

Module Specifications

Year/Level: L4
Programme: Psychology

Module:	Skills for Psychologists	Module Code:	4FHH2017	Credits:	15
Module Description:				Mandatory	

The module will provide students with a range of study skills useful to those studying psychology. This will include coverage of general study skills for Higher Education as well as skills specific to psychology.

Year/Level:		L4			
Module:	Brain and Behaviour	Module Code:	4FHH2018	Credits:	15
Module Description:				Mandatory/Optional	

This module will introduce students to the terms and ideas necessary to understand biological psychology. The module will give an appreciation of how neurons and brains work, and, to some extent, why and how we and other animals behave as we do, including mechanisms of learning by conditioning.

Year/Level:		L4			
Module:	Inner Workings of the Mind	Module Code:	4FHH2021	Credits:	15
Module Description:				Mandatory	

Everyday day our brain processes a multitude of information including thoughts, memories and feelings. It is responsible for maintaining attention, filtering irrelevant information and problem solving. This module will introduce students to fundamental topics in cognition and everyday mental processing.

Year/Level:		L4			
Module:	Statistics for Psychologists 1	Module Code:	4FHH2015	Credits:	15
Module Description:				Mandatory	

The module aims to develop students skills in analysing and reporting the results of investigations of psychological phenomena. Students will learn how to organise and analyse data by means of appropriate descriptive and inferential statistical procedures in order to address a psychological research question.

Year/Level: L4					
Module:	Methods for Psychologists 1	Module Code:	4FHH2016	Credits:	30
Module Description:				Mandatory	

The module aims to develop students’ skills in formulating, executing, analysing and reporting the results of well-designed investigations of psychological phenomena. Investigations will be based on psychological theory and will employ a range of well-established and broadly applicable research methods, both quantitative and qualitative.

Year/Level: L4					
Module:	People in Society	Module Code:	4FHH2019	Credits:	15
Module Description:				Mandatory	

Human beings engage with and spend their lives surrounded by other people, from close family members to the wider society. This module is concerned with the many ways in which peoples thoughts, feelings and behaviour can be affected by the real or imagined presence of others.

Year/Level: L4					
Module:	Understanding Child Development	Module Code:	4FHH2020	Credits:	15
Module Description:				Mandatory	

The greatest changes in cognitive and social development arguably occur in childhood. This is therefore a period of particular interest in psychology. This module introduces students to topics in child development including language.
