

Senior Mendix Developer, Product Owner, Business Analyst 232234

Steadfast, innovative, and system-thinking professional with 20 years' experience within the SW development industry from small enhancement adventures to complex digital transformation endeavors. Gained proficiency in requirement engineering, IT solution design, and project management, besides having 5+ years' practice in leadership within project and company context alike.

I am keen on requirements engineering and model driven software development (MDSD) methodologies. I aspire to client satisfaction by applying evaluated new technologies, methods, professional standards to finally shape the desired solution in a frame of well-managed IT services.
