

# Frontend Developer-233064

Being a seeker of success, results and effectiveness in my years as a software professional, I have been mentioned on the same page with change multiple times. As such, I am driven to support teams and organizations with a keen eye.

## PROFESSIONAL BACKGROUND

---

### BLACKBELT TECHNOLOGY KFT. | Software Consultant

- ❖ B2B Performance project
- ❖ Customer has been working on introducing a new platform into their infrastructure to support B2B sales. I was asked to step in and help them identify areas of improvement such as network, code, processes, and documentation.
- ❖ It was necessary to be involved with multiple teams and stakeholders, while also being present as an 'outsider' to bring in up to date knowledge from the industry and take the role of a guide-post of what could be ahead, instead of what is already behind the teams.
- ❖ In order to support not only software but test engineers along with managers, it was crucial to learn fast, adapt, and know who needs what kind of information, both in detail and quantity. Pair programming, mentoring was part of the daily routine in parallel with the ongoing analysis, as it was needed for them to take ownership of all parts of this initiative in the long run.
- ❖ Tech stack involved: Salesforce, Cloudflare, AEM, Angular, Mulesoft, Lightning components and numerous custom services and solutions.

### 1 year I-CELL MOBILSOFT ZRT. | Angular Developer

- ❖ Full stack development, modernization of multi tenant CMS project
- ❖ Material based design system library development
- ❖ Techstack: Angular, Nodejs, Typescript, TypeORM MongoDB

### 3 years FÓNIX RENDSZERINTEGRÁTOR IT KFT. | Software Developer

- ❖ Leading teams of 6 to 15 people.
- ❖ Architecture and software design.
- ❖ Design and Development of asset management solution to open new business opportunities. (Microservice architecture, spring-boot, Node.js, MQ, Angular 9+, Camunda, Minio, Postgres, etc.)
- ❖ Internal prototyping and tool building (Node.js, React.js, Vue.js, MongoDB)
- ❖ Refactoring frontend solutions for a financial institute (angular 8, spring-boot)
- ❖ Built up development lifecycle and infrastructure from the ground up (HyperV, Gitlab, Gitlab CI/CD, Docker)

**1 year**      **ESM ALLIANCE LTD. (London) | ServiceNow Developer**

- ❖ Successfully designed and built compliance solutions (e.g GDPR) with great customer satisfaction.
- ❖ Design and implement workflows and integrations based on customer needs
- ❖ Responsible for ITIL compatible solutions within the ServiceNow ecosystem

**1 year**      **SMARTX SOLUTIONS KFT. | Software Developer**

- ❖ Responsible for building back-end solutions for a financial reengineering project • Successful modernization project for a state institute
- ❖ Technologies: Spring-boot, Java, Camunda, Oracle
