

Managing your ESU

How to control costs and reduce risk

With Windows 10 now out of support, many organisations are relying on Extended Security Updates [ESU] as a stopgap for devices that haven't yet made the move to Windows 11. But ESU is only a short-term fix, not a long-term solution.

Act now to avoid increased costs and risk

With ESU pricing doubling every year, it comes at a growing cost and offers short-term protection. As more applications and services are developed exclusively for Windows 11, continuing to rely on Windows 10 creates increased performance issues.

Even with ESU, Windows 10 offers users **no new features, limited support for modern hardware** and users may experience **compatibility problems** with new versions of software.

Delaying migration increases costs, complexity and exposure to risk. It also hinders business opportunities and competitive advantage.

Expertise to address even the toughest migration challenges

Computacenter helps accelerate your move to Windows 11, reducing risk and ensuring your devices stay secure and supported.

We have already migrated tens of thousands of users to Windows 11. Whether technical debt, complex legacy applications or time and resource constraints are creating bottlenecks to completing your migration, Computacenter can help.

With our experience and proven processes, we can assist with even the most complex upgrades. We offer the consultancy services, project management and resources organisations need to finalise their adoption of Windows 11.

We help with

Application rationalisation

to ensure you only assess, remediate and migrate only what you need.

Readiness assessments

for devices, applications, tooling and plan remediation.

Barrier remediation

to resolve hardware and application issues.

Implementation

of new configurations, deployments, build and tooling upgrades.

Pilot your proposed solution,

including configuration testing and fine-tuning.

Windows 11 rollout to your wider estate,

including user communications and training.

Handover of daily Windows 11 management

to your operational teams or managed service to ensure effective ongoing support.

Find out more

To find out how Computacenter can help with your Windows 11 adoption, or in the short term with ESU, please contact your Computacenter Account Manager, call **01707 631000** or email **enquiries@computacenter.com**.
