NOTES

All orders to be emailed to flame@glendimplex.com.au

Refer to Glen Dimplex Freight Matrix for freight charges by location.

PRICE LIST STRUCTURE

The pricing for each product is structured in a uniform way, capturing 4 headings:

- | | |
|---|-----------------------|
| 1 | FIREPLACE |
| 2 | FUEL BEDS |
| 3 | FASCIAS & ACCESSORIES |
| 4 | FLUE |

The available options for each product are listed in this format, along with further details as applicable to each product.

In general, a full order will require an item (or items) from each of these headings.

STANDARD (FULL) BASE

A full base fills the perimeter of the fire, and aligns with the side and back walls of the firebox. The bottom of any side glass is retained in tracks in the firebox.

Standard plaster finishes to a Full Base are shown below (L – Simplicity/Solid Wall on Hybrid, R – Purevision/Glass Wall on Hybrid).

The base overhangs the front opening of the firebox.

CUSTOM (INSERT) BASE

Note – if an insert base is chosen, any additional design, drawing, or procurement work required is the responsibility of the buyer.

An insert base does not fill the perimeter of the fire. Additional material such as stone or marble (not supplied by Real Flame) is required to fill the remaining voids. Made to measure glass (not supplied by Real Flame) will also be required. The bottom of any side glass then sits on top of the surround material.
