Dimensional

Q2 2026 Model Profile

Dimensional Core Wealth Models

The Dimensional Core Wealth Models offer broad market exposure with a moderate emphasis on higher expected returns for investors seeking to outperform the market.

KEY BENEFITS

Strategic Asset Allocation
The models are rebalanced quarterly with strategic asset allocation powered by financial science, not speculation.

Daily Active Implementation
Dimensional's systematic, active funds draw on real-time market price information, enabling funds to be flexibly managed in changing market conditions.

Higher Expected Returns
The models are designed to outperform the broad market by pursuing research-backed premiums.

Asset Allocation and Fees Overview

As of June 30, 2026. Composition of the Models may change without notice.
1. Fee and expense information as of the most recent prospectus. Weighted average fees are calculated by taking the Model weights and underlying fund net expense ratios as published in the most recent prospectus to calculate the model weighted average fee. Advisory fees that may be applicable in the management of the Model are not reflected. Certain underlying Dimensional funds have entered into fee waiver and/or expense assumption arrangements with Dimensional. In these cases, Dimensional has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the Portfolio. Unless otherwise stated in the prospectus, the fee waiver and/or expense assumption agreement will remain in effect for one year from the date of the prospectus and continue in effect from year to year thereafter unless terminated by a Portfolio or the Advisor. The net expense ratio reflects the total annual fund operating expenses of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. See "Fund Returns" page(s) in this document for detailed fee and expense information on each underlying fund in the model.
2. Comparison against Morningstar peers as of June 30, 2026. Sample includes USD denominated surviving models from the Models universe in Morningstar.

As of June 30, 2026. Composition of the Models may change without notice.

1. The sample includes US-domiciled, USD-denominated open-end and exchange-traded funds at the beginning of the 20-year period ending June 30, 2026. Each fund is evaluated relative to its prospectus benchmark. Outperformers are funds that survive the sample period and whose cumulative net return over the period exceeded that of their respective benchmark.

Dimensional

Equity Characteristics

Index: MSCI All Country World IMI Index

Equity allocations within the models offer broadly-diversified, total market exposure with strong emphasis on higher expected return stocks for investors seeking to outperform the market. Decades of academic research provide insight into what drives differences in expected stock returns. Dimensional's models are designed to provide consistent and balanced exposure to small cap, value, and profitability stocks.

Consistently emphasizes:

- SMALL CAP
- VALUE
- PROFITABILITY

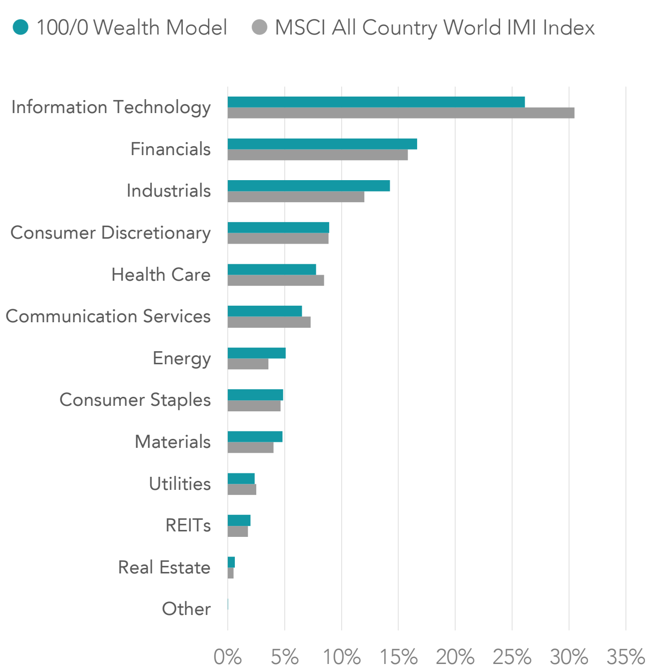
SECTOR ALLOCATION



As of June 30, 2026.

1. Profitability is measured as operating income before depreciation and amortization minus interest expense scaled by book.

REITs are classified according to GICS Industry codes that are usually included in Financials and Real Estate. Securities listed as "Other" have not been provided a GICS category. GICS was developed by and is the exclusive property of MSCI and S&P Dow Jones Indices LLC, a division of S&P Global. Index shown is intended for comparative purposes only and may differ significantly from the models. Holdings are subject to change.

Dimensional

Fixed Income Characteristics

Index: Bloomberg Global Aggregate Bond Index[1]

Fixed income allocations within the models are strategically designed to vary exposure to align with an investor's risk-return goals. Dimensional uses observable market information to position our fixed income portfolios to seek higher returns by systematically adjusting duration, credit quality, and currency of issuance.

Systematically varies:

- TERM
- CREDIT QUALITY
- CURRENCY OF ISSUANCE

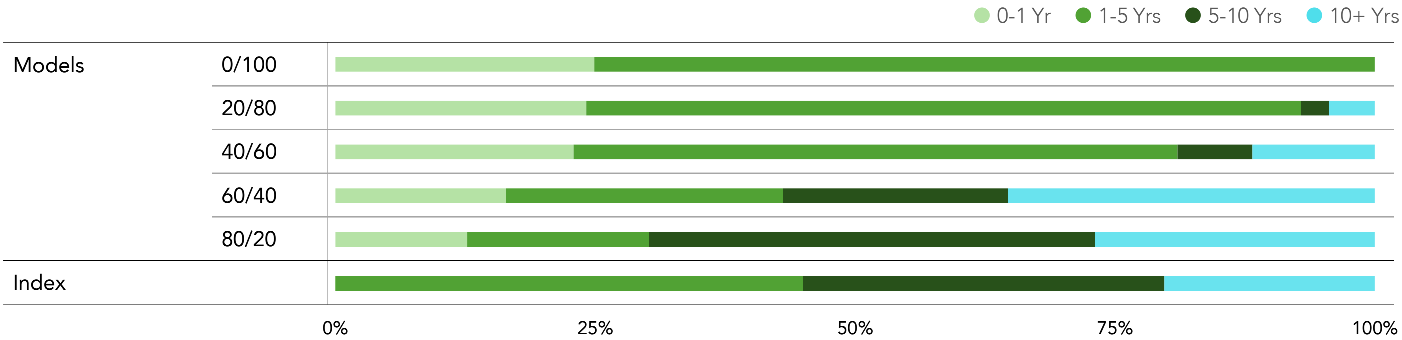
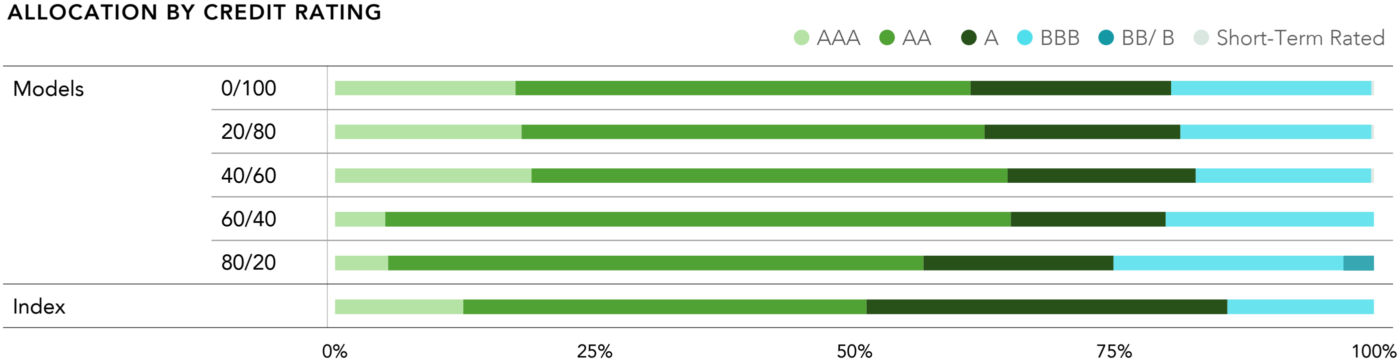
ALLOCATION BY EFFECTIVE MATURITY



ALLOCATION BY CREDIT RATING



As of June 30, 2026.

1. Hedged to USD.

Credit rating agencies Moody's Investor Service, Fitch Ratings, and Standard & Poor's Corporation rate the credit quality of debt issues. For reporting purposes, Dimensional generally assigns a composite rating based on stated ratings from Nationally Recognized Statistical Ratings Organizations ("NRSROs"). For example, if Moody's, Fitch, and S&P all provide ratings, Dimensional assigns the median rating. In certain instances, such as Pre-Refunded Municipals and US Treasury and Agency securities, we will assign the internal Dimensional rating. The internal Dimensional rating can only be as high as the highest stated credit rating from an NRSRO. Index shown is intended for comparative purposes only and may differ significantly from the models. Holdings are subject to change. Bloomberg data provided by Bloomberg.

Dimensional Wealth Models

Dimensional Wealth Models are strategic asset allocations composed of Dimensional funds and are designed to put rigorous research to work across an investor’s portfolio.

Dimensional’s solutions seek to add value by using up-to-date information in the latest market prices to identify reliable differences in expected returns across securities. Based on findings in our research, we do not make short-term allocation shifts across premiums, regions, countries, or sectors. A disciplined asset allocation that maintains broad diversification and a consistent focus on the long-term drivers of expected returns is, in our view, a more reliable way to pursue higher expected returns.

The models are rebalanced quarterly and are governed using a centralized process that emphasizes investor goals, operational efficiency, and thoughtful oversight.

The Dimensional Models team is a collaborative group of investment professionals across our global Research, Investment Engineering, Portfolio Management, and Investment Solutions teams. The team is responsible for the development, ongoing maintenance, and management of Dimensional Models.

About Dimensional

Dimensional has been applying financial science to investing since 1981. Our firm is driven by an evidence-based approach, Nobel Prize-winning insights, and decades of expertise working to outperform benchmarks and peers while maintaining low costs and diversification. We go where the science leads, continually innovating to improve outcomes for investors.

After Tax (pre liq.) is return after taxes on distributions and assumes fund shares have not been sold. **After Tax (post liq.)** is return after tax on distributions and sale of fund shares. Assumed highest marginal tax rate in effect for capital gains and ordinary income. Income from funds managed for tax efficiency may be subject to an alternative minimum tax and/or any applicable state and local taxes.

Fee and expense information as of the prospectus dated February 28, 2026, unless noted otherwise. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus.

1. The Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. Please read the Portfolio's prospectus for details and more information.
2. The Portfolio has not entered into fee waiver and/or expense assumption arrangements with the advisor.

After Tax (pre liq.) is return after taxes on distributions and assumes fund shares have not been sold. **After Tax (post liq.)** is return after tax on distributions and sale of fund shares. Assumed highest marginal tax rate in effect for capital gains and ordinary income. Income from funds managed for tax efficiency may be subject to an alternative minimum tax and/or any applicable state and local taxes.

Fee and expense information as of the prospectus dated February 28, 2026, unless noted otherwise. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus.

1. The Portfolio has not entered into fee waiver and/or expense assumption arrangements with the advisor.
2. The Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. Please read the Portfolio's prospectus for details and more information.

Glossary

Credit Premium: the return difference between bonds of similar maturity but different credit quality.

Duration: A measurement of the sensitivity of the price of a fixed income investment to changes in interest rates. Generally, high duration bonds will have greater sensitivity to changing interest rates than lower duration bonds.

Expected Return: an estimate of average anticipated returns informed by historical data.

Market cap: the total market value of a company's outstanding shares, computed as price times shares outstanding.

Price-to-book ratio: the ratio of a firm's market value to its book value, where market value is computed as price multiplied by shares outstanding and book value is the value of stockholders' equity as reported on a company's balance sheet.

Premium: a return difference between two assets.

Profitability: a company's operating income before depreciation and amortization minus interest expense scaled by book equity.

Profitability Premium: the return difference between stocks of companies with high profitability over those with low profitability.

Relative Performance: the measure of the return of one investment relative to another.

Size Premium: the return difference between small capitalization stocks and large capitalization stocks.

Term Premium: the return difference between bonds with different maturities but similar credit quality.

Value Premium: the return difference between stocks with low relative prices (value) and stocks with high relative prices (growth).

Disclosures

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission. **Consider the investment objectives, risks, and charges and expenses of the Dimensional funds carefully before investing. For this and other information about the Dimensional funds, please read the prospectus carefully before investing. This information is not meant to constitute investment advice, a recommendation of any securities product or investment strategy (including account type), or an offer of any services or products for sale, nor is it intended to provide a sufficient basis on which to make an investment decision. Investors should consult with a financial professional regarding their individual circumstances before making investment decisions.

There is no guarantee an investment strategy will be successful. Diversification neither assures a profit nor guarantees against loss in a declining market.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

Small and micro cap securities are subject to greater volatility than those in other asset categories.

International and emerging markets investing involves special risks, such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks.

Sector-specific investments focus on a specific segment of the market, which can increase investment risks.

Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

Fixed income securities are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. Municipal securities are subject to the risks of adverse economic and regulatory changes in their issuing states. The fund prospectuses contain more information about investment risks.

The Dimensional Models are provided for informational purposes only and should not be considered investment advice, a recommendation, or an offering of any services or products for sale. The Dimensional Models are not intended as a sufficient basis on which to make an investment decision. Certain investments included in the Models may not be suitable for investors, nor do they represent a complete investment program. Any indices shown are intended for comparative purposes only and may differ significantly from the Models. The risk factors, benefits and disadvantages of the indices and Models may vary greatly and should be considered alongside fund characteristics, holdings and past performance figures stated. The risk of the Models is subject to the risk of the Dimensional Funds, which can be found in the applicable prospectus, and the selection of Dimensional Funds and the allocation and reallocation of Model assets may not produce a desired result.
