# M.T – XAL Developer #1

Since 1993, I've been working as a contractor on various IT projects. I am a reliable and thorough in my work, I place great emphasis on quality control. Eager to learn new things, which is normal for Informatics professions. Professional experience primarily in database design and management areas acquired during the introduction of various integrated systems management and customization. In these projects, I was involved in every stage, from design to programming, project leadership in the education of clients. I like working as developer such as customer manager.
