

STALICO® Detect

Compact detection mast — 360° coverage, weeks of autonomy

Mast fully extended to 3 m

STALICO® Detect is ideal for protecting ATMs, shopping centres, temporary indoor set-ups, gates, vacant buildings, garages and public spaces. Four motion sensors on the mast head and a communication hub in the spacious cabinet give full 360° detection; with the built-in solar panel this configuration runs autonomously for several weeks. A small bracket on the mast head takes turret or compact bullet cameras.

BENEFITS

- Stable on its own weight — no outriggers needed
- Set up by one person to 2 m or 3 m
- Several weeks autonomous with solar panel
- UPS bridges outages and detects power sabotage
- Two units fit on one pallet

TECHNICAL SPECIFICATIONS

Mast height	Telescopic 2 m or 3 m
Weight	135 kg
Dimensions closed	76 × 60 × 120 cm
Dimensions deployed	76 × 60 × 300 cm
Electrical cabinet	60 × 40 × 80 cm
Stabilisation	4 levelling feet for uneven ground
Detection	Up to 4 motion sensors · 360°
Cabling	Inside the telescopic mast
Handling	Pallet truck, transporter or 2 lifting eyes

* Cameras and detection systems are not included.

OPTIONS

- Battery as UPS
- Clamp bracket for motion sensors
- Decals / personalisation
- Solar panel 30 W + charger/inverter
- Camera bracket

APPLICATIONS

- ATMs & retail
- Vacant buildings
- Gates & garages
- Public spaces

IDEAL FOR discreet, fast detection where space is tight — indoors or outdoors, with or without mains power.
