Data NeXus

Fast-Track Your Benefits Data Integration

Dart Health's Data Nexus is a purpose-built, cutting-edge platform designed to speed up data connections across the health benefits industry.

With secure, HIPAA-compliant AI and a full stack of integration services, you can connect providers, partners, and employers in days. Not months.

88% ↓
Reduced time to open enrollment.

1.5 weeks
Average new client benefits onboarding time.

33% ↓
Reduced IT and maintenance costs.

Purpose-Built for Health Benefits Providers & Admins.

Data Nexus is specifically made for the benefits industry, so it connects data sources for eligibility, claims, and benefits rapidly and seamlessly to remove these historically slow-moving barriers to innovation.

The result is faster data onboarding, faster time to open enrollment, lower operational costs, and improved service delivery like never before.

Integrate Once. Connect to Everything.

When you integrate just once with Data Nexus you gain the ability to plug in new inbound sources without additional downstream development.

As your network of carriers, providers, employers, and vendors scales, Data Nexus scales with you and future-proofs your data engineering challenges, while keeping integration costs predictable.

Let Our White-Glove Data Onboarding Handle the Mess.

Leverage our white-glove services to manage the complexities of benefits eligibility file onboarding, so you can get back to delighting customers.

Our expert integration team will receive and convert any benefit format to our clean, fully-documented API or any legacy output format that reduces friction for you, so IT and operations teams can stop doing the work to wrangle files and manual errors.

Let Data Nexus power your integrations and **complete enrollments 10× faster**, so you can get back to innovation and customer satisfaction.

"I sleep a lot better at night knowing Dart is with us on the journey."

Dane Guarino, CEO of EmsanaCare
