The immediate and ultimate holding companies are DTP Inter Holdings Corporation Pte. Ltd. ("DTP Inter Holdings") and DT Group of Companies Corporation Limited ("DT Group") which are incorporated in the Republic of Singapore and Thailand respectively.

The condensed interim financial statements relate to the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities").

2. Going concern basis

For the 9-month financial period ended 30 September 2026, the Group recognised a net loss of S$17,851,000 (9M FY25 : S$23,319,000) and as at 30 September 2026, the Group has net current liabilities of S$582,421,000 (31 December 2025 : S$25,377,000). As at 30 September 2026, the Group has current assets of S$30,608,000 (31 December 2025 : S$20,018,000), comprising derivative financial assets of S$168,000 (31 December 2025 : S$1,602,000), inventories of S$2,237,000 (31 December 2025 : S$2,712,000), trade and other receivables of S$13,251,000 (31 December 2025 : S$9,284,000) and cash and cash equivalents of S$14,952,000 (31 December 2025 : S$6,420,000) and current liabilities of S$613,029,000 (31 December 2025 : S$45,395,000), comprising loans and borrowings of S$503,524,000 (31 December 2025 : S$Nil), trade and other payables of S$109,187,000 (31 December 2025 : S$44,964,000), provision for reinstatement cost of S$80,000 (31 December 2025 : S$80,000) and lease liabilities of S$238,000 (31 December 2025 : S$351,000).

Notwithstanding this, the Board of Directors of the Company (the "Directors") have prepared the condensed interim financial statements on a going concern basis, having considered that:

(i) on 10 April 2025, DTP Inter Holdings Corporation Pte. Ltd. ("DTP Inter Holdings"), the immediate holding company of the Company, has provided a signed letter of support to the Company to ensure that the Group has sufficient liquidity to pay its financial indebtedness;

(ii) on 25 September 2025, the Company has entered into a credit facility agreement (the "Credit Facility Agreement") with DTP Inter Holdings, pursuant to which DTP Inter Holdings agreed to provide facilities in an aggregate principal amount of GBP22.4 million or its Singapore dollar ("SGD") equivalent to the Company under the terms and conditions in the Credit Facility Agreement. The facilities under the Credit Facility Agreement are meant to fund the Group's operating expenditures, capital expenditures and working capital requirement. The credit facilities under the Credit Facility Agreement bear an interest rate of 11.71% per annum and carry a maturity date of 18 months from the initial utilisation date, being 26 September 2025, which is extendable to a date no longer than 36 months from the initial utilisation date. As at the date of this result announcement, S$15.9 million (GBP 9.3 million) remains undrawn;

(iii) on 27 February 2026, the immediate holding company of DTP Inter Holdings, DTGO Prosperous Limited ("DTP") issued a formal and irrevocable signed letter of financial support to the Company. This letter affirms that DTP Inter Holdings has set–aside liquidity to satisfy the GBP22.4 million commitment under Credit Facility Agreement dated 25 September 2025 (Note 2.1(ii)). DTP's commitment was provided through its direct subsidiary DTP Inter Holdings by way of a GBP22.4 million credit facility entered with the Company on 25 September 2025, as amended and supplemented;

2. Going concern basis (cont'd)

(iv) On 4 November 2026, the Group has entered into an agreement (the "Agreement") with the facility agent under the Senior Facility Agreement and the Mezzanine Facility Agreement, for and on behalf of the Senior Lenders and Mezzanine Lenders. With the execution of the Agreement, the Senior Facility Agreement and the Mezzanine Facility Agreement shall expire on 19 September 2027. The Group retain the option to further extend the maturity of the Senior Loan and Mezzanine Loan for a period of one year, on each of 19 September 2027 and 19 September 2028 respectively;

(v) Exercise of the extension option is subject to the satisfaction of certain conditions under the agreement, including, inter alia, the execution of required hedging arrangements and the absence of any continuing events of default;

(iv) to the extent necessary, the Group has the flexibility to re-schedule certain of its capital expenditure in order to manage its cashflows;

(v) the Group will continue to manage discretionary operational expenditure prudently; and

(vi) the Group has a positive statement of financial position, with net assets of S$162,950,000 (31 December 2025 : S$183,705,000) as at 30 September 2026.

Accordingly, the Directors are of the opinion that, as of the date of issue of these condensed interim financial statements, there are reasonable grounds to believe that the Company and the Group will be able to pay their debts as and when they fall due.

Notwithstanding the Board's opinion, the Board wishes to caution shareholders and prospective investors that the Group's liquidity position may be materially and adversely affected if:

(i) management's forecasts fail to materialize as actual operating performance;

(ii) the Loan Facilities are called for repayment or are successfully extended upon their maturity in September 2027; and

(iii) DTP Inter Holdings fails to fulfil its commitments under the Credit Facility Agreement.

Save for the above, the Directors are not aware of any other adverse circumstances or reasons which would likely affect the Group's ability to continue as a going concern. In consideration of the foregoing, the Directors opined that it is appropriate to prepare the condensed interim financial statements on a going concern basis.

If the going concern assumption is not appropriate, adjustments will be made to reflect a situation where the assets may need to be realised other than in the normal course of business and at amounts which could be significantly different from the amounts stated in the statement of financial position of the Group and statement of financial position of the Company. Furthermore, the Group and the Company may have to provide for further liabilities which may arise. The condensed interim financial statements do not include the adjustments that would result in the event the Group and the Company are unable to continue as going concerns.

3. Basis of preparation

The condensed interim consolidated financial statements for the third quarter and nine months ended 30 September 2026 ("3Q FY26" and "9M FY26" respectively, and for the corresponding third quarter and nine months ended 30 September 2025, "3Q FY25" and "9M FY25" respectively) have been prepared in accordance with Singapore Financial Reporting Standard (International) ("SFRS(I)") *1-34 Interim Financial Reporting* and International Accounting Standard 34 *Interim Financial Reporting*. SFRS(I)s issued by Accounting Standard Council and comprise standards and interpretations that are equivalent to International Financial Reporting Standards ("IFRSs") as issued by the International Accounting Standards Board ("IASB"). In the previous financial years, the financial statements were prepared in accordance with IFRS.

The condensed interim consolidated financial statements should be read in conjunction with the Group's last audited consolidated financial statements as at and for the year ended 31 December 2025 ("last audited financial statements"). The condensed interim consolidated financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance of the Group since the last audited financial statements.

The accounting policies and methods of computations adopted are consistent with those adopted by the Group in its last audited financial statements, which were prepared in accordance with IFRSs.

3.1 Functional and presentation currency

The condensed interim consolidated financial statements are presented in Singapore dollar ("S$") which is the functional currency of the Company, the accounting acquiree. The functional currency of DTP Infinities Limited, the accounting acquirer is Sterling Pound ("£" or "GBP"). All financial information presented have been rounded to the nearest thousand ("S$'000"), unless otherwise indicated.

3.2 New and amended standards adopted by the Group

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2025, except for the adoption of new standards effective as of 1 January 2026. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

The Group has applied the following amendments to SFRS(I)s for the first time for the financial periods beginning 1 January 2026:

- Amendments to SFRS(I) 9 and SFRS(I) 7: *Amendments to the Classification and Measurement of Financial Instruments*
- Amendments to SFRS(I) 9 and SFRS(I) 7: *Contracts Referencing Nature–dependent Electricity*
- *Annual Improvements to SFRS(I)s - Volume 11*

The Group's adoption of the amendments to SFRS(I)s does not have a material effect on its financial statements.

3. Basis of preparation (cont'd)

3.3 Use of judgements and estimates

The preparation of the financial statements in conformity with SFRS(I) requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis and are consistent with the Group's risk management, where appropriate. Revisions to accounting estimates are recognised prospectively.

Information about assumptions and estimation uncertainties that have the most significant effect on the amounts recognised in the financial statements is described in the following note:

Note 10 Property, plant and equipment

Measurement of fair values

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Group has an established control framework with respect to the measurement of fair values. The finance team has overall responsibility for all significant fair value measurements, including Level 3 fair values, and reports directly to the Company's Chief Executive Officer ("CEO") or personnel of equivalent authority. If third party information, such as broker quotes or independent valuers' report, is used to measure fair values, then the team assesses and documents the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of SFRS(I), including the level in the fair value hierarchy in which the valuations should be classified.

Significant valuation issues are reported to the Company's Audit Committee and Board of Directors.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement (with Level 3 being the lowest).

There were no transfers between levels of the fair value hierarchy as of the end of the reporting period.

4. Seasonal operations

The Group's hotel business is subject to seasonal fluctuations with high leisure demand in April, August, and December (around Christmas period) and high corporate demand in May, June, July, September, October and November (corporate bookings, Meetings, Incentives, Conferences and Exhibitions ("MICE") and city–wide events).

5. Revenue

Disaggregated revenue is reported in the same way as it is reviewed and analysed internally by management.

B = Weighted average number of shares of the Company for the respective financial period

9.2 Diluted loss per share

There were no dilutive potential ordinary shares for 3Q FY26, 3Q FY25, 9M FY26 and 9M FY25. The diluted loss per share was the same as the basic loss per share for the respective period.

10. Property, plant and equipment

As at 30 September 2026, the Group acquired assets amounting to S$10,772,000 (31 December 2025 : S$29,692,000).

Valuation of land and buildings

The Group's property, plant and equipment relates largely to freehold and leasehold land and buildings.

The Group engaged external property valuers to perform full valuation of its freehold and leasehold land and buildings at each financial year end. The last full valuation of the free/hold and leasehold land and buildings was conducted on 31 December 2025.

The carrying amounts of the freehold and leasehold land and buildings as at 30 September 2026 are based on valuations performed by external property valuers as at 31 December 2025 adjusted for capital expenditure incurred subsequent to the valuation date and translation differences. Management conducted an internal assessment of the valuation of the freehold and leasehold land and buildings as at 30 September 2026. In making this assessment, management has taken into account whether there were significant changes in the operating performance of freehold and leasehold land and buildings and market inputs such as discount rates and capitalisation rates since the last external valuation as at 31 December 2025. Based on the assessment, management is of the view that the fair value of the freehold and leasehold land and buildings has not materially changed from the 31 December 2025 valuation.

The fair value measurement was categorised under Level 3 of the fair value hierarchy based on the inputs to the valuation techniques used.

15. Loans and borrowings (cont'd)

At 30 September 2026 and 31 December 2025, certain property, plant and equipment of the Group were pledged as securities for secured loans.

The bank loans are repayable in full on 19 September 2026 ("initial expiry date"). However, pursuant to three (3) extension options of 12 months each up to September 2029, the loan may be extended by the Group after the maturity of the loans on 19 September 2026 provided that there are no breaches in the terms and conditions of the loan, including but not limited to the Group meeting various covenants (financial and non-financial) under the loan.

The financial covenants are tested quarterly on 15 March, 15 June, 15 September and 15 December each year. The various financial covenants that need to be complied with are as follows:

- the loan to value does not, at any time, exceed 70.00 per cent for senior and 82.50 per cent for mezzanine; and

- the historical interest coverage ratio ("ICR"): on each interest payment date is falling in the following periods is not less than:

    - in respect of the period from the signing date to and including the date falling 3 years after the first utilisation date in September 2024, 1.50:1 for senior and 1.075:1 for mezzanine;

    - thereafter, 1.68:1 for senior and 1.20:1 for mezzanine.

The Group as at 30 September 2026 had complied with the covenant with a loan to value of 56.2% for the senior and 72.1% for the mezzanine loan, with an ICR of 1.95:1 for senior loan and 1.24:1 for the mezzanine loan. The Group expects to remain in compliance with these covenants for the next 12 months following the current reporting period.

On 21 September 2026, the Group had entered into an agreement with the lenders of the Senior Facility Agreement and the Mezzanine Facility Agreement respectively, to extend the initial expiry date of the Facility Agreements to 12 October 2026 ("initial extended expiry date").

The senior facility includes a capital expenditure facility of £10.97 million, of which £2.43 million had been drawn down as at 30 September 2026. The remaining commitment of £8.54 million was available only for specified capital expenditure and was not utilised by the Group. Accordingly, in accordance with the terms of the facility agreement, the undrawn balance expired on 31 March 2026 and is no longer available for drawdown.

The expiry of the undrawn capital expenditure facility does not constitute an event of default under the facility agreement and does not affect the Group's compliance with the financial covenants set out above or the Group's right to extend the maturity of the loans.

Please refer to Section "Subsequent Events" below for further developments in relation to the Senior Facility Agreement and the Mezzanine Facility Agreement.

The regional UK hotel market is expected to deliver modest growth in 2026. PwC forecasts RevPAR growth of 1.5%, supported by resilient domestic demand, a gradual recovery in inbound travel and constrained new supply[1]. However, VisitBritain's forecast of 2% growth in both inbound visits and nominal spending masks a projected 1% decline in real spending, signalling continued price sensitivity[2].

The UK Budget recently announced[3] some business rates support for eligible hotels in England, although the impact will vary by property. Higher labour and energy costs, uneven demand and limited scope to pass on cost increases continue to pressure margins, against a volatile macro environment.

Nevertheless, opportunities remain for well-positioned hospitality operators to outperform through disciplined execution. Dynamic pricing, targeted offers, ancillary revenue, experience-led stays and digitalisation can strengthen revenue while tighter labour scheduling and energy management protect margins. The Group will build on the positive results from its year-to-date FY2026 performance, focusing over the next 6–12 months on revenue mix, guest value and operational efficiency.
