

Enhance Autonomy with Smart Integrations

CoWin is more than just a system

It's the foundation for personalized, empowering care. Our platform offers a wide range of integration possibilities that give service users more control over their environment and help staff deliver truly responsive care.

Think of the comfort and autonomy when service users can manage things like:

- Call
- Television
- Lighting (on/off, brightness, color and circadian)
- Temperature
- Toilet flush
- Blinds
- Window
- Privacy glass

Tailored to Your Infrastructure

Every environment is unique, and so are the technical requirements. The integration options depend on your current infrastructure, the controllers, fixtures, and cabling that sometimes are already in place.

That's why we always recommend a technical meeting early in the process. This allows us to assess your situation properly, co-design the best solution, and give you a clear picture of what's needed in terms of implementation and pricing.

Let's create a modern, empowering environment for your service users, together.
