

Uncompromising Quality. Extended Operational Life.

Precision machined and manufactured entirely in-house. Guaranteeing flawless fitment, extreme durability, and maximum performance for your industrial high-pressure pumps.

The SEW Advantage

Free With New Orders

We supply one complete set of spares complimentary with every new pump or homogenizer dispatched. Experience premium quality from day one, backed by 1 year of free service.

Zero Import Delays

Our expansive inventory ensures that components are dispatched immediately from our Indian factory. Skip the wait and the hassle of importing parts from overseas.

100% In-House Engineering

Proudly Indian-made and exceedingly durable. Every spare is precision machined in-house to exact tolerances for SEW machines and various manufactured Triplex pumps.

Comprehensive Kits

Beyond major components, we provide all critical consumables, including heavy-duty seals, precision oil seals, and high-pressure glands.

High-Durability Plungers

Engineered to withstand extreme pressures and relentless operational lifespans. Tailor your plunger's resilience to your specific industrial application by selecting from our three specialized, high-performance coatings:

Ceramic

Tungsten Carbide

Chrome

Core Spare Components

Homogenizer Spares

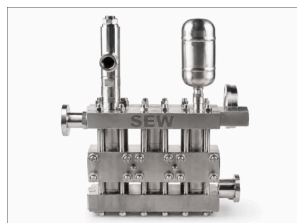

Connecting Rod

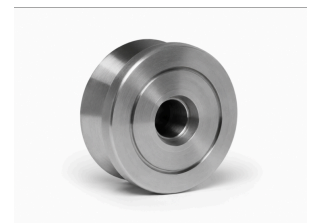

Crankshaft

Crosshead

Liquid End Block

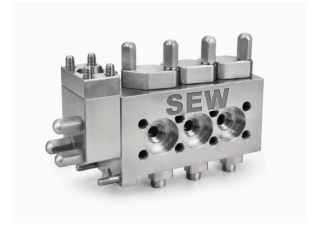

Precision Valves

Stuffing Box Assembly

Gland Housing

Homogenizing Block

TRUSTED BY INDUSTRY LEADERS

Major corporations exclusively buy spares for their pumps from us because of our uncompromising quality.
