

To our Customers

Declaration of Conformity 2026

Wetzikon, February 23, 2026

This Declaration of Conformity issued by Elma Electronic AG refers to the EU Directives listed below and the corresponding national legislations. It confirms that our products comply with the currently applicable and, where relevant, future regulatory requirements of the European Union concerning the restriction of hazardous substances and the safe handling of chemical materials.

RoHS (Restriction of the use of certain Hazardous Substances) is the Directive on the restriction of use of certain hazardous substances in electrical and electronic equipment.

In accordance with Directive 2011/65/EU (RoHS II) and its amendments, including Delegated Directives (EU) 2015/863, (EU) 2017/2102, (EU) 2018/740, (EU) 2018/741, (EU) 2024/232 and (EU) 2024/1416, we hereby confirm that the products manufactured and supplied by Elma Electronic AG comply with the restrictions on the use of hazardous substances in electrical and electronic equipment.

The maximum concentration values by weight in homogeneous materials according to Annex II of the Directive are as follows:

- Lead (Pb) (0.1%)
- Mercury (Hg) (0.1%)
- Cadmium (Cd) (0.01%)
- Hexavalent Chromium (Cr VI) (0.1%)
- Polybromated Biphenyl (PBB) (0.1%)
- Polybromated Diphenylether (PBDE) (0.1%)
- Diethylhexyl Phthalate (DEHP) (0.1%)
- Butyl Benzyl Phthalate (BBP) (0.1%)
- Dibutyl Phthalate (DBP) (0.1%)
- Diisobutyl Phthalate (DIBP) (0.1%)

For specific applications, exemptions according to Annex III, items 6b and 6c of Directive 2011/65/EU apply, where technically required and legally permitted. Certain alloys, in particular brass and aluminium components, may contain lead concentrations above 0.1%. These concentrations fall within the allowable exemptions listed in Annex III of the Directive and therefore comply with the RoHS requirements.

Nickel (Ni) and Beryllium (Be) are used in certain components as functional alloying elements or surface finishes. Due to the wide range of products manufactured by Elma Electronic AG, a complete material differentiation cannot be made on a general basis. According to the current state of knowledge, these substances are not restricted under Directive 2011/65/EU; their use complies with applicable legislation and recognised technical standards. Elma Electronic AG continuously strives to avoid the use of such substances whenever technically and economically feasible.

All our products are manufactured, to the best of our knowledge, in compliance with RoHS requirements. The RoHS status of our products is indicated on our quotations and delivery documents.

REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) is the European Chemicals Regulation on Registration, Evaluation, Authorisation and Restriction of Chemicals – in order to improve the protection of human health and the environment from Chemical Hazards. The regulation also covers the mandatory registration of chemicals, but not of finished products.

Elma Electronic AG is considered a 'downstream user' within the meaning of the REACH Regulation. Our products are classified as articles and are therefore not subject to registration, since no substances are intended to be released under normal or reasonably foreseeable conditions of use.

This declaration applies to all standard products and customised solutions developed, manufactured, and distributed by Elma Electronic AG, unless otherwise specified.

We commit to using only materials and components that comply with the REACH Regulation. Our suppliers are required to use only compliant substances and materials and to inform us of any changes related to substances of very high concern (SVHC) listed in the latest Candidate List published by the European Chemicals Agency (ECHA).

The current Candidate List can be accessed at:
<http://echa.europa.eu/web/guest/candidate-list-table>

To the best of our knowledge, and based on the information available from our supply chain, our products do not contain any substances exceeding the limits defined in the above-mentioned legal provisions. However, trace impurities not disclosed by our suppliers cannot be completely ruled out.

This declaration is reviewed and updated regularly to reflect any new legal requirements or changes in substance assessments.

Kind regards,

Elma Electronic AG
