

Module Specifications

Year/Level: 4  
Programme: Business Administration

|                     |                                |              |          |           |    |
|---------------------|--------------------------------|--------------|----------|-----------|----|
| Module:             | Business Decisions in Practice | Module Code: | 4FBS2156 | Credits:  | 30 |
| Module Description: |                                |              |          | Mandatory |    |

This module develops students' collaborative problem-solving and decision-making skills through practical business challenges. Students apply management and problem-solving frameworks, work effectively in teams, and evaluate business decisions within realistic organisational contexts and across the different business functions.

|                     |                                              |              |          |           |    |
|---------------------|----------------------------------------------|--------------|----------|-----------|----|
| Module:             | Entrepreneurial Leadership for Social Impact | Module Code: | 4FBS2158 | Credits:  | 30 |
| Module Description: |                                              |              |          | Mandatory |    |

This module develops students' understanding of social entrepreneurship, responsible leadership, and sustainable business practice. Students work collaboratively to design and develop a social enterprise, applying entrepreneurial thinking and leadership skills to create positive social impact.

|                     |                    |              |          |           |    |
|---------------------|--------------------|--------------|----------|-----------|----|
| Module:             | Skills for Success | Module Code: | 4FBS2155 | Credits:  | 30 |
| Module Description: |                    |              |          | Mandatory |    |

This module equips students with the academic, digital, and professional skills required for success in higher education and the modern workplace. Students strengthen their communication, digital literacy, analytical thinking, teamwork, and self-management skills while applying these capabilities to contemporary business contexts.

|                     |                               |              |          |           |    |
|---------------------|-------------------------------|--------------|----------|-----------|----|
| Module:             | Developing Your Future Career | Module Code: | 4FBS2157 | Credits:  | 30 |
| Module Description: |                               |              |          | Mandatory |    |

This module prepares students for future career success by developing their professional identity, employability, and career planning skills. Students explore graduate career pathways, reflect on their strengths and aspirations, and create a personal development plan to support their long-term career goals.

|                     |                                                              |              |          |           |   |
|---------------------|--------------------------------------------------------------|--------------|----------|-----------|---|
| Module:             | Supporting personal and business professional practice (SPP) | Module Code: | 4FBS2159 | Credits:  | 0 |
| Module Description: |                                                              |              |          | Mandatory |   |

This module supports students' transition to university by developing the academic, digital, and personal skills required for successful study and professional development. Students reflect on their strengths, identify development goals, and build a personal development portfolio through structured self-assessment, tutor support, and reflective practice.
