Computacenter

Apple device management made easy

Simplifying Apple device integration and management at speed and at scale

Total lifecycle support for Apple devices

More and more enterprises are adopting Apple for an improved employee experience. But Apple doesn't need a separate, complicated management stream to other devices. With Computacenter you can:

- Source, manage and deploy a mixed estate of Apple and non-Apple devices via a single, standardised management partner
- Give employees choice
- Maximise re-sale values
- Save your IT department time and money
- Treat every employee as a 'first-class citizen'
- Align security policies across the entire mixed estate

A one-stop shop for Apple device management

Streamlined end-to-end support

- Source, manage and deploy all Apple devices
- Auto configure iOS / iPadOS / macOS devices
- Optimise for updates
- Device protection
- Branded re-boxing

- Send to office or employee home – even internationally
- Source, send and manage peripherals
- SIM card insertion
- User guides
- Enrol from anywhere

Delivering benefits including:
- ✓ Employee satisfaction
- ✓ Increased productivity
- ✓ Reduced cost of ownership
- ✓ Simplified device management
- ✓ Persona-based services
- ✓ Consistent user experience

Taking your Apple investment to the next level

Workstyle analysis
Matching devices and apps to employees

Apple silicon readiness assessments
Adopting new Apple silicon devices and ensuring application and functionality readiness for employees

Finance
Helping you move from Capex to Opex, and to maximise device resale values

Adoption and Training
Ensuring users understand and utilise business process and applications

And delivering on sustainability

Carbon neutral
Apple has been carbon neutral since 2020. By 2030, all their products will be too.[1]

Fewer emissions
Single visit deployments of devices and peripherals

Re-use and recycle
Computacenter manages your devices to suit your sustainability strategy
