

# Manufacturing Execution System (MES)

Unifize's collaborative MES empowers teams to execute flawlessly, boost first-pass yield, and slash cycle times with real-time visibility and control.

## FAI & Control Plan Execution

Ensure precise execution of First Article Inspections and control plans to drive consistent, compliant production activities.

## eTravellers

Digitize production travelers for real-time updates, seamless collaboration, and improved traceability across manufacturing stages.

## Work Order Management

Organize and manage production tasks efficiently for smooth operations, faster deliveries, and full visibility.

## Inspections, Forms & Checklists

Standardize inspections and quality checks with easy-to-use digital forms, boosting consistency and compliance.

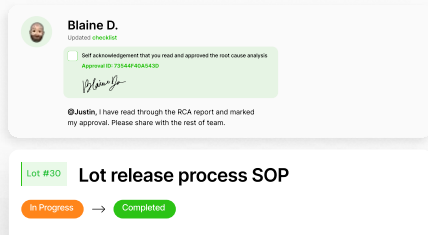

## Electronic Batch Records

Create, manage, and review batch records digitally to streamline compliance, traceability, and process efficiency.

# Manage your shop floor smarter - drive efficiency, increase throughput, and boost quality.

End-to-end traceability across materials, processes, and outputs.

“Unifize has been instrumental in transforming the lot tracking process and providing real-time visibility into material consumption. We have been able to spot issues early on and take prompt action.”

Denis Machoka

Director of Quality & Regulatory Affairs, Harmonic Bionics

“Unifize has sped up finished good lots from half a day to roughly 10 minutes, helping us cut down our quality team by 2-4 members.”

Mikala Hukka

Director of Quality Assurance, Adaptive Health
