

Senior Java Developer 232223

- ❖ 9+ years' experience in multinational environment
- ❖ 7+ years' experience in enterprise-level Java development
- ❖ Clean coding
- ❖ Experience in agile methodologies: Scrum, Kanban
- ❖ ITIL-certified

PROFESSIONAL BACKGROUND

9/2017 - 03/2023 Company 1 (IT Background) | Software Engineer

- ❖ Development of an internal Ericsson application which supports secure and remote access for telecommunication engineers.
- ❖ Technologies: Java, Spring (Boot, Core, MVC, Data, Security), JPA, PostgreSQL, Flyway/Liquibase, Vaadin, ActiveMQ, FreeRADIUS, Ansible/Puppet
- ❖ Testing: JUnit, Mockito, Mock-server, JBehave/Cucumber, Selenium
- ❖ Project tools: Jenkins, Git, Jira, Bitbucket/GitLab, Confluence

2/2017 - 8/2017 FREELANCER | Software Engineer

- ❖ Development of a social application which will be available on mobile and the web. Technologies: Android, Google Cloud Platform, Drupal

11/2014 – 2/2017 Company 2 (Digital services) | Software Engineer

- ❖ Java backend development of the Hotels.com platform which hosts several other travel industry brands as well (a total of 85 websites in 34 languages). Site visitors can book hotels and trips from/to places all over the world, taking advantage of personalized offers.
- ❖ My responsibilities included:
 - add new or customize existing RESTful web services
 - peer code reviews
 - integration of system components
 - introduce new and configure existing brands
 - build and configure A/B tests
 - reporting desired data/metrics to business
- ❖ Technologies: Java, Spring (Boot, Core, MVC, MockMvc, RestTemplate), JAX-RS (Jersey)
- ❖ Testing: JUnit, TestNG, EasyMock, Mockito, BDDMockito, WireMock, GreenMail, Cucumber
- ❖ Project tools: Git, SourceTree, Jira, Bamboo, Stash, Confluence, HipChat, Splunk

11/2012 – 11/2014

Company 3 (Telecommunication Background) | Software Engineer

- ❖ Development of the ITIL-based HP Service Manager tool for the service desk. Provides the full lifecycle management of issue tickets along Incident-, Problem- and Change Management.
- ❖ My responsibilities included:
 - Implementation and configuration of new system features
 - Exclusive responsibility for the construction of Service Level Management system for Problem Management (I was rewarded for the successful delivery of this project)
 - 3rd level support, when help desk failed to recover a service
