

Our Story

Frustrated by the unreliable and restrictive practices of traditional data vendors, we created Tracenable to make granular, high-quality corporate data accessible to everyone.

2024

MSc in Finance & Data Science

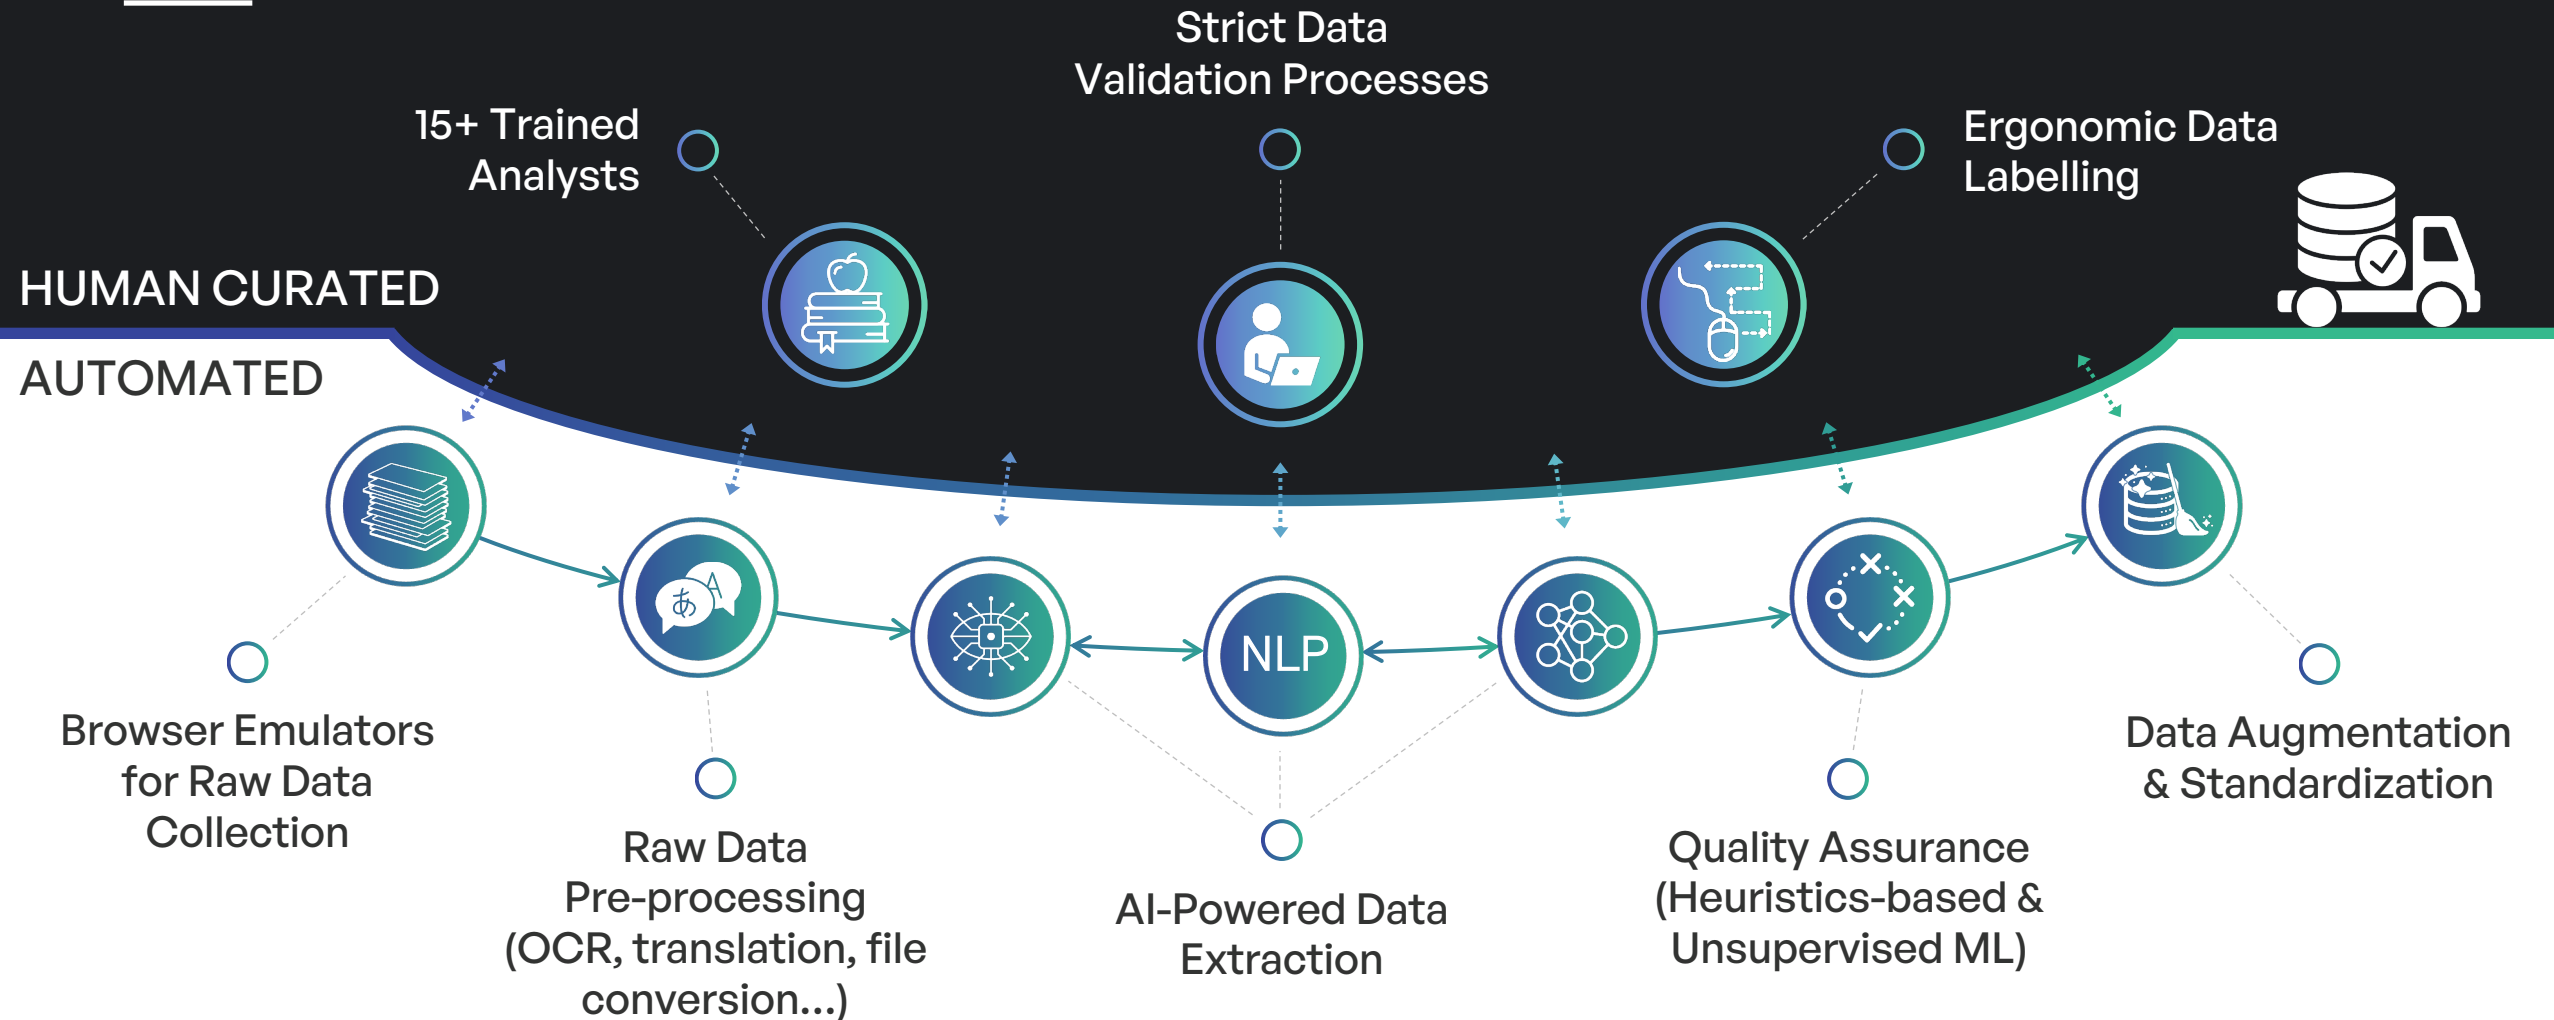

Tracenable is an open data platform that enables self-service access to traceable corporate financial and ESG data.

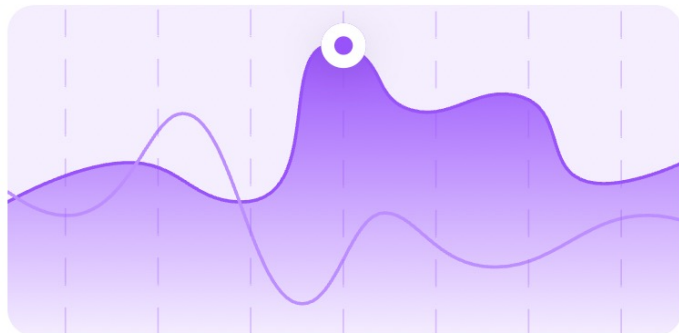

Blending automation and human curation for scalable data collection

HITL Data Sourcing

Our scalable data sourcing architecture powers an open data platform featuring

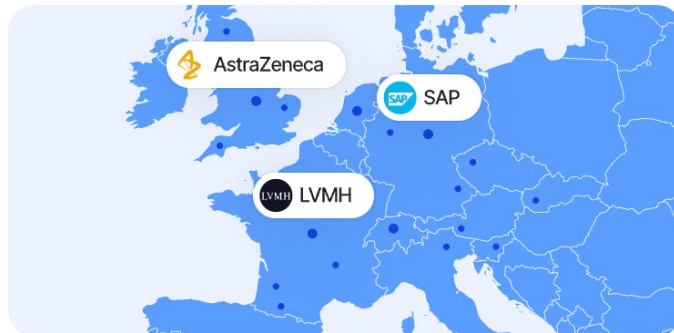

Self-Service Data Exporters & APIs

EXTENSIVE

5+ Years of Historical Data

Explore the past to inform the future. Our databases offer an average of five years of historical data, providing a robust foundation for trend analysis and forecasting.

GLOBAL

10,000+ Publicly Listed Companies

Capturing over 95% of the global market capitalisation, our data spans equity and fixed income across both public and private issuers, ensuring you have the coverage you need.

Greenhouse Gas (GHG) Emissions

Total Scope 1, 2 and 3 GHG Emissions

Scope 1, 2 and 3 GHG Emissions split by Sources

GHG Emissions Intensities

GRANULAR

150+ Metrics Across Key Financial & ESG Themes

Our data equips you for diverse needs — from research and impact investing to risk management, ESG reporting, and regulatory compliance.

Our data sourcing architecture also enables customizable scope, speed, and coverage.

Tailored Data Sourcing Services

Volume

Custom Coverage

We can actively source data on tens of thousands of entities.

Capacity: 300–600 fields per hour, with throughput growing linearly as capacity scales.

Variety

Custom Fields

From financial and ESG data to real estate, compliance, and patent data, our architecture adapts to any domain, providing custom fields on demand.

Veracity

Audit-Proof Traceability

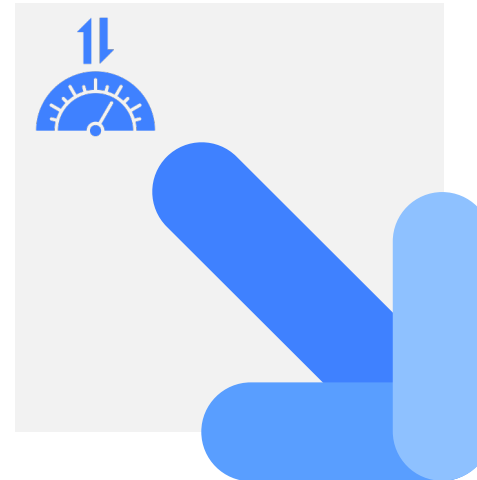

Every data point is fully traceable to its original public source, ensuring audit-proof transparency and complete data lineage visibility across the workflow.

Velocity

Custom Update Lag

We tailor update frequencies to each client's needs. For example, one enterprise client receives data within 24 hours from data disclosure availability to delivery.

Since the 1980s, legacy data vendors use the same

Outdated Licensing Playbook

Restrictive Usage

Licenses define narrow use cases, strictly limiting what you can do with the data.

Lock-in Practices

Long-term contracts, audits threats, and upfront costs limit flexibility.

Expiring Access

Forced to delete all data copies and purge systems when contracts end.

Tracenable aims to reshape the data landscape using a

Modern Licensing Playbook

Permissive Usage

Our licenses give you full freedom to use the data without restriction.

Flexible Practices

No commitment, no lock-in: just on-demand access to the data you need.

Perpetual Access

Once delivered, the data is yours to keep and use without time limits.

Our Vision

**Become the
world's **most**
trusted source
for corporate
data**
