We are seeking a Student Data & AI Analyst to join our team

Location: Copenhagen | **Apply by:** October 1st | **Start date:** November 1st | **Commitment:** 10-15 hrs/week

Do you want to drive a more sustainable and inclusive approach to developing cities from the engine room? If you love working on practical problems and developing them into tools, have a sharp eye for numbers, and are excited by the thought of helping a company grow from the inside, we'd love to hear from you!

We are now looking for a Student Data & AI Analyst to join us part-time and help us realise our ambitions at this exciting stage of our journey.

The role

Help us turn AI into everyday leverage. You'll design workflow automations and internal tools, such as RAG systems, that put our knowledge at everyone's fingertips, and you'll automate our ESG reporting on top of our shared data model.

You may for example, include:
- Building a RAG assistant for our internal knowledge base so colleagues can ask questions in plain language and get sourced answers from policies, playbooks, and project docs.
- Creating ESG/impact data pipelines and a report generator that ingests indicators into our central model, runs checks, and keeps numbers up to date by default.
- Standardize reports and decks: create accurate documents and PowerPoint presentations from a single source of truth, with consistent visuals and a transparent review process.
- Designing with governance in mind: citations by default, logging, privacy-aware defaults, tests, and alerts.

Qualifications we hope you bring
- You're enrolled in higher education with ~2–3 years left; comfortable coding in Python or TypeScript and using SQL.
- Curiosity about LLMs (prompting, embeddings, vector DBs) and solid data-engineering basics.
- Interest in how data & AI improve decisions and how they can support sustainability.
- A responsible mindset about data ethics and privacy.
- A proactive approach and an eager will to contribute.

About Home.Earth

Home.Earth was founded to rethink real estate as part of the solution to the climate and housing crises. We build homes that people can afford and that the planet can sustain.

As part of Home.Earth, you'll get:

- A meaningful job where you contribute to sustainable living for both people and the environment
- A workplace rooted in courage, integrity, and care as core values
- Skilled and passionate colleagues who find solutions together, even when everyday life is unpredictable

- All the responsibility you can carry
- An office culture where wellbeing and fun are an essential part of how we work

How to apply

Please submit your application, including a single-page cover letter, CV, and university grade transcript via dan@home.earth latest 1st of October. Candidates will be interviewed on a rolling basis, and the ideal start date is as soon as possible.

If you have any questions about the role or our new company, please reach out to Dan Pham, Co-founder, at dan@home.earth

All our roles are open to applications from all sections of society. We believe in the superpowers and potential of everyone – regardless of race, religion or belief, ethnic origin, different physical ability, family structure, socioeconomics, age, nationality or citizenship, marital, domestic or civil partnership status, sexual orientation, gender identity, or any other difference that makes you, well, you
