

# Frontend Developer 233061

My main goal is to learn and gain as much experience as possible. I prefer working in a team and highly support pair programming in practice as a junior developer to get better at my job but I'm also capable on my own. My greatest strength is React frontend and I also have the most experience in this topic. I always intend to add actual value to the project I'm working on and try to get myself involved in every aspect from testing to UI/UX design.

## PROFESSIONAL BACKGROUND

---

10/2021 – Current     IT SERVICES AND IT CONSULTING | Full-stack developer

- ❖ Working on a Public Sector project for Swiss clients with Spring Boot and Angular technology
- ❖ I work as a Frontend developer on the Motif maker application and mainly worked on mobile design and responsibility. The app stores more than a thousand motifs from all around the world and lets users create unique pictures with different layouts based on these motifs that can be downloaded or shared with anyone. It combines tradition and technology in a unique way but it also has educational purposes, like offering the time of creation, place of origin and interesting short stories about each of the motifs and the objects these patterns are based upon
- ❖ Used technologies: Node.js, React, HTML, CSS, TypeScript
- ❖ Past Project: I worked as a frontend developer on a contract registration system in partnership with the German startup. The project was to rewrite the application from scratch but also to add new features, identify and fix bugs, create tests and redo the design. Mainly companies, but also individuals can benefit from storing documents and copyrights in digital format that they can access, download, personalize, import, and export in a variety of file formats anywhere and anytime.
- ❖ Used technologies: Java, Spring, SQL, JPA, React, HTML,CSS, Typescript, Cypress

## COMPETENCIES

---

<ul style="list-style-type: none"><li>❖ HTML</li><li>❖ Typescript</li><li>❖ CSS</li><li>❖ React</li></ul>	<ul style="list-style-type: none"><li>❖ Java</li><li>❖ Spring Boot</li><li>❖ SQL</li><li>❖ Cypress testing</li></ul>
