Who we serve

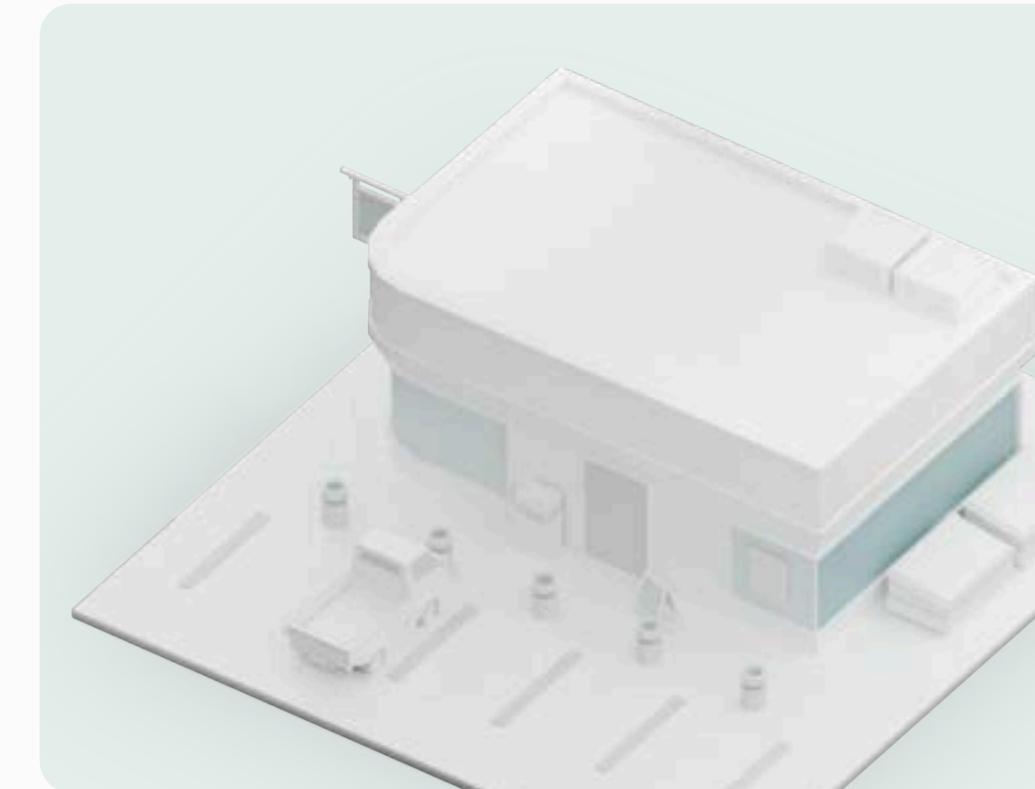

The platform is designed to fit the needs of different industries, from fast-growing SMEs to multinational enterprises, market places and financial institutions managing diverse portfolios.

Large enterprises

Custom integrations across multiple locations and teams.

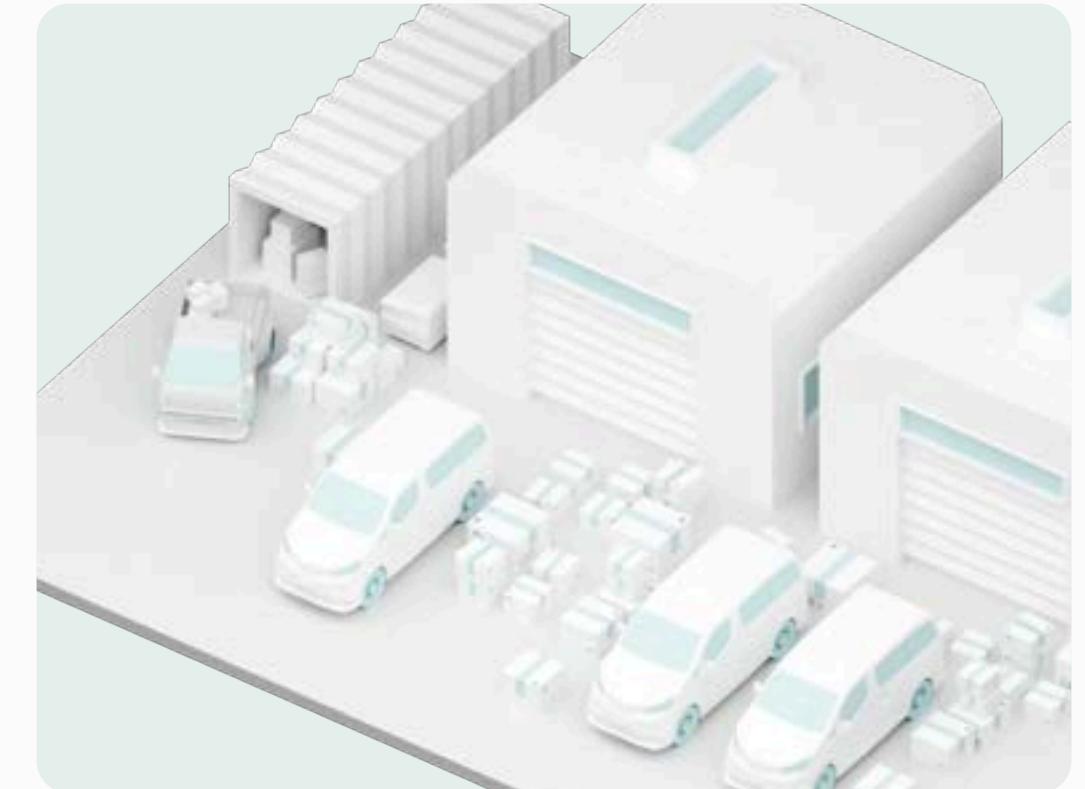

Small & Medium Enterprises

Plug-and-play solution without complexity

Financial institutions

Regulatory integrations, KPIs, and portfolio data collection

Marketplaces

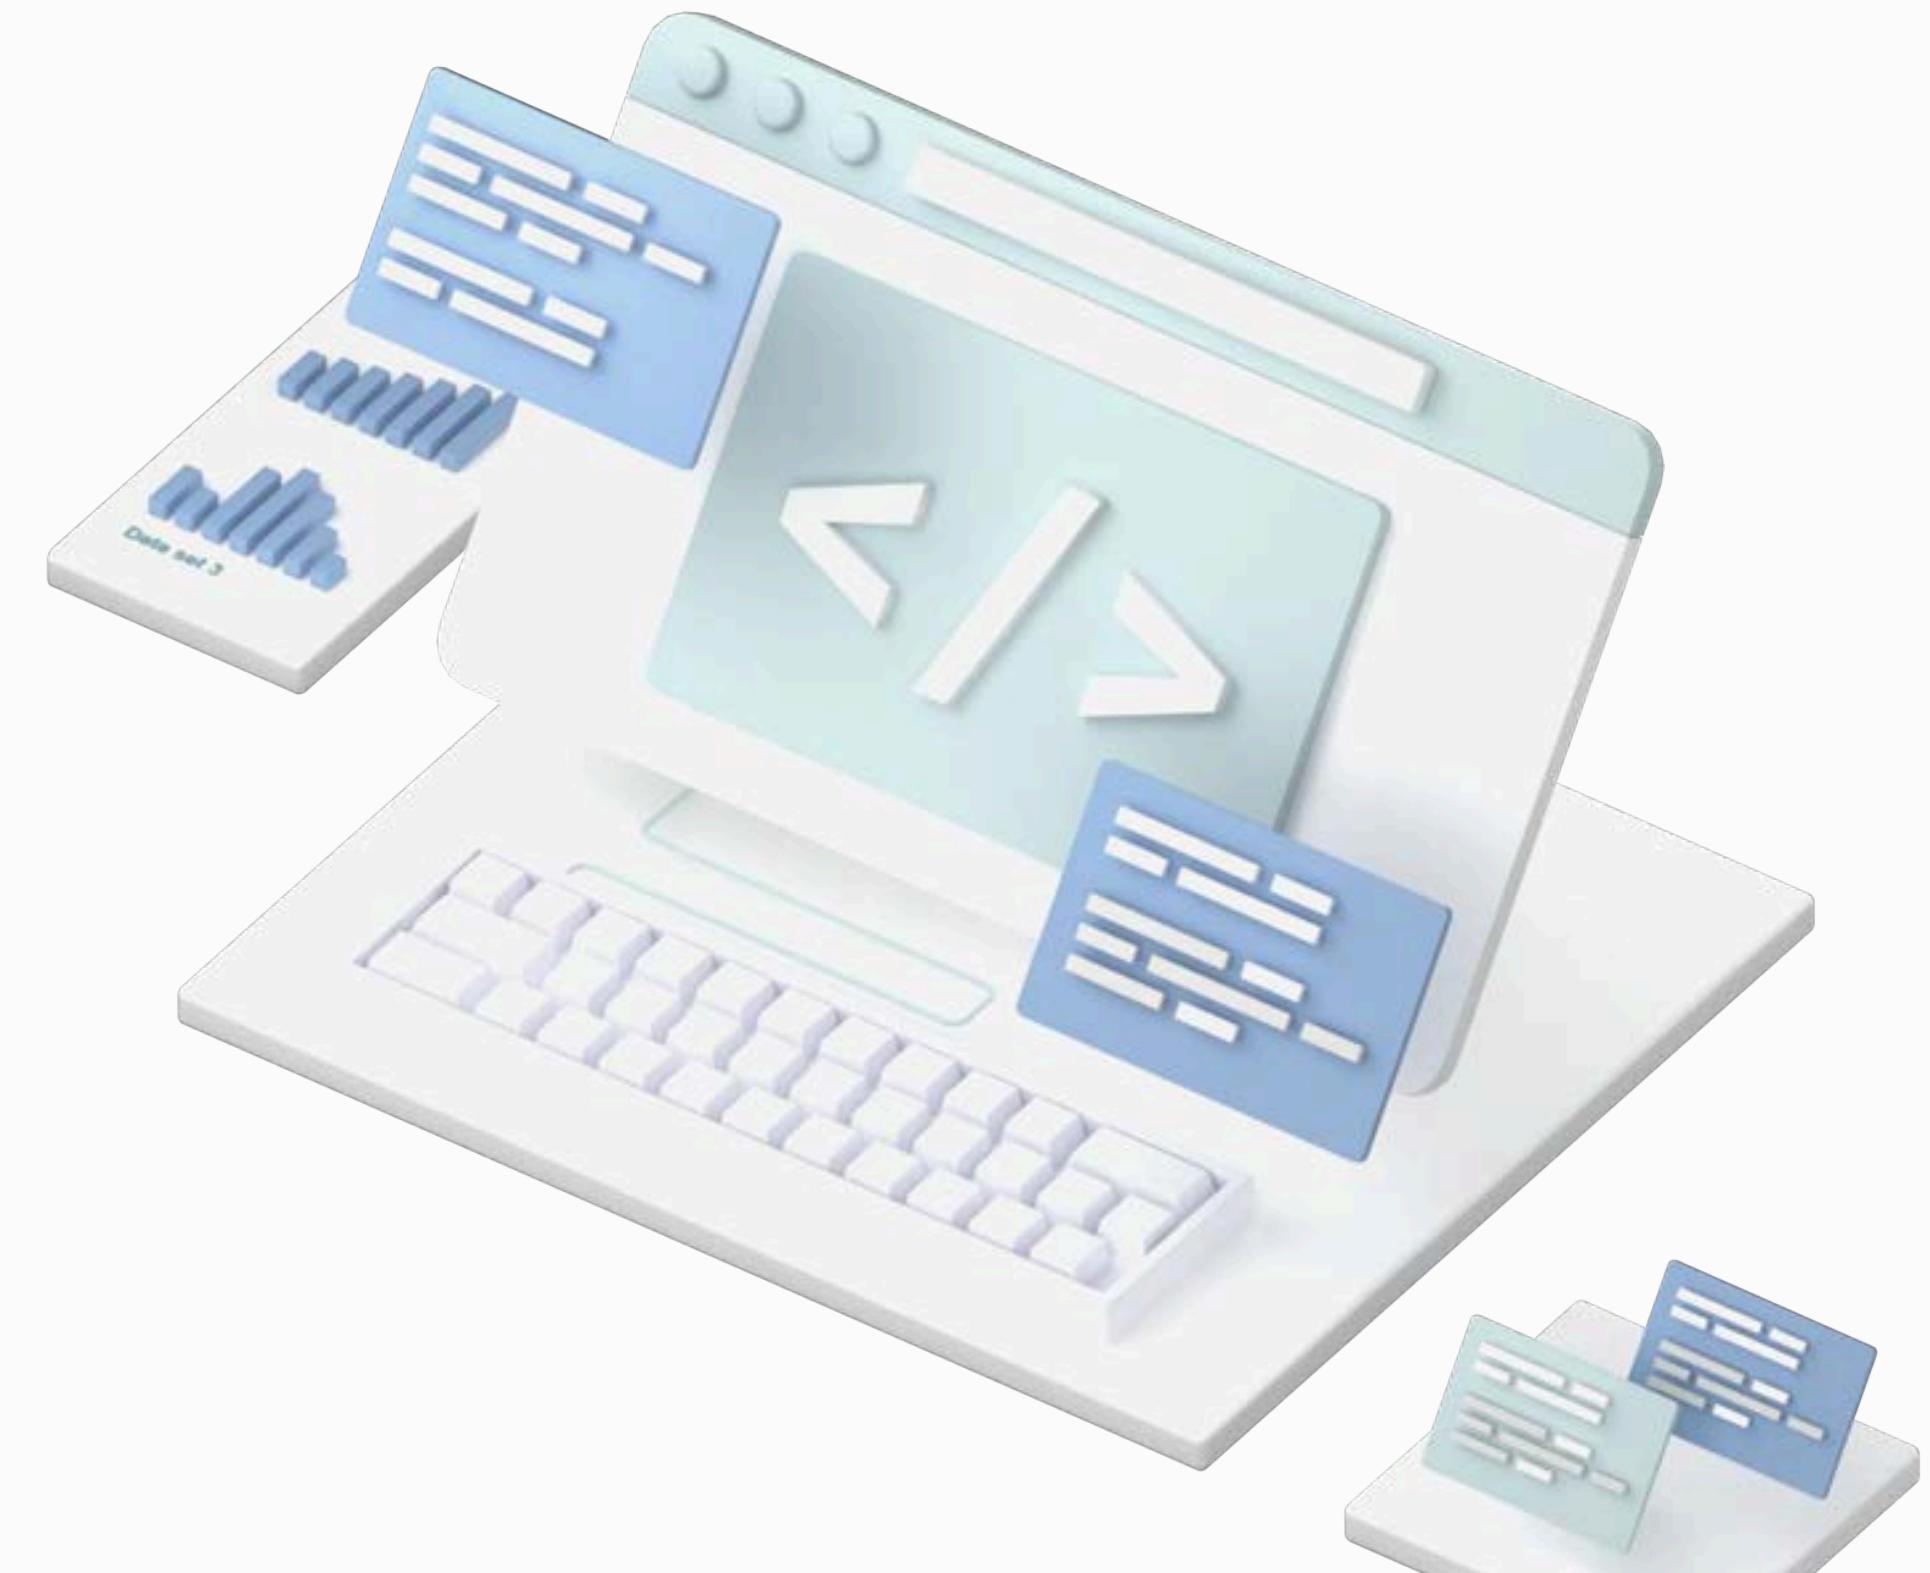

API-driven white-labeled integrations

Our solutions

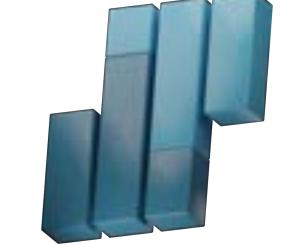

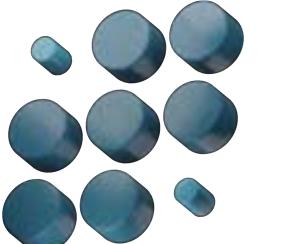

Our platform focuses on Impact, Climate, and Regulatory Technology (RegTech) solutions.

- **Impact:** Measure and report impact through GRI, DMA
- **Climate:** Climate reporting in line with TCFD, GRI, ISSB
- **RegTech:** Regulatory compliance, risks, due diligence

Our products

 GRI Global Reporting Initiative 	 SASB Sustainability Accounting Standards Board 	 ISSB International Sustainability Standards Board 	 TCFD Task Force on Climate-Related Financial Disclosures 
 ESRS Sustainable Financial Disclosure Regulations	 Double Materiality Identify impact and financial materiality	 SFDR Sustainable Financial Disclosure Regulations	 EU Taxonomy incl. Taxonomy Compass and Reporting
 SDG Mapper Sustainable Development Goals Mapper	 Framework builder Your own framework and questionnaire	 Engage stakeholder Define, manage and contact stakeholders	 Footprint Calculator Measure your carbon emissions

Key features

The interface displays a Gantt chart with tasks like 'Review regulatory updates' and 'Executive Compensation Alignment' over a four-week period. A calendar for September 2025 is overlaid, showing specific dates for each task. Filter options for 'Time frame (all)', 'Days', and 'Priority' are available.

The interface shows a 'Send reminder' dialog and a 'Request for approval' dialog. The reminder dialog asks for a message and a recipient. The approval request dialog shows a message from 'Jane Doe' asking for review and approval of a sustainability report, with 'Reject' and 'Approve' buttons.

The interface shows a list of tasks under 'ESRS > GI Business conduct > Impact, risk and opportunity management' and 'IRO-1: Description of the processes to identify and assess material impacts, risks and opportunities'. It includes sections for 'Assigned by', 'Request sent from', and 'Assigned to', with a list of users including Luca Moretti, Sophie Dubois, Klara Novakova, Casper Van den Berg, Nolde Schneider, Mateusz Nowak, and Jonas Bengtsson.

Action plan

Set goals, assign tasks, and track progress to keep ESG management clear, organised, and easy to follow.

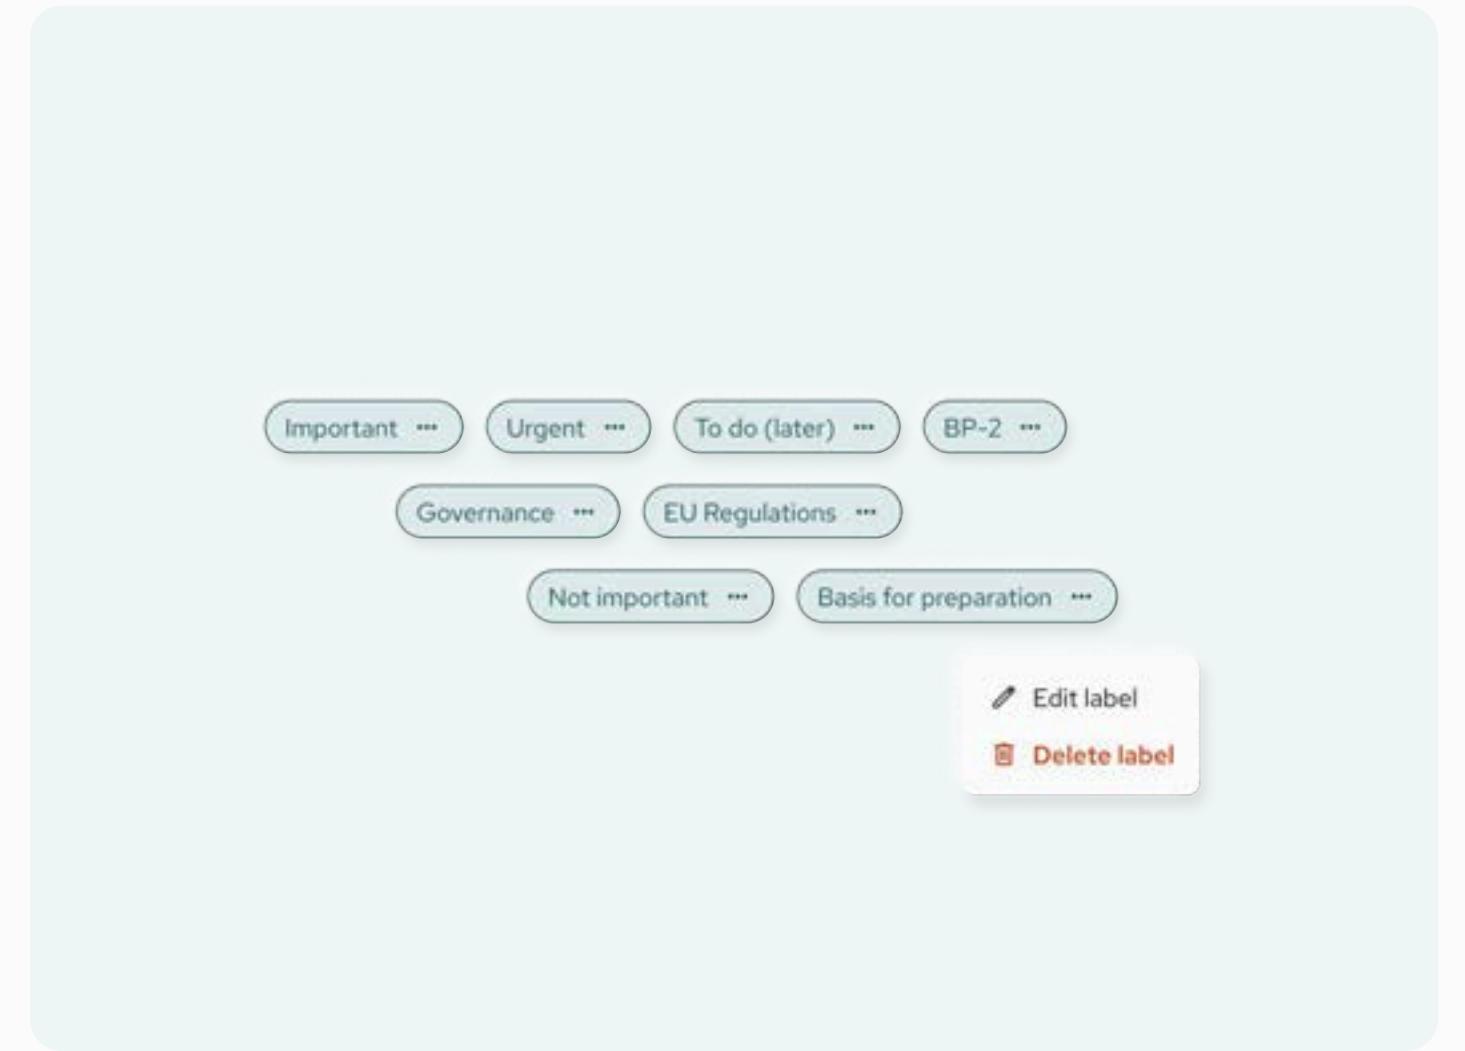

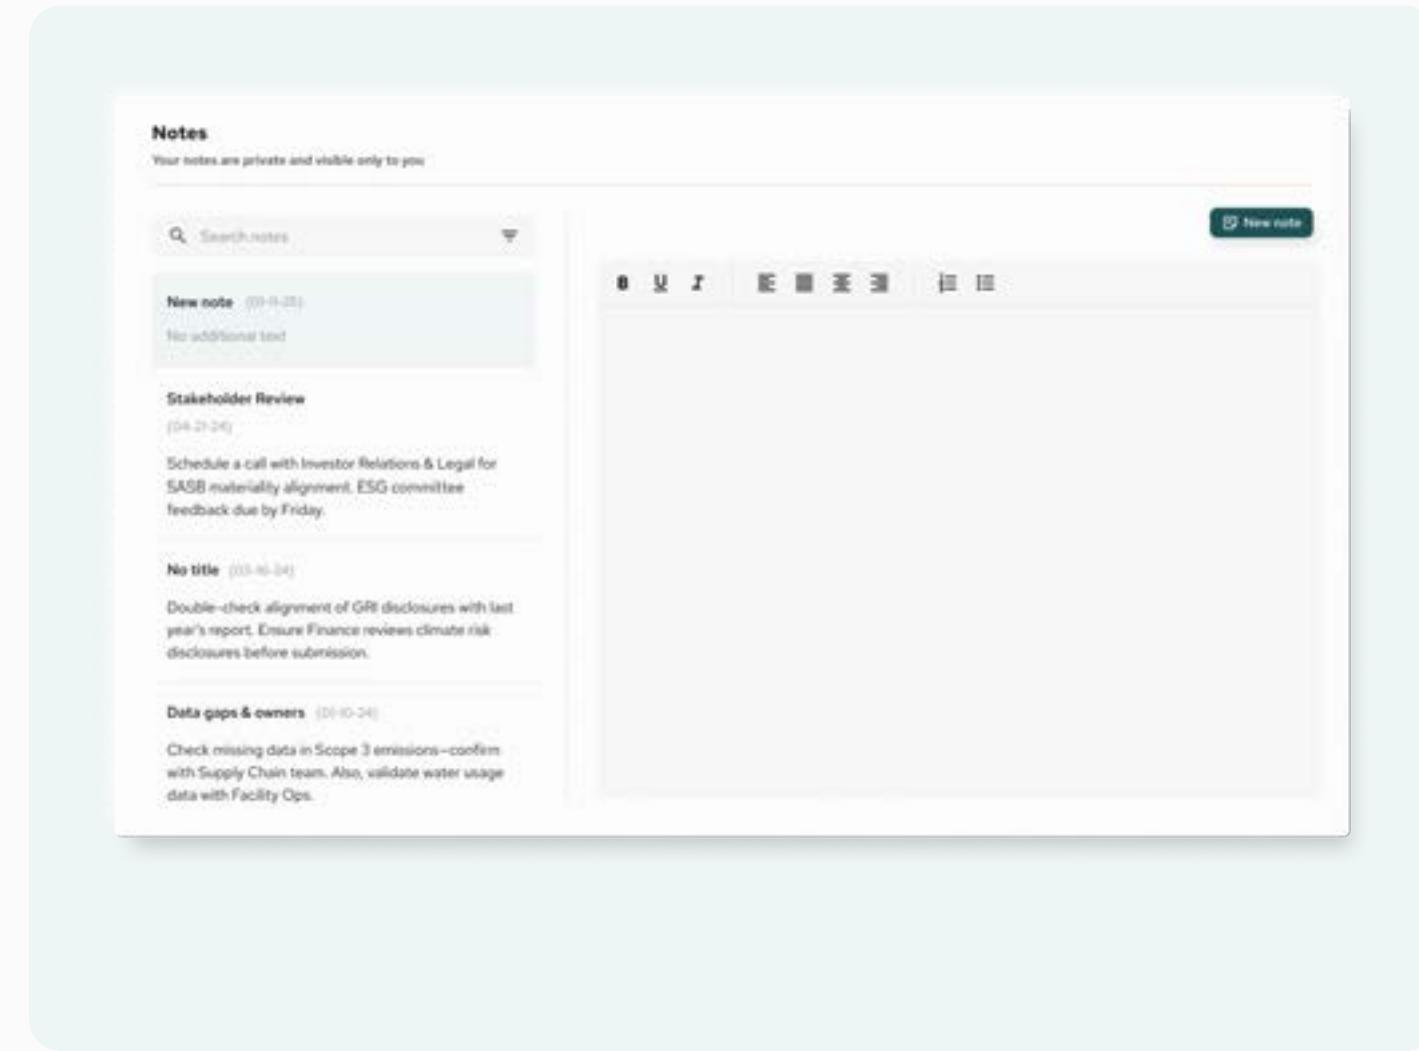

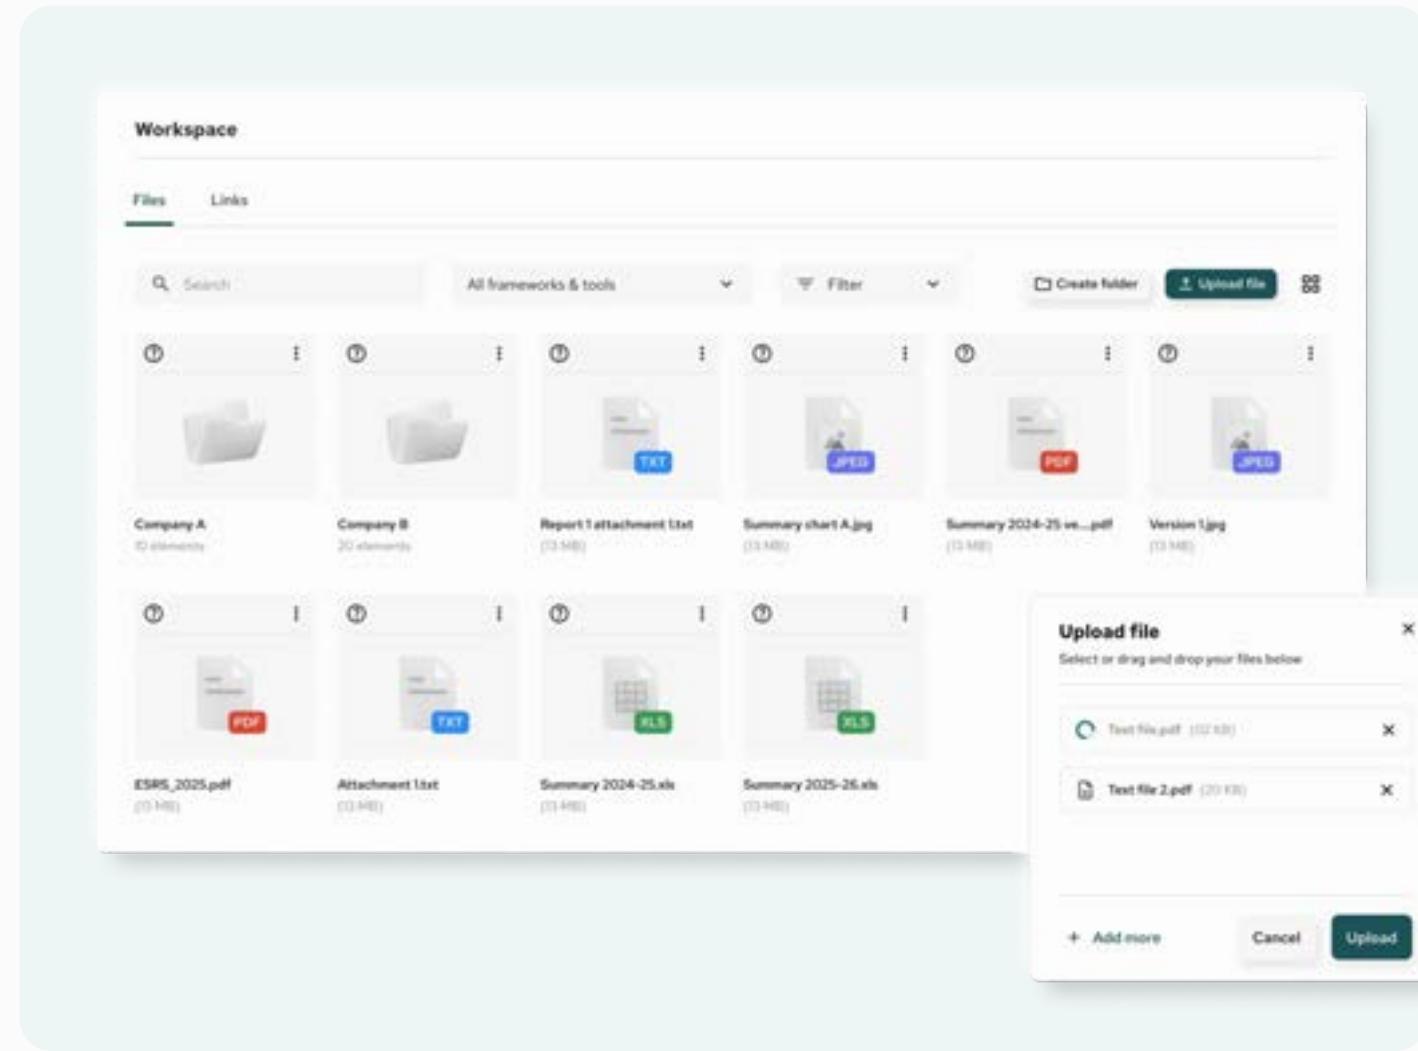

System emails

Send reminders, request approvals, and share updates to keep teams informed and ESG processes on track.

Assign/Send request

Assign tasks, send requests, approve or reject, and collect all necessary information internally and externally.

Key features

Workspace

Store, organise, and manage all documents in a centralised workspace.

Notes

Capture important insights, document key discussions in one structured place.

Labels

Categorise and filter information, make data management more organised.

SFDR > Article II, Pre-contractual
Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

2.2

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

Historical data

2.2

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

2026 Use this answer

Objective: Reduce carbon emissions and promote biodiversity conservation. The financial product targets investments in renewable energy projects, such as offshore wind farms and solar energy grids, aiming to reduce dependency on fossil fuels.

2025 Use this answer

These investments help close wealth gaps, provide economic opportunities to disadvantaged populations, and improve social well-being, aligning with UN Sustainable Development Goals (SDGs) such as No Poverty (SDG 1) and Reduced Inequalities (SDG 10).

You have available input from the 2024 year report

You can reuse it in the current report by copying and editing it with the 'historical data' feature next to each disclosure.

Questionnaire management

Easily track questionnaire progress, send reminders, and manage submissions to support accurate data collection.

Historical data

Access past ESG disclosures to compare trends, review consistency, and improve reporting over time.

Traceability

Keep a clear record of all actions and changes for full transparency and compliance.

Key features

This screenshot shows a list of comments in a digital workspace. The comments are organized into sections based on source and type. For example, there are sections for GRI 205-3 Disclosure, SASB EM-EP-II Action plan, and SFDR PAII-4 Task. Each comment includes the author's name, the date and time of the comment, and a brief description. The interface allows users to reply to comments and see a history of interactions.

Source	Source type	Comments	Latest from	Added	Comment	Company	Open

@Liam Donovan Please review the attachment for approval.

Joe Bloggers (5 min ago)
All looks fine to me.

Liam Donovan (yesterday 02:30)
Let me double check it with Joe Bloggers.

This screenshot shows a review interface for a report. At the top, there are two buttons: 'Approve' and 'Require correction'. The main area displays a table of responses from various users, each with a unique ID, name, email, and a status indicator (e.g., 'Requires correction', 'Ready for review', 'Approved'). The table is organized by question ID and includes a 'Review' column. A message at the top of the table reads: 'Disclosure of relationship between material risks and opportunities arising from impacts and dependencies on own workforce / value chain workers / affected communities / consumers and end-users and strategy and business model'.

ID	User	Date	Response	Review
SJ	Sofia Jost	01.07.2025	2	3
NP	Nadia Frei	05.09.2025	4	2
GB	Ginevra Battisti	18.10.2025	0	5
ER	Emmanuelle Riva	30.11.2025	2	4
CV	Clara Vogt	14.12.2025	1	3
FM	Florian Meier	28.04.2026	1	3
TB	Thierry Baumann	10.05.2026	2	2
LB	Lucia Fabbri	22.05.2026	2	3

This screenshot shows a modal window for connecting to other frameworks. It starts with a message: 'Input copied from GRI'. Below this, a note explains: 'Our sustainability and financial reporting periods do not align due to operational and data collection constraints. Sustainability data requires extended verification processes and engagement with multiple stakeholders, leading to a reporting timeline that differs from financial disclosures. This approach ensures the accuracy and reliability of our sustainability reporting.' The main section is titled '15/30 Compatible questions available' and lists three options: 'Fill in according to GRI (Global Reporting Initiative)', 'Fill in according to SASB (Sustainability Accounting Standards Board)', and 'Let me decide for each question'. Each option has a brief description and a 'Learn more' link. At the bottom, there are 'Cancel' and 'Upload input' buttons.

Comments

Quickly add feedback, ask questions, and collaborate in real time to improve data quality and transparency.

Verification process

Review, validate, and finalise reports for accuracy, compliance, and reliability before submission.

Interoperability

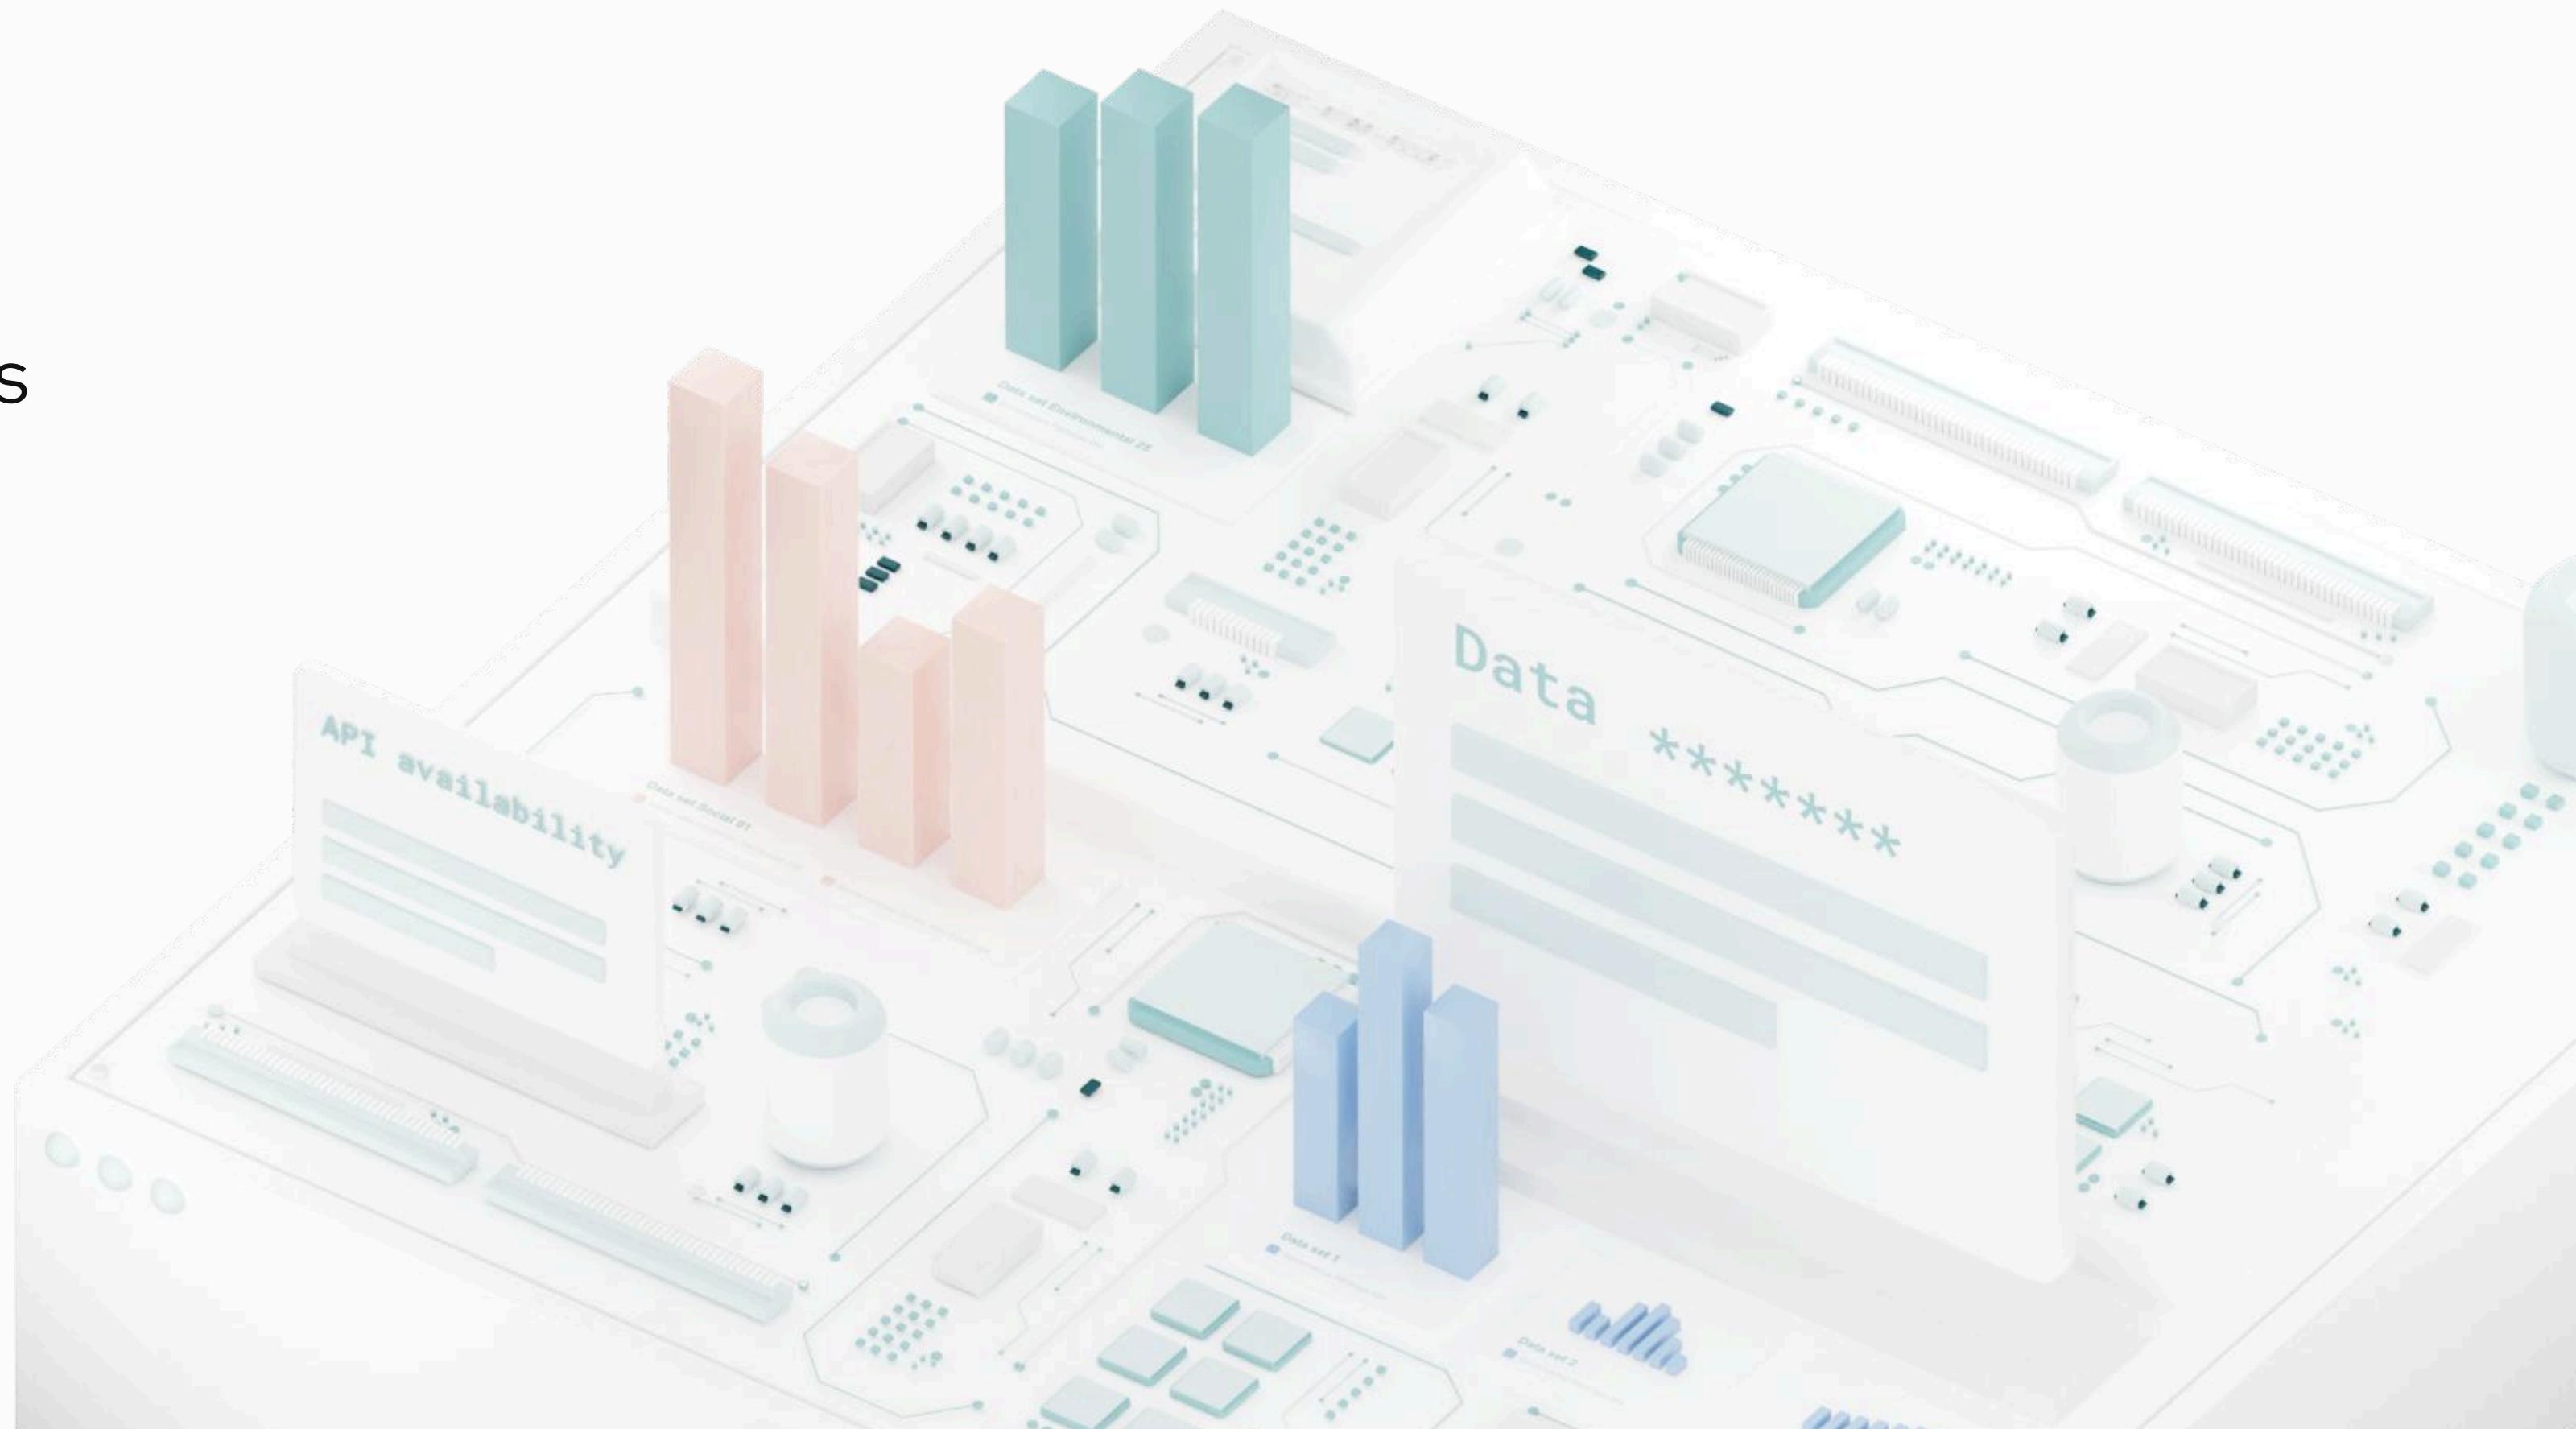

Connect and integrate data between frameworks for compliance and consistency reporting.

Data Management API

The Data Management API makes it easy to connect sustainability and ESG data with existing systems.

- Real time data integration
- Automated workflows
- Flexible and scalable
- Interoperability across frameworks
- Secure and compliant

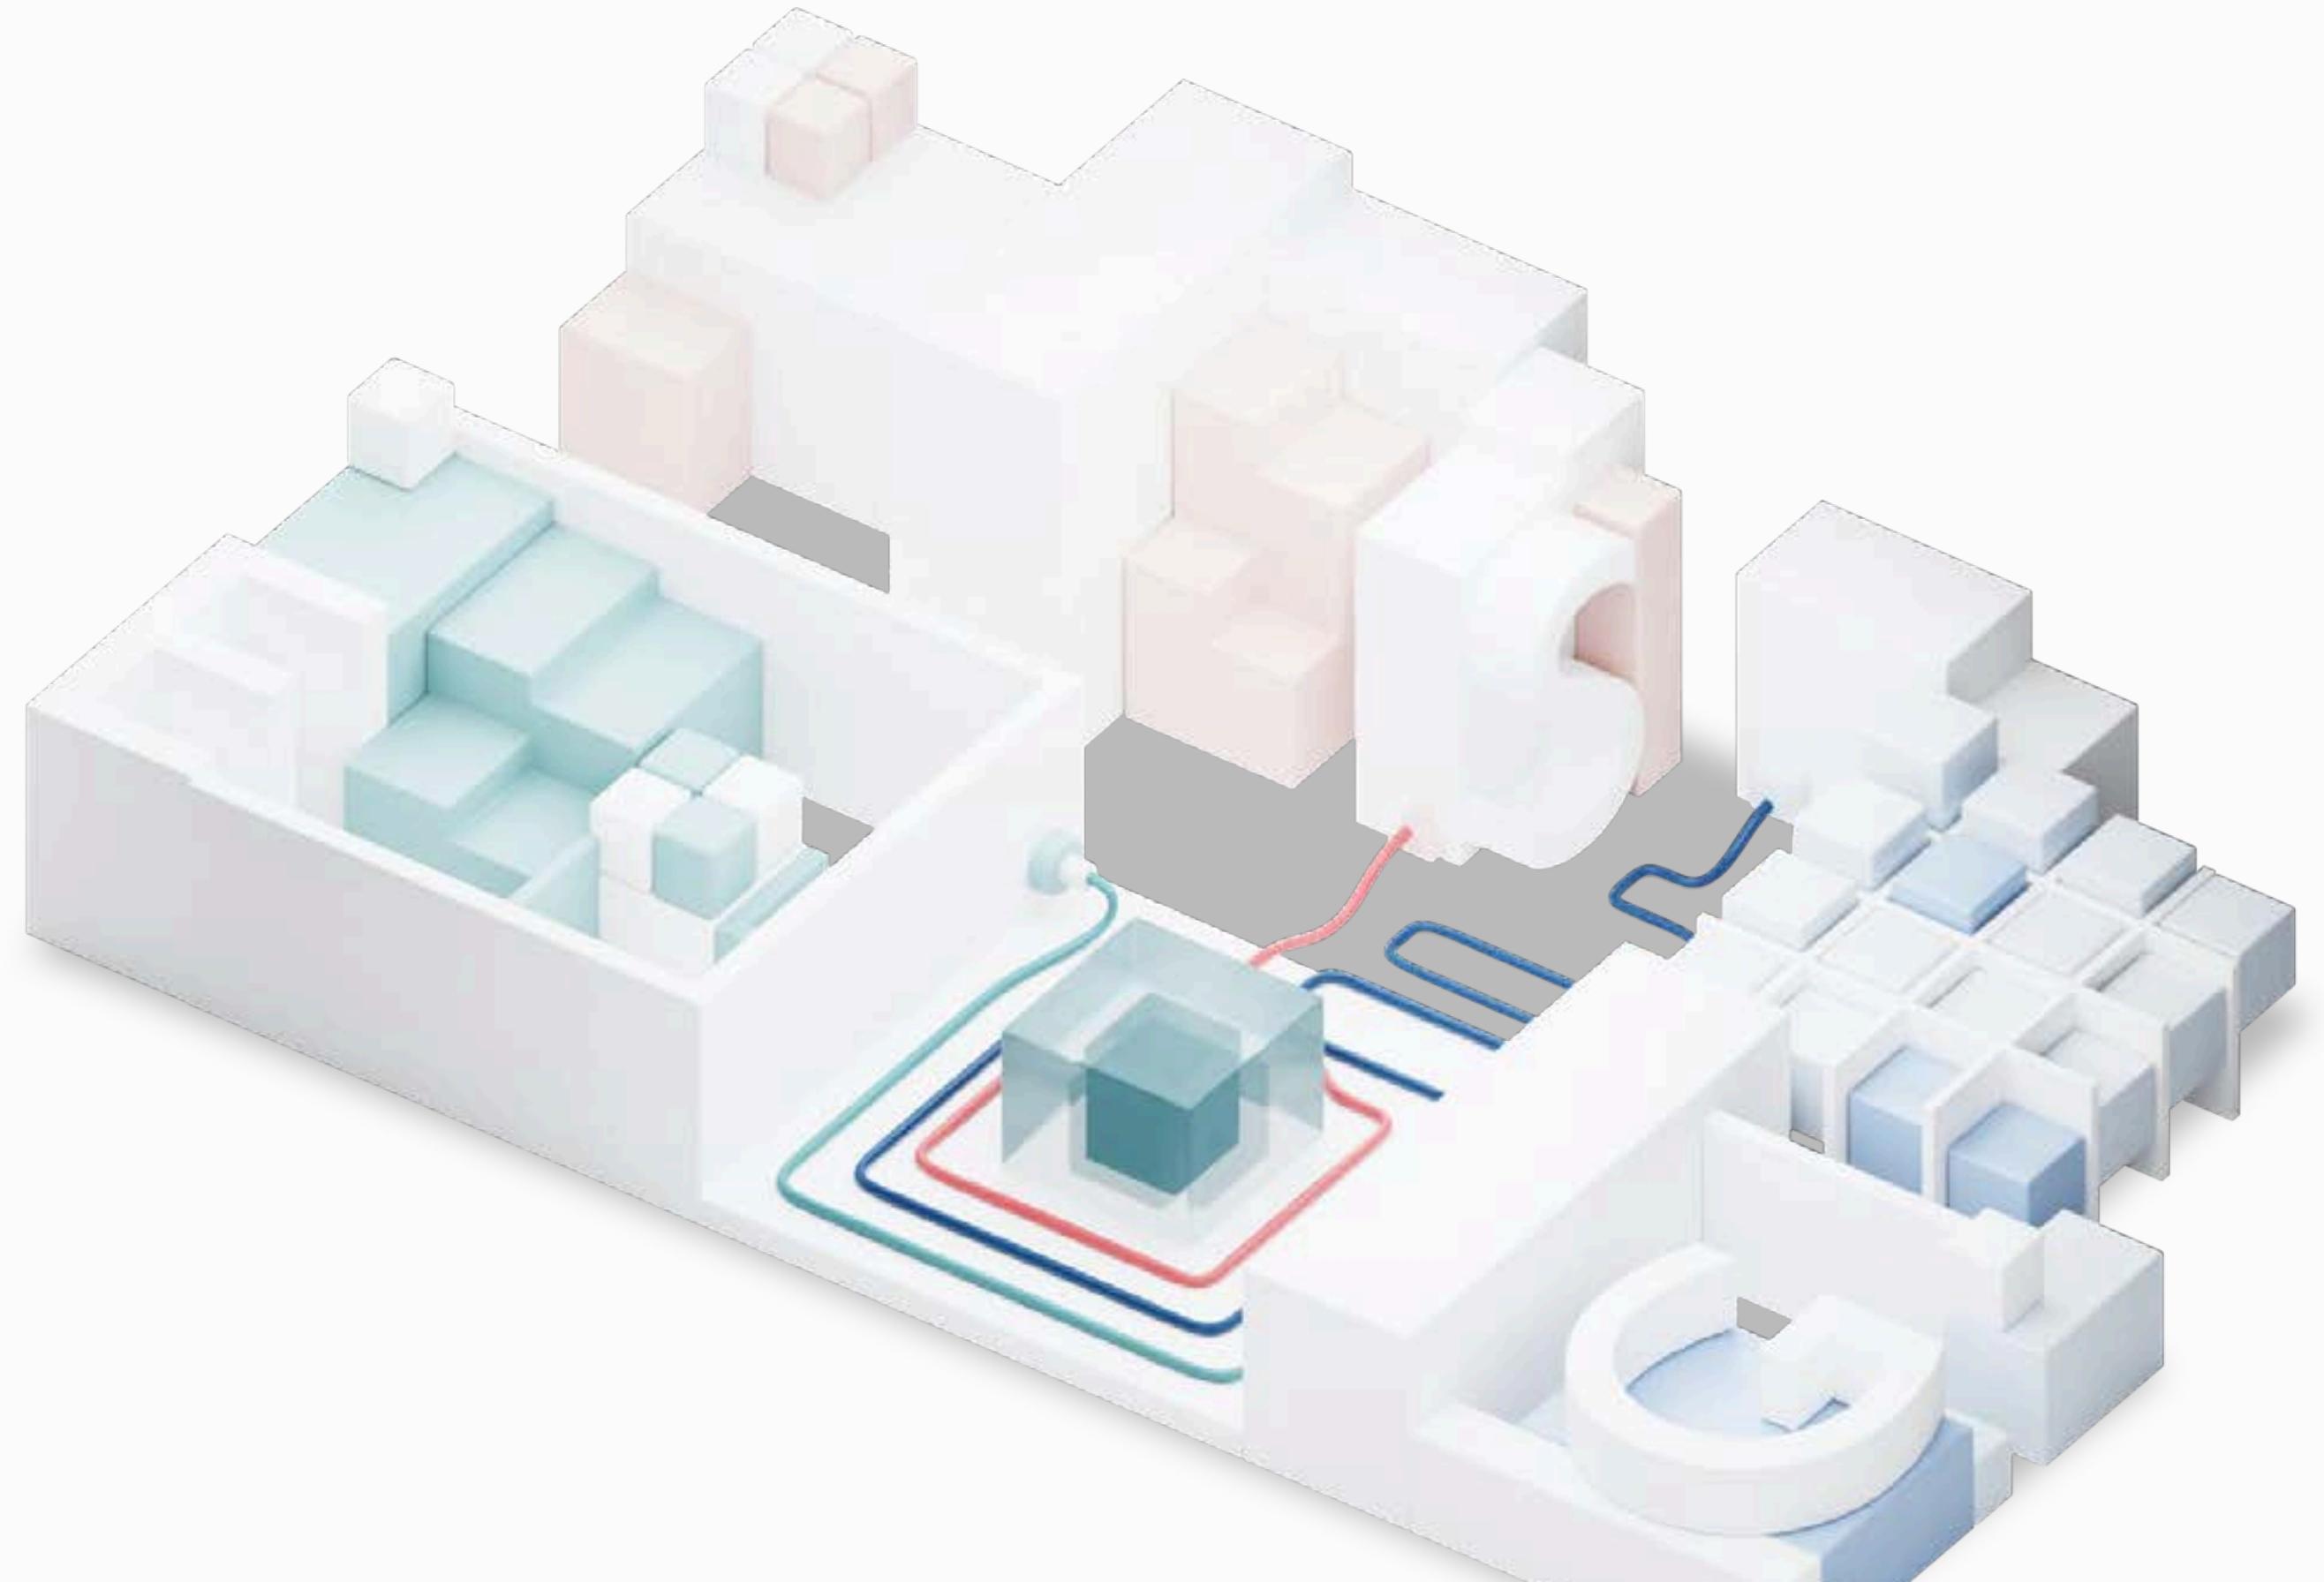

Customisation

Customisation services are tailored based on needs.

- Personalised interface
- Features on-demand
- Integration of existing systems
- Branded software
- Build your own tools

Data security

Data protection is the top priority. The highest security standards are implemented to ensure information remains safe, compliant, and accessible only to authorized users.

Security compliance

Our security protocols comply with recognised international security standards.

Cloud security

Customer data is securely hosted across multiple Microsoft Azure data centers mainly in North Switzerland.

Network Security

- Network vulnerability scanning
- Third-party penetration tests
- DDoS mitigation

For more details, full security specifications are available upon request.
