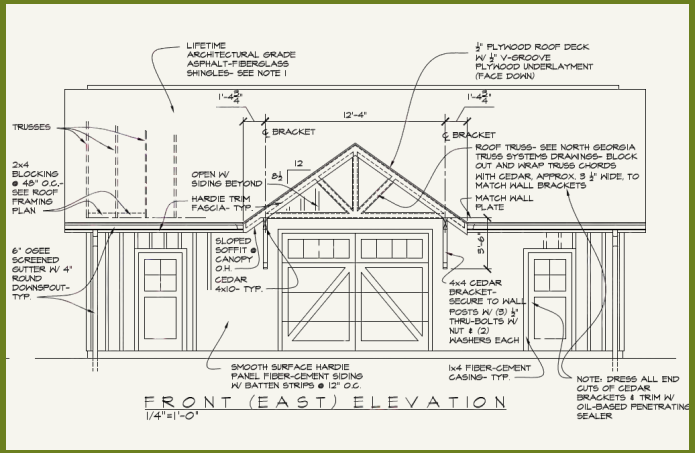
GROWING CAPACITY

cultivating community

The planned Volunteer Workspace will anchor horticultural operations at the heart of our wooded landscape, optimizing storage and providing a dedicated work area for 3,000+ community members who care for the garden.

As the final installment in a decade of capital improvements, it is a lasting investment in Woodlands Garden's vision of stewardship and connection to the natural world.

WOODLANDS GARDEN



OUTCOMES

- Expand and diversify volunteer engagement
- Improve safety and operational capacity
- Strengthen horticultural training opportunities
- Enhance the visitor experience
- Relocate storage and repurpose the Visitor Center garage for programming
