

Thanks to our dedicated team, CloudLab has become a leading global company for innovative web technologies in the print, packaging, and marketing industries. If you are interested in actively supporting us in our office in Iași or remote within Romania, you might be our new

Platform Configuration Specialist

Your New Job

- **Platform Configuration:** You will handle the backend configuration of Magento and our proprietary applications (printQ, packQ and brandQ).
- **Product Management:** You are responsible for the initial setup and ongoing configuration of complex products, including content updates and price maintenance.
- **Template Creation:** You will design and implement print templates using Adobe InDesign and integrate them into our system via the PDFlib library.
- **Quality Assurance:** Ensure product logic, pricing rules, and print outputs function flawlessly before going live.

Your Qualifications

- **Language:** Fluency in English (written and spoken) is required for this position.
- **Technical Background:** You have experience working with E-Commerce backends (ideally Magento) and a solid understanding of web-based applications.
- **Design & Print Skills:** You are proficient in Adobe InDesign. Experience with PDFlib or automated print workflows is a significant plus.
- **Detail-Oriented:** You enjoy working with data, pricing tables, and complex configurations where precision is key.
- **Problem Solver:** Your structured approach translates customer needs into functional system settings.

Our Benefits

- **A fair salary** and ample opportunity to get involved.
- Centrally located office in Iași, **easy to get to and get around.**
- We are a **global tech company** with a diverse, collaborative team.
- Foosball and a few **exciting team events** throughout the year.

Sounds good to you?
