

STALICO® Compact

5.5 m compact mast for fast interventions

Mast extended with camera equipment

The STALICO® Compact Box is designed for mobile and temporary use and fast interventions, outdoors or indoors — ideally suited to camera surveillance. It is stable and set up by one person thanks to its hydraulic mast or hand-winch mast. There is room for a battery pack so applications can run longer autonomously. Unlike the STALICO® Box it has no outriggers: a counterweight of at least 120 kg (batteries or concrete) is required.

BENEFITS

- Compact 100 × 100 cm footprint — no outriggers
- Mast adjustable from 2 m to 5.5 m
- Room for battery pack for autonomy
- Hinged door with 2 locks and unique key code
- Stackable per 2

TECHNICAL SPECIFICATIONS

Mast height	Telescopic, adjustable 2 – 5.5 m
Weight	320 kg
Dimensions closed	100 × 100 × 220 cm
Dimensions deployed	100 × 100 × 550 cm
Winch	Mechanical hand winch
Counterweight in use	Min. 120 kg (batteries or concrete)
Housing	3 identical, personalised side walls
Handling	4 lifting eyes + forklift pockets
Frame	Hot-dip galvanised steel

OPTIONS

- Lighting
- Detachable solar panels 3 × 330 Wp
- Surveillance camera with software
- UPS technology
- Integrated solar panels 3 × 220 Wp
- Anti-climb protection
- Server cabinet
- Measuring & transmission equipment

APPLICATIONS

- Construction
- Indoor sites & warehouses
- Rapid response
- Car parks

IDEAL FOR quick deployments where space is limited — indoors or outdoors, with a small footprint.
