

Gravity Stops

OVERVIEW

Gravity Stops are a simple, cost-effective accessory for Spida Roller Tables, helping operators measure repeatable lengths of lumber or other building materials quickly and accurately.

Set the stops to the required cut lengths and then push the material against the stop, providing fast easy measurement.

FEATURES

- Stop slides into the 'C' channel on the Roller Table
- Adjustable stop position for standard measurement setups
- Minimum distance between stops: 2.75"
- Flip-away stop design for when not being used
- Strong, robust stop

* Specifications shown reflect a typical configuration. Machine design, layout and features may vary depending on final configuration and customer requirements. Details will be confirmed at the time of order.
