

Module Specifications

Year/Level: 5
Programme: Economics and Finance

Module:	Business Finance	Module Code:	5FBS2099	Credits:	15
Module Description:				Mandatory	
This module develops students' understanding of business finance and its role in organisational decision-making. Students evaluate sources of finance, investment opportunities, and financial risk, applying financial analysis to support funding, investment, and value creation decisions.					
Module:	Macroeconomics	Module Code:	5FBS2100	Credits:	15
Module Description:				Mandatory	
This module develops students' understanding of macroeconomic theory and analytical frameworks. Students apply models of economic growth, aggregate demand and supply, and macroeconomic equilibrium to evaluate contemporary economic issues.					
Module:	Consumers Firms and Markets	Module Code:	5FBS2101	Credits:	15
Module Description:				Mandatory	
This module develops students' understanding of consumer behaviour, firm decision-making, and market dynamics using contemporary microeconomic analysis. Students evaluate traditional and behavioural approaches to microeconomics and apply economic theory to address contemporary business and policy challenges.					
Module:	Enhancing Employability in Finance	Module Code:	5FBS2102	Credits:	15
Module Description:				Mandatory	
This module prepares students for careers in finance. Students explore career opportunities, develop professional application and interview skills, and create a professional curriculum vitae to enhance their employability and support long-term career success.					
Module:	Exploring Business Ethics	Module Code:	5FBS2008	Credits:	15
Module Description:				Mandatory	
This module explores the ethical responsibilities of organisations and employees in contemporary business. Students evaluate ethical theories, corporate social responsibility, and professional standards, applying ethical principles to analyse organisational behaviour.					
Module:	Financial Markets & Instruments	Module Code:	5FBS2103	Credits:	15
Module Description:				Mandatory	
This module develops students' understanding of financial markets, financial institutions, and financial instruments. Students examine the nature of financial markets, explore the range of financial instruments, and apply financial theories to assess risk and support investment and financial decision-making.					
Module:	Econometrics	Module Code:	5FBS2104	Credits:	15
Module Description:				Mandatory	
This module develops students' understanding of econometric techniques and their application to economic data analysis. Students apply statistical and econometric methods to analyse economic relationships, interpret empirical evidence, and evaluate quantitative models.					
Module:	Business Economic Techniques	Module Code:	5FBS2105	Credits:	15
Module Description:				Mandatory	
This module develops students' understanding of econometric techniques and their application to economic data analysis. Students apply statistical and econometric methods to analyse economic relationships, interpret empirical evidence, and evaluate quantitative models to support economic decision-making.
