Joining the Refreshing Rivers iNaturalist Project

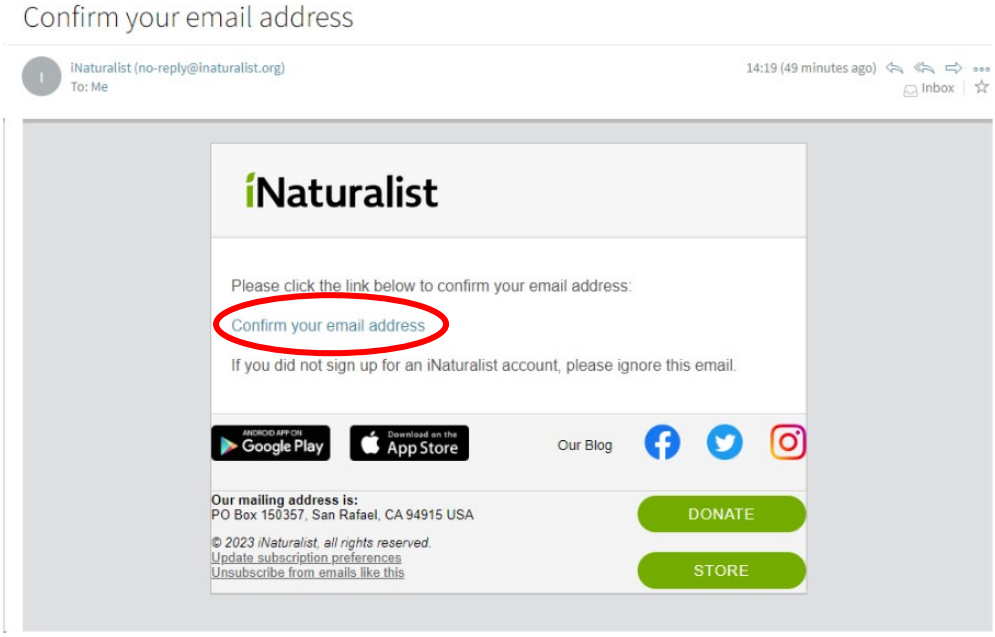

Find iNaturalist in the App Store for iPhone or Play Store for Android and download the app. Once you have found and downloaded the app, open iNaturalist and you'll see this screen.

Press on the 'Sign Up' button and enter your details. Make sure the sliders are all green to allow the app to collect your data to be used by the scientific community. Privacy policy and data usage can be viewed on the iNaturalist website.

Once you've completed your registration, the app will tell you to verify the account from your email address. Click on the link in the email to verify your account.

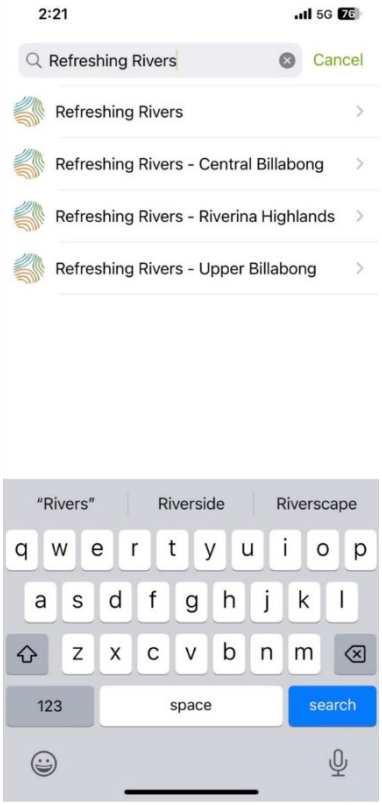

When you re-open the app you should have this screen. Select the 'Projects' button in the bottom right-hand corner.

The next screen may show a number of projects or nothing at all. Press the magnifying glass in the top right-hand corner and search for Refreshing Rivers.

Select the Refreshing Rivers Target Area that is relevant for you. The Project Officers can let you know which area you are in if you are unsure.

Once you are on the project page, select join. Any observations you take during the lifespan of the project will be automatically shared to this project. This allows for the community to assist in measuring what species are in each target area.
