

## Meta: Facebook + Instagram 😝 😇

## **Multiply Your Reach with Meta**

Meta is a technology conglomerate that owns and operates popular social media platforms like Facebook and Instagram, creating a massive ecosystem for marketing and customer engagement. A walled garden, Meta controls all ad placements, audience data, and analytics within its own environment.

With over 3 billion monthly active users worldwide, Facebook remains a popular social network in terms of activity and an essential platform for brand presence. Consumers use Facebook to connect with friends, communities, and brands through shared content, video, and messaging. With U.S. users spending an average of 32 minutes a day on Facebook (Statista), it is well-suited for driving brand visibility, increasing customer engagement, and reaching new audiences.

Facebook's sister brand, Instagram, is an equally popular mobile-first social media platform with 2 billion global monthly active users and 200 million business accounts (Statista). Its visual-centric format empowers marketers to capture attention and tell a brand's story effectively through engaging imagery and video content. Popular with Gen Z and Millennials, Instagram is ideal for brands aiming to build awareness, showcase products and services creatively, and inspire consideration.

## **Move Audiences to Action**

In addition to a vast audience reach, Meta's first-party data allows for precise audience segmentation based on demographics, interests, and online behaviors, ensuring ads are seen by those most likely to act. Advanced targeting options include custom audiences built from mobile device IDs, lookalike audiences for relevance and scale, and retargeting to reconnect with website visitors.

To help brands engage ideal audiences across the buyer's journey, Meta offers a variety of ad formats, such as Videos, Carousels, and Stories to align with diverse marketing objectives and drive specific actions. Paired with rich analytics, brands can track performance with detailed insights to understand consumer behavior and refine campaign strategy.

## Ad Types by Objective

- Image Ads for awareness
- Video, Stories, Reels for engagement
- Carousel for sales/e-commerce
- Instant Form Ads for lead generation
