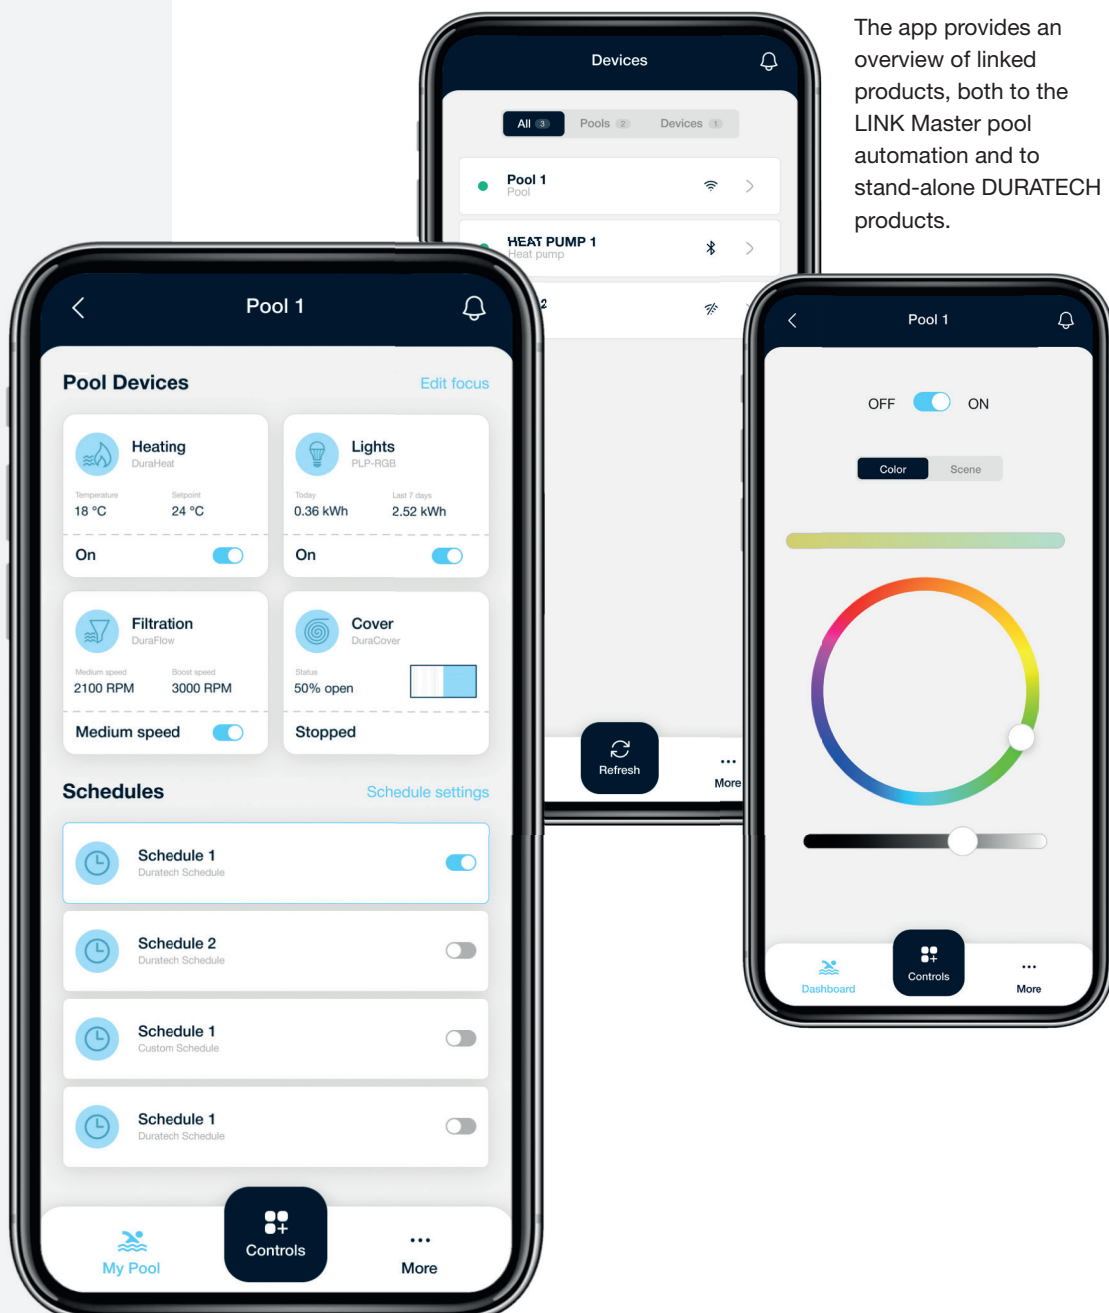

## EASY MANAGEMENT

Both the installer and the end user can manage, configure and operate the pool using the same application, each with their own profile and corresponding functionality.

The dashboard provides a nice overview of the current status, with shortcuts to the most important devices and schedules.

The dashboard can be easily customised to suit the user's needs, enhancing the user experience.

The app provides an overview of linked products, both to the LINK Master pool automation and to stand-alone DURATECH products.

## PLANNER

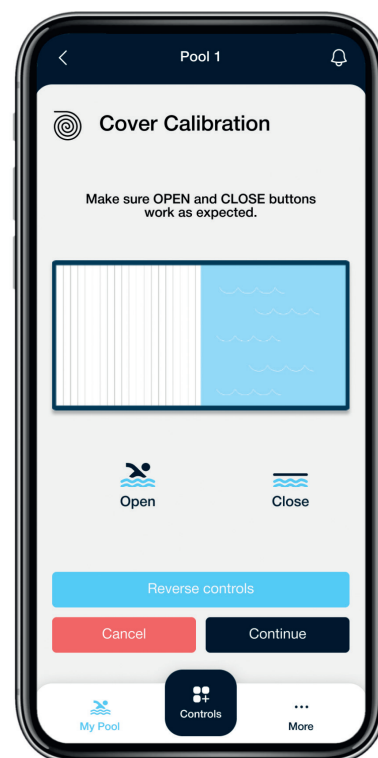

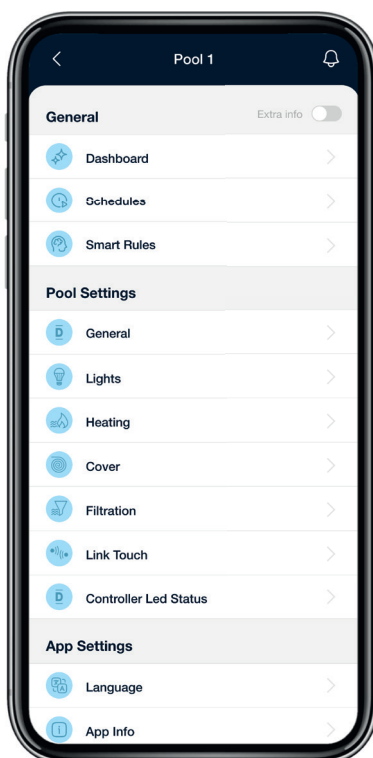

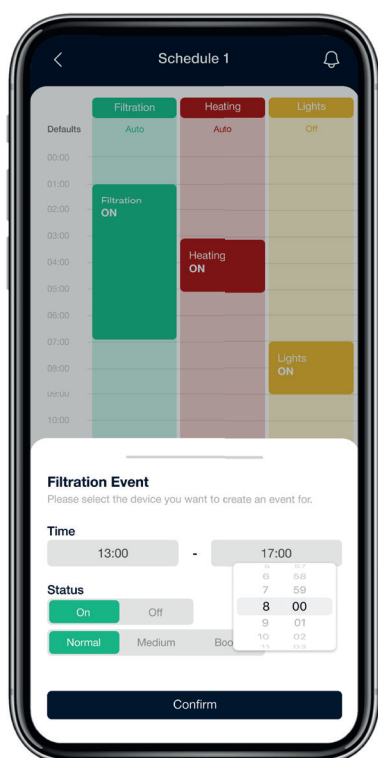

Easy management and scheduling of connected devices. Default schedules are already available, but there is also the option to create your own and make the installation work according to your preferences.

## CONFIGURATION AND SMART RULES

Configuring even the most complex requirements has never been easier. From a single overview, you have instant access to device settings, schedules and all the smart rules you need to keep your pool system running optimally and safely.

## CALIBRATION DURACOVER

Using the app, you can set the direction of motor rotation and determine the open/close position of the pool cover. Pool cover calibration has never been easier.

Download our app now on the App Store or Google Play and discover all the benefits!
