

experience

Product Designer, [Addgene](#)

Jun 2025 - Present

- Led 0→1 design initiatives as one of two designers, owning responsive external web experiences (350K+ monthly users) and 4+ internal operational tools
- Redesigned UX of a high-volume internal database vital to laboratory operations, mapped end-to-end user workflows and validated redesign with engineering and staging QA, reducing task completion time by 75%
- Used AI tools (Claude, Bolt, Cursor) to prototype and iterate on concepts, reducing UI turnaround time and enabling faster validation with engineering
- Expanded Search by Sequence to support nucleotide and protein queries, drove 12K+ searches from 3K+ users within 3 months by designing for a specialized, high-need user population

Product Design Intern, [Addgene](#)

Jul 2023 - Dec 2024

- Designed and shipped responsive end-to-end experiences across high-traffic pages, grounded in user research, journey mapping, and requirements
- Conducted 10+ user interviews and usability tests, supplemented by SurveyMonkey and Google Analytics to improve workflows
- Audited 50+ pages for accessibility using WAVE, Lighthouse, and VoiceOver, increasing user satisfaction by 15%

Product Design Intern (Design Systems), [NBCUniversal](#)

Jun 2024 - Aug 2024

- Created scalable patterns and components for enterprise-grade design systems reused by 24+ products with frameworks Angular, React, ServiceNow, SAP Fiori, and Salesforce
- Modernized legacy finance tool worth \$1.7B by reusing UI from design system, auditing UX, rebuilding information architecture, mapping operational workflows, and incorporating business needs to increase operational efficiency
- Built high-fidelity prototypes, documentation, and product strategy for data-intensive tables, leading to improved team efficiency
- Improved scalability and consistency by performing QA on 85+ component dark mode implementation in Storybook

Product Designer, [Sorice](#)

Aug 2024 - Sep 2024

- Owned web and mobile UI/UX for AI-driven job applying platform, contributing to 300K+ users and 10M+ swipes

leadership

Lead UI/UX Designer, [Sandbox Student Software Consultancy](#)

Jan 2023 - Dec 2024

- Led 0→1 designs of new features, built components, and collaborated with developers on ([GraduateNU](#)), a platform that empowers 1K monthly users of Northeastern students to customize their plan of study
- Designed responsive wireframes, prototypes, and branding with developers for underprivileged communities in Boston ([HappyEastie](#))

Design Director

Jan 2023 - Dec 2023

- Directed 8 student project teams, advocated for design with 90+ members, ran workshops, and led weekly critiques for 19 designers to improve design processes and collaboration, significantly increasing retention rate

Lead UI/UX Designer, [Scout Student Design Studio](#)

Sep 2022 - Dec 2024

- Designed data visualizations to track and improve DTC sales performance for ([Rooted Living](#)), a Shark Tank finalist
- Conducted usability testing with 5+ DeafBlind users, designed for complex access needs, mapped assistive technology workflows, and shipped accessible designs for ([Tatum Robotics](#)), boosting task completion rates by 50% and aligning with WCAG 2.1 AAA
- Led team of 4 designers to ship 2 client products across B2B ([Folia](#)) and B2C ([Bibite](#)), driving UI/UX, branding, and systems in agile sprints

Design Director, [HackBeanpot](#)

Apr 2023 - May 2024

- Managed 5 designers to develop brand identity and implement high-fidelity designs into the monorepo website, securing 500+ applicants and 15+ sponsors including GitHub

Product Designer

Apr 2022 - May 2023

- Collaborated with 6 teams to organize a non-profit, in-person hackathon for 150+ attendees and made 20+ new social media designs, increasing account outreach by 206% and reaching over 1K followers

skills

Design: User Experience, Service Design, Journey Mapping, Design Systems, Interaction, Visual Design, Prototyping, Accessibility (WCAG 2.1), Usability Testing

Technical: TypeScript, React, HTML/CSS, JavaScript, Java, Git, Storybook

Tools: Figma (Make, Variables, Tokens, Autolayout, Components), Miro, Jira, Adobe Creative Suite, Procreate

AI: Prototyping, ideation, and workflow acceleration using Claude, Cursor, Bolt, Lovable, Magic Patterns, vO, Subframe, Stitch, Flowstep

education

Northeastern University, Bachelors of Science in Computer Science & Design, Minor in Ethics

May 2025
