

# Opti Operation & Maintenance Managed Services

Reliable support. Proven performance. Peace of mind.

## Overview

Opti's Operation & Maintenance (O&M) Managed Services are designed to ensure that your stormwater system continues to operate efficiently and effectively – long after installation. With proactive inspections, on-demand repairs, and expert support, you'll have the confidence that your infrastructure is in good hands.

## What's Included

### Biannual System Inspections

- Scheduled in spring and fall
- Performed in accordance with Opti's O&M Manual
- Includes inspection checklist, findings, and photo documentation

### Comprehensive Inspection Reports

- Delivered after each inspection
- Summarizes site conditions and maintenance recommendations

### Opti-Managed Repairs & Service Calls

- Coordinated by Opti
- Customer-approved
- Billed on a time-and-materials basis

### Dedicated Technical Support

- Full support for the Opti Platform and Opti Certified Hardware\*
- Responsive assistance to ensure system reliability

## Why Choose Managed O&M?

- Reduce the risk of system failures
- Extend the life of your infrastructure
- Ensure maintenance compliance
- Offload coordination to a trusted partner

\*Opti is not responsible for third-party systems (e.g., SCADA). Interoperability with non-certified hardware is not guaranteed.

## Partner with Opti. Maintain with Confidence.
