The information and opinions in this report have been prepared by the investment staff of Advanced Asset Management Advisors (AAMA) in collaboration with the other managers of funds within the Multi-Market Portfolio Series. This report is based upon information available to the public. The information herein is believed to be reliable and has been obtained from sources believed to be reliable, but AAMA makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the judgment of AAMA, in collaboration with the other managers of funds within the model portfolio series, and are subject to change without notice. This report is provided for informational purposes only. It is not to be construed as a recommendation to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction in which such an offer or solicitation would violate applicable laws or regulations. Each manager with funds included in the Multi-Market Portfolio Series is responsible for its own proprietary strategies for the fund(s) included within the model portfolio. There is no shared responsibility between fund managers, and no manager has any responsibility for any fund managed by another manager. Managers are compensated based on assets in their proprietary funds (as described in each prospectus) and not for sales of the fund or the model portfolio. The strategies within the model portfolio may include leveraged ETFs, inverse ETFs, leverage, derivatives, options, and other sophisticated concepts. For more information about each strategy, please refer to the current fund prospectuses. It is important to note that investments in securities (e.g. mutual funds and exchange-traded funds) involve risk and will not always be profitable. There is no guarantee that the investment results of the model portfolio or a fund within the model will be achieved. There is no guarantee that negative returns can or will be avoided within the model portfolio or in any of the funds within the model. The performance of an investment made in a security may differ substantially from its historical performance and as a result, an investor may incur a loss. Past performance is no guarantee of future results and diversification does not eliminate the risk of experiencing investment losses.
