

Junior Content Editor, Full Time, London

This is an exciting opportunity for someone who enjoys working closely with writers and researchers to bring clarity and polish to complex ideas. As part of a fast-growing team, you'll help ensure Neudata's research is accurate, engaging and consistently high-quality.

To apply, please email your CV and cover letter to hr@neudata.co. Your cover letter should clearly explain why you believe you're a strong fit for this specific role. Applications without a cover letter will not be considered.

Company

Neudata's mission is to make life easier for people who work with data. We provide independent, objective advice to asset managers, hedge funds, and corporations to help them make smarter decisions about which datasets to use – and which to avoid. That means saving them time and money in the process.

Our expertise is in alternative data – from social sentiment feeds to credit card transactions to ESG signals – and we've also recently expanded into the world of traditional and market data.

We're headquartered in London with offices in New York and Shanghai and run a leading global conference business alongside our core research and advisory services.

Our Values

- Deliver outstanding service.
- Treat everyone how we would like to be treated.
- Work better together.
- Do it the right way.
- Be uncompromisingly honest.
- Never cease to improve and innovate.

About the role

Neudata's research team sits at the core of our business, driving the insights and expertise that underpin everything we do. The team produces detailed dataset reports and broader market-intelligence pieces that our clients rely on to make informed data decisions.

As a Junior Content Editor, you'll work closely with our analysts to ensure that every piece of published research meets our high editorial standards. You'll be responsible for reviewing, editing, and enhancing the quality of reports, ensuring grammatical accuracy, adherence to house style, and clarity of message. Over time, you'll develop an understanding of the different types of data used by investors and the market context behind our work.

Key responsibilities

- Editing research reports on specific alternative and traditional datasets
- Editing research content based on broader industry trends
- Sourcing and writing short pieces of industry news
- Handling day-to-day editorial queries from research analysts
- Working with AI tools to streamline editing and content-production workflows

Who we are looking for

We're looking for someone who has a passion for clear, precise writing and enjoys helping others communicate complex ideas effectively.

Requirements:

- Excellent written editing skills, ideally gained through journalism or in-house writing/editing roles
- Strong verbal and written communication skills
- Rigorous attention to detail and strong organisational skills
- A positive, approachable demeanour and the ability to collaborate across teams
- A proactive approach to learning about new industries and technologies
- An interest in how data can enhance investment decision-making
- Prior knowledge of financial markets is a plus, but not required

Compensation

- Competitive base salary.
- 25 days of annual leave plus an additional day for each year worked (capped at 30 days)
- Flexible work from anywhere, hybrid and office-based work.
- Study days.
- Volunteering day.
- Employee referral bonus scheme.
- Private medical insurance including dental, optical, and hearing.
- Enhanced family policies.
- Company social events.
- Workplace pension scheme with salary sacrifice and pension matching opportunities.

Apply

Please email your CV and cover letter to hr@neudata.co. Your cover letter should clearly explain why you believe you're a strong fit for this specific role. Applications without a cover letter will not be considered.

Contact Us

Neudata's London office is located in WeWork's coworking space at Moor Place.

Recruitment Process

Typically, Neudata's recruitment and selection process involves an initial screening and shortlisting stage where successful candidates are invited to attend virtual or in person interviews and assessments.

Candidates **must** be eligible to work in the United Kingdom.

Candidates who may require visa sponsorship should discuss this with the hiring manager during the interview process. Further information on Skilled Worker sponsorship can be found [here](#).

If you need assistance during the application or interview process, please contact hr@neudata.co to discuss how we can best support you.
