CAREER & TECHNICAL EDUCATION

Spotlight

COLLABORATIVE PARTNERS

Butterfield Odin collaborated with Minnesota West in Jackson to provide skilled instructors for a Introduction to Welding Course. Since the school district did not have space to house equipment, the technical college partnership allowed students to access top level equipment to increase student's likelihood of success in welding.

STUDENT IMPACT

19 juniors and seniors at Butterfield-Odin had the opportunity to take a Construction and Welding Course in 2025. These students met both at their high school for construction curriculum, and at the Minnesota West Community and Technical College for welding experience.

"As a very small school, we are constantly doing our best to offer programs to students that increase their success in the workforce. This class is important to our students and we make it a priority. Even though it is only offered to juniors and seniors, the students enrolled make up just about 20% of our total high school population".

-Superintendent, Jamie Banks

**Future Ready CTE
Impact Grants are made
possible through
Legislated appropriated
funding to Service
Cooperatives in
Minnesota.**

The purpose of these grants is to help rural school districts connect with their local employers to provide quality, authentic career-connected learning, to make ***lasting*** impact throughout the region.
