

Get a £5,000 grant towards the installation of a new biomass boiler with the Boiler Upgrade Scheme (BUS).

The Boiler Upgrade Scheme is a grant for people in England and Wales to put towards a low carbon heating system.

The scheme is specifically for home owners and owners of small business properties, and is part of the UK Government's efforts to replace fossil fuel heating systems (such as oil or LPG).

As an MCS Certified installer, Reheat provides BUS installation services for biomass boilers, with a £5,000 grant available to each customer who meet the BUS eligibility criteria.

Talk to our team about the BUS. We can help:

- ✓ Check your eligibility
- ✓ Provide technical advice
- ✓ Complete the installation

BUS for biomass: Good to know

Biomass boiler BUS grants are available if your property is off the gas grid and in a rural location. Most new build properties are not eligible for the grant. Our team will undertake a full eligibility check on your behalf.

The BUS can only be accessed when using MCS Certified installers. This ensures that your purchase is protected by the Renewable Energy Consumer Code.
