Vision

“To be globally recognized as a leading centre of excellence in healthcare simulation and clinical skills education through innovation, academic leadership, and transformative impact on healthcare training”.

Mission

“To advance healthcare education through innovative learner-centred simulation that promotes safe training, active learning, research, and professional collaboration in alignment with international best practices and community partnership”.

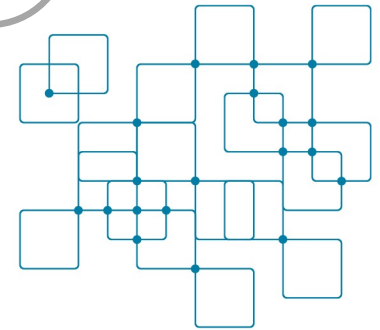

CSSC Core Values

SPARKS

The **SPARKS** core values framework establishes a comprehensive and strategically aligned foundation for the Clinical Skills and Simulation Center (CSSC).

- S** Service Excellence, Safety, and Social Responsibility
- P** Professionalism, Passion, and Partnership
- A** Active Learning and Academic Advancement
- R** Research, Realistic Simulation, and Reflective Practice
- K** Knowledge Exchange and Cutting-Edge Innovation
- S** Supportive Culture and Sustainable Excellence

FCMS-CSSC- Key Facts

One of the Kingdom's largest CSSC
7800 m² with Smart controlled setting

3 floors of learning space

14 Smart classrooms (20-50 students)
3 Smart Debriefing rooms (20 students)

12 specialized training spaces

8 High Fidelity Training Units
5 Standardized Patient Rooms

VR simulators

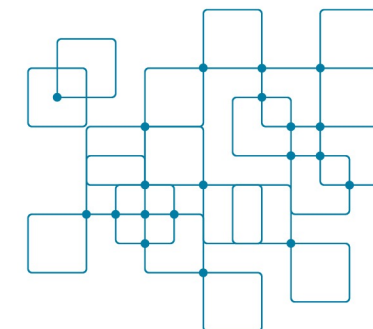

18 Smart OSCE Rooms

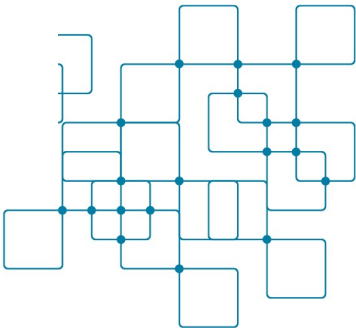

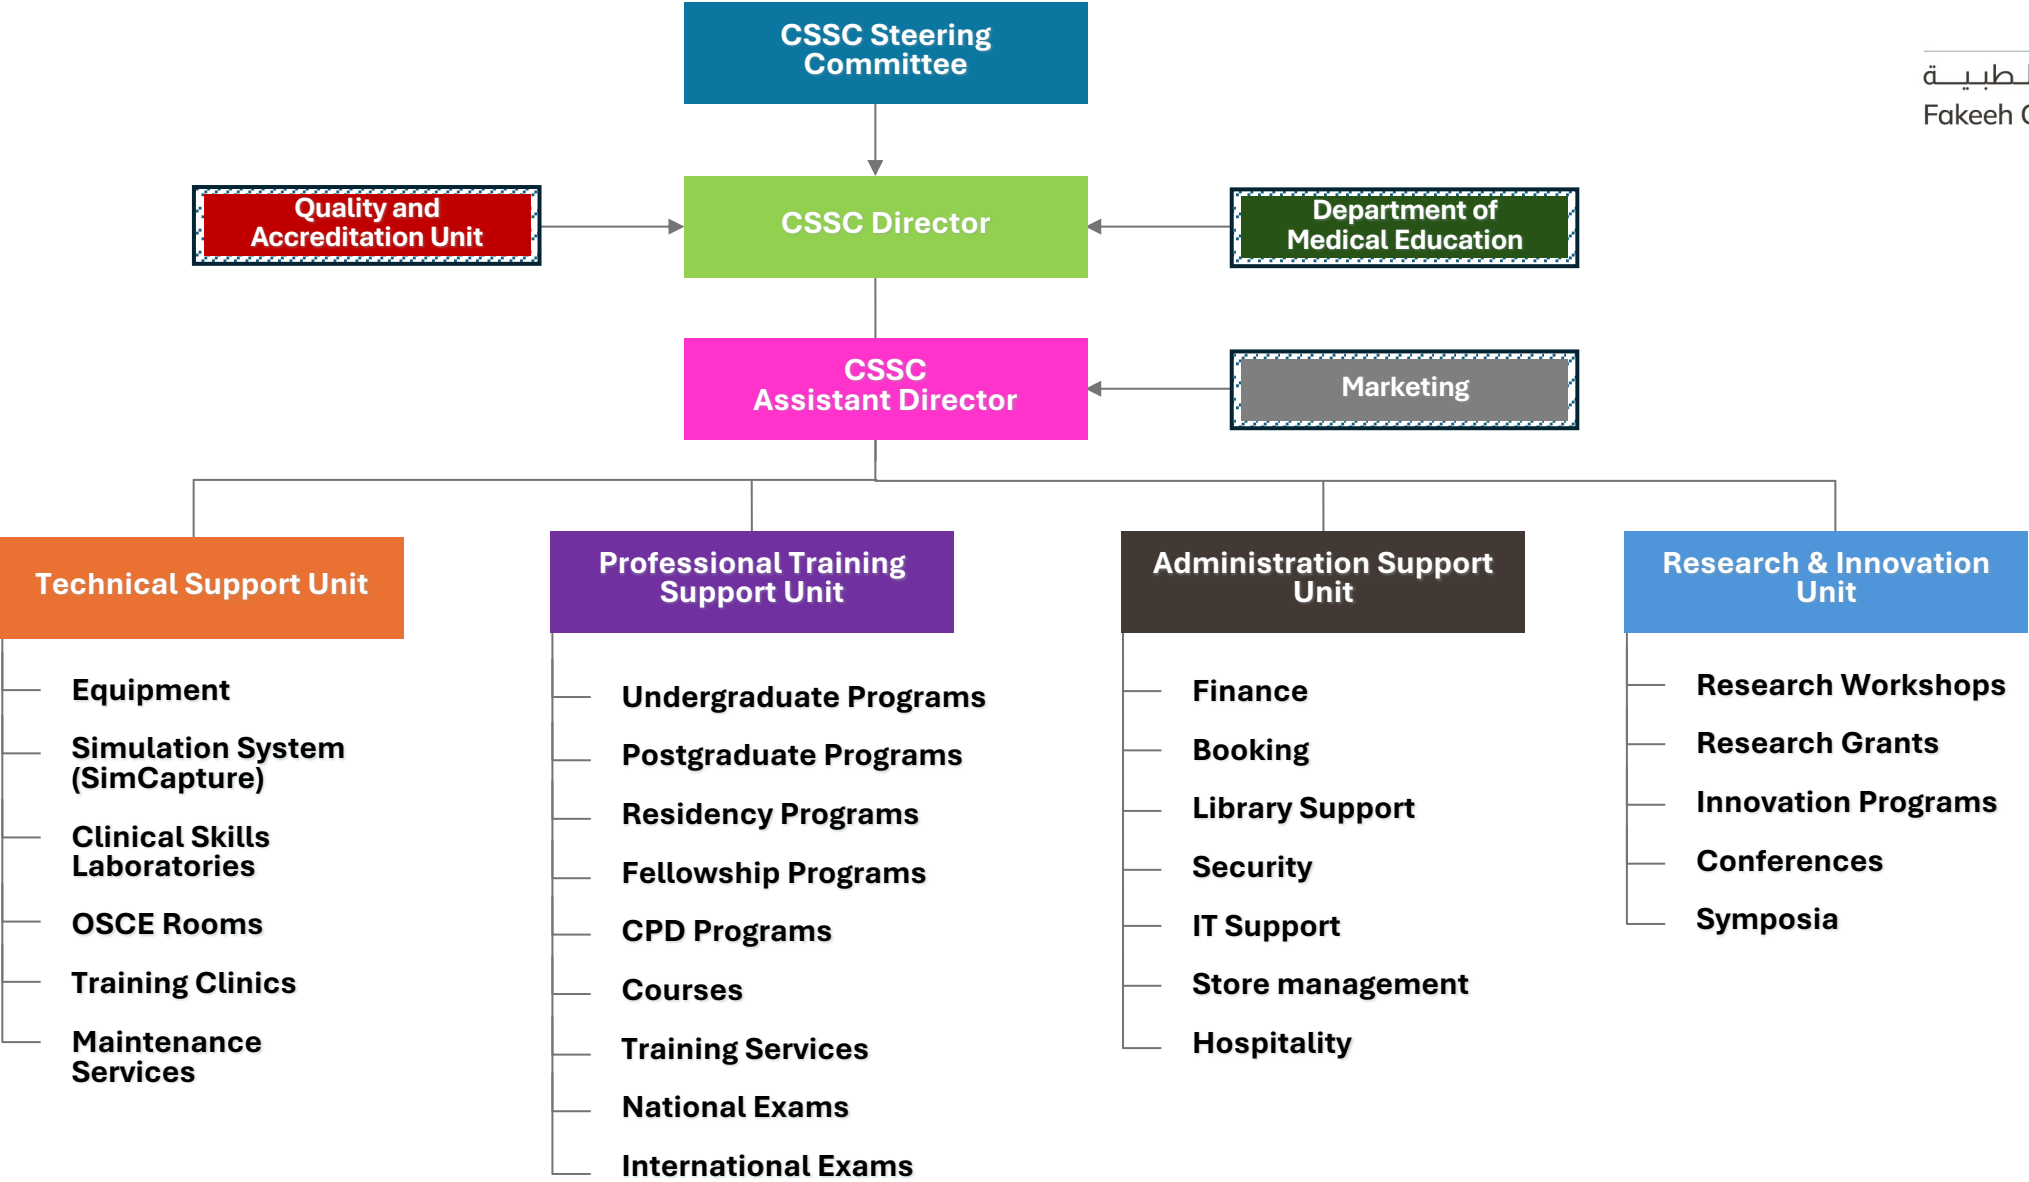

18 Clinical Training Units

Scope of Services of the CSSC

Audience of the CSSC

Services offered by CSSC

- ✓ High-fidelity simulation-based clinical scenarios.
- ✓ Clinical skills and procedural task training.
- ✓ Immersive patient care simulation experiences.
- ✓ Hybrid simulation activities integrating multiple simulation modalities.
- ✓ Standardized patient and standardized family programs.

- ✓ Simulation-based interprofessional education and teamwork training.
- ✓ Communication skills and professionalism training.
- ✓ Clinical reasoning and problem-solving exercises.
- ✓ Simulation-supported competency-based assessment and high-stakes testing.
- ✓ Virtual simulation and technology-enhanced learning programs.

- ✓ Debriefing and reflective learning sessions supported by audiovisual technologies.
- ✓ Faculty development programs in healthcare education and simulation methodologies.
- ✓ Curriculum consultation and simulation integration support.
- ✓ Research and development initiatives in healthcare simulation and medical education.

- ✓ Educational conferences, seminars, workshops, and scholarly events.
- ✓ Continuing Professional Development (CPD) and continuing education programs.
- ✓ Life -support training and certification courses.
- ✓ Adjunct teaching and interdisciplinary educational support.

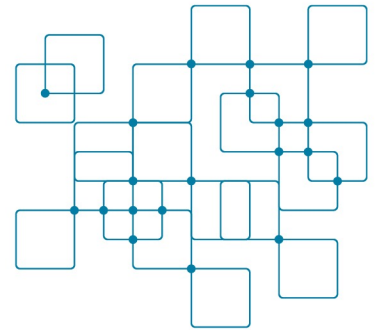

- ✓ Institutional consultation services and professional advisory activities.
- ✓ Recruitment tours, consultation tours, and educational showcase initiatives
- ✓ Community outreach programs, health fairs, and public health awareness campaigns.
- ✓ Professional speaking engagements and educational presentations.
