

TREECRAFT ECO FILM VN ®

Description

Treecraft Eco Film VN is a 2 times hot pressed and melamine-bonded panel made of plantation acacia veneers with a surface that after calibration is provided with a brown film. This panel is intended for use in humid environments across a range of non-structural applications, including packaging, site protection, and permanent incorporation into construction works (e.g., wall lining, ceilings, partitions, sheathing). The panel may also be used for temporary applications, such as limited re-use formwork, which are not covered by the Declaration of Performance. The edges are sealed and need to be resealed when cut. Treecraft curates a due diligence for every shipment and FSC certification is available upon request.

Intended uses

Technical class EN 636-2 NS for humid conditions as a non-structural panel (DOP available for permanent incorporation in construction works).

Please consult <https://www.treecraft.be/supporting-docs> for more information on application.

Quality & specifications film

Quality: smooth film
Appearance: Brown (or on request)

Glue – bonding

Melamine glue (also for face and back) according to EN 314-2, class 2.
Direct contact with soil and water should be avoided.

Formaldehyde emission

E1 according to standard EN717-1:2004

Density

+/- 600 kg/cbm according to standard EN323

Dimension

Width: 1250 mm
Length: 2500 mm
Thickness: 12 mm, 15 mm, 18 mm & 21 mm
Tolerance: EN 315

Moisture content

complies with EN 322 requirements.

Attention

Please kindly check reps and warranties on <https://www.treecraft.be/supporting-docs>.

Declaration of Performance applies only to permanent, non-structural uses. Temporary formwork use is excluded.

The figures included in this technical data file are for informational purposes only and do not have contractual value.

The technical characteristics may change without prior notice due to new developments and technological advancements.
