SOLUTION BLUEPRINT DP-1: DMZ DOUBLE PROTECTION

Disconnect to protect on demand

FireBreak protection for both firewalls around DMZ

Name	2 **Layer Continuity Protection**
Application	Public – private interfaces
Sectors	Enterprise, Utility, CNI, Defense
Description	Insert Firebreaks to protect each firewall on either side of the DMZ. Provide double physical circuit breakers between both DMZ and internal zones at risk when threat levels exceed policy thresholds. Addresses the outside-in and the inside-out challenges.

Public Zone → FireBreak → Firewall → DMZ → FireBreak → Firewall → Private Zone
