Predictive risk intelligence for transportation & logistics

KEPLER51

Avert road risk with granular predictions and real-time intelligence that keeps your fleet moving safely and profitably.

Know before you go

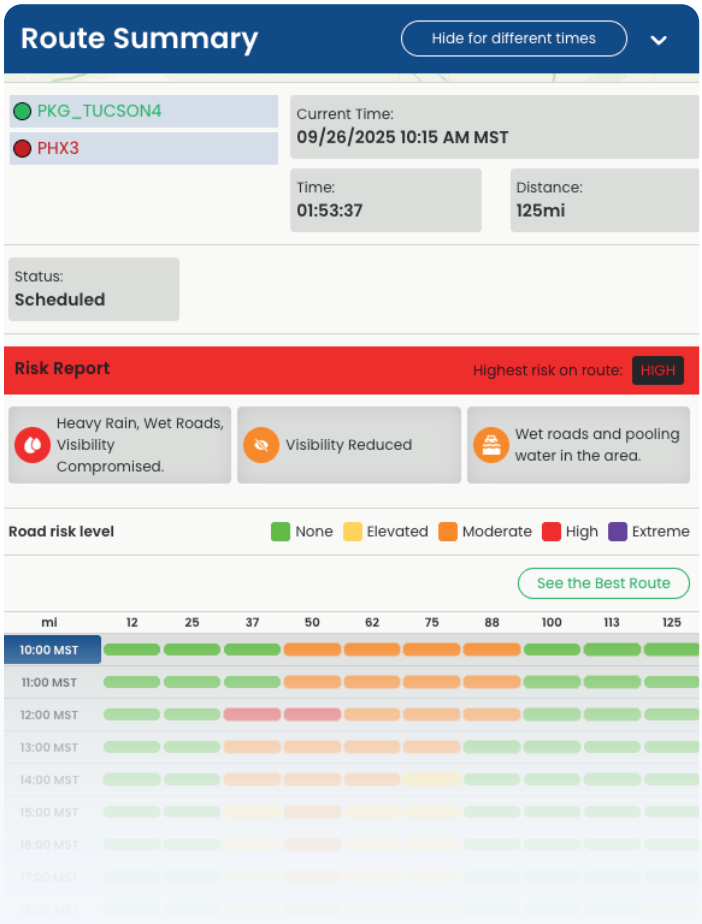
Protect your drivers and vehicles with sophisticated predictive planning and risk mitigation tools. Get granular predictions for driver and vehicle safety to prevent accidents, reduce insurance costs, and ensure regulatory compliance across your fleet.

Proactive delivery insights

Our intelligence helps you optimize delivery windows, adjust delivery rates proactively based on conditions, and maintain profit margins even during challenging weather events.

Seamless integration with your systems

Our APIs and data integrate into your existing telematics, routing, and internal systems. Whether you need mobile app functionality or direct data feeds, we augment what you already have.



TRUSTED BY LEADERS ACROSS INDUSTRIES

TOSHIBA · Source · Schneider Electric · C.H. ROBINSON · Turner · Nestlé · WESTROCK COFFEE · KNAUF

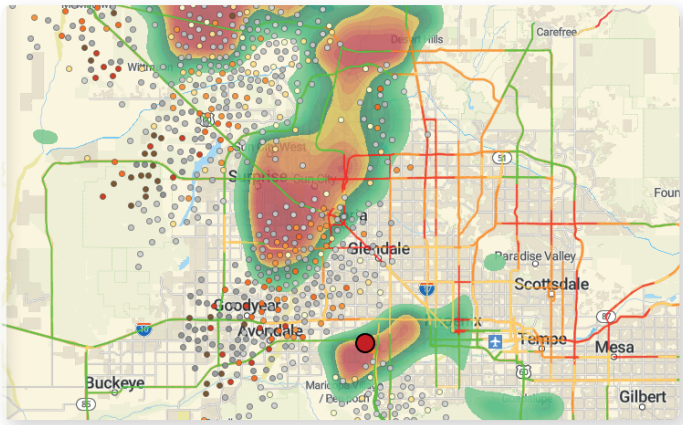
Road model intelligence

- Analyzes what trucks will encounter along routes based on average speeds and timing
- Highlights high-risk segments before departure
- Gives you data-driven recommendations for schedule optimization to avoid hazards



Zip code precision coverage

- **Granular geographic intelligence**: neighborhood-level risk assessment for every zip code globally
- Automation of delivery windows with multi-daily reports feeding directly into planning systems
- **Heat stress & driver schedule management**: automated adjustments for driver safety protocols

Real-time fleet monitoring

Mobile & web applications

Enterprise data solutions

- Third-party logistics providers (3PL) & transportation companies
- Companies with logistics arms
- Warehousing & distribution centers
- Fleet operations & delivery networks
