

Gravity Stops

OVERVIEW

Gravity Stops provide an accurate easy way to measure lengths of lumber or other building materials.

FEATURES

- Lumber is pushed against stop, providing quick easy measurement
- Ideal for people wanting to make standard measuring quick and easy
- Easy setup, slides into the 'C' channel on the Roller Table
- Strong, robust stop
- Easily flipped out of the way when not needed
- Flexibility of setup, customize the stop distance based on what measurements you use (min. distance between stops 2.75")
- Table measurements made easy for multiple length set-ups

* Specifications shown reflect a typical configuration. Machine design, layout and features may vary depending on final configuration and customer requirements. Details will be confirmed at the time of order.
