

Laser Guide

OVERVIEW

The Laser Guide shines a laser beam onto the bench to show where the saw blade will cut, giving the operator a clear visual reference before pulling the saw through.

This supports safer, more accurate cutting and helps reduce potential errors, particularly when working with advanced or multiple-cut members.

* Specifications shown reflect a typical configuration. Machine design, layout and features may vary depending on final configuration and customer requirements. Details will be confirmed at the time of order.

FEATURES

- On/off switch can be located within easy reach of hand grip
- Easy installation
- Projects a laser line to indicate the saw blade cut path
