

STALICO® Transporter EA13

Trailer with hydraulic forks for camera and light masts

With the user-friendly STALICO® Transporter you move camera and light masts to any site behind a car or light truck. It is a unique transport concept in hot-dip galvanised steel on a braked European chassis, suitable for all European countries and indispensable for every owner of a STALICO® telescopic mast. CE-certified and supplied with an EC declaration. For the USA and Canada it is available as SA30 (unbraked) or SAB30 (electric brakes).

BENEFITS

- Hydraulic lifting forks — load without a forklift
- Braked European chassis
- Towable with BE driving licence
- CE-certified, supplied with EC declaration
- US/Canada versions SA30 / SAB30
