

Patient Elevation Pillow

The Patient Elevation Pillow facilitates airway management for obese and large framed patients.

It quickly achieves H.E.L.P. (head elevated laryngoscopy position) to lower risk and improve patient safety.

- Aligns upper airway axes to facilitate successful 1st pass intubation.
- Improves ease of breathing with better pre-oxygenation tension for obese patients.
- Complements all methods of airway management (DL & VL, Glidescope, AirTraq etc.).
- Improves O.R. time efficiency
- Can be ordered separately.
- Maximum weight 250kg.
