

Building Market-Leading Companies

Led by principals, each with over 25 years of private equity investing experience, Riata is a leading private equity firm. We partner with seasoned management teams to invest in growing, profitable, privately-held companies with a focus on three industry sectors—business services, consumer, and healthcare services. RCG takes a selective approach to investing in high-potential businesses whose owners and management teams want an investment partner with the capital, experience, and record of successful collaboration required to achieve their liquidity and value-creation objectives. We provide entrepreneurs and management teams the support they need to build exceptional middle market companies.

Investment Profile
