why n-kind

the world needs better answers.

Sustainability isn't a checklist item. It's the opportunity to rethink how we work – to care for people, places, and the planet better than ever before.

At blueleaf, we believe true progress doesn't come from compromise. It comes from reimagining what's possible. Too often, sustainability is treated as a headwind – something to manage, not something to embrace. We see it differently.

To us, sustainability is about more than efficiency. It's about innovation and working better today so that we can continue serving people tomorrow and long into the future.

Every product, service, and initiative in the n-kind range is designed to prove that exceptional results and positive impact can go hand in hand.

Because better care isn't just necessary. It's possible. And it's already happening.

what n-kind Offers

products. support. community. real progress, made practical.

n-kind isn't just about delivering products – we're delivering a new standard for how care environments can work smarter, safer, and more sustainably.

Everything we offer is built to help care providers lead the way: achieving better results for people, for operations, and for the planet.

Smarter Products

Cleaning and hygiene essentials that don't force a trade-off between performance and sustainability. Every product meets our n6 standard, combining high-impact results with lower environmental impact.

Support and Resources

Practical training, tools, and advice that make sustainable best practice simple to implement – helping care teams work more efficiently, minimise waste, streamline reporting, and meet rising expectations.

A Community of Action

Bringing together care providers who want to lead change, not just follow it. From hands-on projects to practical ESG learning sessions, we build momentum for better care across the sector.

the n6 standard

not every product makes the cut. and that's the point.

The n-kind mark isn't given. It's earned.
Every product must meet all six of our n6 criteria – proving it delivers true sustainability and real performance, without compromise.

Only products that meet all six criteria fully and credibly are elevated into the n-kind range. No shortcuts. No exceptions.

Because better care demands better standards. And we're here to set them.

Look for the n6 checklist with every product in this brochure. It's your guarantee that every solution we offer meets the highest standards – not just for performance, but for true, practical sustainability.

the n6 criteria:

Performance through sustainability

If it doesn't at least match the performance of traditional products, it doesn't make the cut. n-kind delivers power without compromise.

Powered by nature

Every product must use plant-based, biodegradable, and proven-safe ingredients.

Designed for circularity

From packaging to product lifecycle, n-kind reduces impact at every stage by utilising recycled materials and enabling re-use.

Made with care

It's not just what we make, it's how we make it. Responsible sourcing, ethical trading, lower carbon footprint.

Transported efficiently

Lighter loads, smarter supply chains, lower emissions, production as close to end-use as possible, lower footprint. Because sustainability doesn't stop at the factory door.

Better for everyone

If it isn't safer, easier, and more accessible for the people who use it and those they help to care for, it's not n-kind. Simple.

science behind cleaning

the science behind n-kind.

n-kind started as a desire to make cleaning better for people and the planet. But better cleaning doesn't start with mere promises. It starts with better engineering.

“The real revolution isn't cleaning harder. It's cleaning smarter.”

Plant-based surfactants: better chemistry for cleaner spaces

Used in products like kitchen cleaner & sanitiser and kitchen degreaser, plant-derived surfactants break dirt bonds without leaving micro-pollutants.

Probiotics: the future of cleaning

Products like clean15 harness beneficial bacteria to outcompete harmful microbes – keeping surfaces hygienic for longer, naturally.

Reducing chemical risks by design

By using biodegradable, low-toxicity ingredients, products like elimin8 and clean15 avoid harsh hazard labels – safer for staff, residents, and environments.

Tested to prove it, not just claim it

Independent certification to BS EN 1276 (bacterial kill) and BS EN 14476 (enveloped virus kill) standards.

our products

clean15

one product.
every surface.
no compromise.

Cleaning has always been essential. But the way we do it can evolve. clean15 brings a smarter, simpler way to clean – cutting waste, reducing cost, and delivering powerful results, naturally.

a better way to work

- One plant-powered solution for every surface.
- Less waste, fewer chemicals, simpler routines.
- Stronger performance, lighter footprint.

It's not just a cleaner product.
It's a cleaner way of working.

the clean15 difference

- One product for 15 cleaning tasks
- Powered by nature – no petrochemicals, no toxins
- Works deeper and keeps working after application
- Safe for people, safe for the planet
- Eliminates odours, doesn't just mask them

our products

clean15

clean smarter.
work simpler.
waste less.

From washrooms to upholstery, clean15 works everywhere you need it – making cleaning safer, easier, and more sustainable without compromise.

- Plant-based surfactants and probiotics
- Excellent, long-lasting odour control
- Non-toxic, non-hazardous
- Safe to use around residents, visitors and pets

available formats:

-  **5 litre concentrate**
For use with dosing taps or pelican pumps
-  **Ready-to-use trigger spray**
Pre-diluted at 1:10 for general cleaning
-  **Refillable colour-coded trigger spray**
Easy to identify bottles for different areas and dilutions
-  **Atomiser**
For use as an air purifier to instantly remove odours

ideal for:

- ✓ Washrooms
- ✓ General areas
- ✓ Fabrics & carpets
- ✓ Intense soiling
- ✓ Stainless steel & glass

our products

elimin8

fast, targeted disinfection.

smarter protection.

elimin8 delivers powerful 8-in-1 protection – combining rapid disinfection, long-lasting action, and plant-powered innovation in one safer, simpler solution.

a new kind of disinfectant

- Fast, effective disinfection without compromise.
- Air-dries naturally for lasting protection without chemical residue, due to plant based formulation.
- Safer for users, surfaces, and the environment.

Powerful enough for the highest standards.
Smart enough for everyday use.

the elimin8 difference

- 8-in-1 performance across surfaces
- Certified to BS EN 1279 & 14476 with 30 second contact time
- Continues working after drying
- Food prep safe, no rinse required
- Plant-based, biodegradable
- Non-hazardous
- Not tested on animals
- Inhibits limescale growth

our products

elimin8

rapid results.
residual protection.
no compromise.

A disinfectant that’s both strong enough to kill 99.999% of bacteria, yet safe enough to use on food prep areas without rinsing off, elimin8 truly gives you the best of both worlds.

- Kills 99.999% of bacteria, 99.99% of enveloped viruses
- Residual action after drying
- Plant-powered biocide
- Certified to BS EN 1279 & 14476 with 30 second contact time

available formats:

-  **5 litre concentrate**
For use with dosing taps or pelican pumps
-  **Ready-to-use trigger spray**
Pre-diluted at 1:10 for general cleaning
-  **Refillable colour-coded trigger spray**
Hard wearing bottle that can be used time and again
-  **1 litre ultra concentrate**
Ultra concentrate formula with in-built dosing bottle

ideal for:

- ✓ Washrooms
- ✓ Food prep areas
- ✓ Touch points
- ✓ Shower heads
- ✓ Stainless steel & glass

Performance through sustainability
High-level disinfection with lower impact

Powered by nature
Biodegradable, plant-based ingredients

Designed for circularity
Recycled and recyclable packaging

Made with care
UK-produced

Transported efficiently
Concentrated formula, fewer deliveries

Better for everyone
Safe, non-toxic

- ✓ Public washrooms
- ✓ Visitor toilets
- ✓ Kitchens

we want to make life easier for care providers

Every product in the n-kind range combines high performance with high sustainability standards.

Our accessible, easy-to-use support materials make it easy for staff to make the most of each product. The pack of resources includes:

Simple-to-follow wall charts

Staff can see at a glance how to dilute products for different uses.

Safety data sheets

These are crucial for CQC-compliance and ensure that staff understand any hazards associated with the products, as well as safe handling practices and emergency procedures.

Quick-reference task cards

Staff can keep these to hand while they're going about their work.

Sustainability calculator

See at a glance the difference you're making by swapping to n-kind. Share tangible data, such as plastic reduction, with clients, investors and other stakeholders.

feel confident using our products

Every member of staff should feel confident using our products. With this in mind, we offer:

Live, virtual training sessions

Led by your account manager, these give you and your staff the chance to ask questions and get personalised support.

How-to videos

These can be accessed in the blueleaf hub at any time and provide step-by-step guidance for each product.

community of action

real change is bigger than any one product.

Better care, better spaces, and a better future are only possible when we work together. n-kind is building a Community of Action – bringing together care providers who want to do more than keep up. They want to lead.

Together, we're:

- Creating safer, healthier spaces through smarter product choices.
- Building stronger connections between care homes, staff, and local communities.
- Sharing ideas and best practice across the sector to drive true sustainability – environmental, social, and operational.

1000
n-kind homes

what our clients say

don't take our word for it.

n-kind is delivering real change in care homes across the UK right now. Here's what just some of our customers have to say about the difference it's making.

Aria Care was the first global company to roll out n-kind. Immediately we had a fantastic impact on the following areas: fragrance of the homes, cleaning ability of n-kind, how simple it is to use and dilute, and contact time on the two-stage clean. Feedback from residents and families and external guests was amazing. The products are fantastic, and we have received so many compliments on the cleaning power and the fragrance within our homes.

James Clear

Hospitality Director, Aria Care

Leaves surfaces smelling wonderful. Easy to understand dilution guide, eco-friendly, non-toxic. Highly recommended.

Nok Palnik

Medici Healthcare

The response has been overwhelming, not only from housekeepers but also from family members, visitors and our staff. Everyone loves the smell of it; it's absolutely changed the mood of the home.

Paul Wright

Group Hospitality Manager at Aria Care

Not only is n-kind effective in keeping our home environment spotless, but it's also a game-changer in terms of its environmental impact. Knowing that this plant-based product is kinder to the planet and can be used across the wide range of applications needed within a care home gives me great satisfaction, as we all play a part in combating climate change.

Shirley Friday

Domestic Assistant, Courtfield Lodge Care Home

ways to get involved

action projects. small actions. big impact.

Cards of Kindness

Small acts of kindness can make a big difference. Cards of Kindness connects primary schools with local care homes. Pupils make personalised Christmas cards for residents, creating meaningful connections between different generations and reducing loneliness during the festive season.

Pottery Painting

Our plant pot painting workshop is designed to spark residents' creativity and bring colour to your care home. This hands-on experience encourages self-expression and social interaction, while also helping residents to try something new and connect with nature.

We'll bring all the necessary materials, including plant pots, paints, and brushes. We'll offer advice and inspiration to help residents decorate their pots with vibrant designs. Once the pots have dried, residents will be able to pot them up with the soil and plants we've provided, creating their own mini gardens to enjoy for months to come.

Wildflower Wilderness

Wildflower Wilderness helps care homes to create their own wildflower meadows. The untamed beauty of wildflowers isn't just a joy for residents, it also supports butterflies and other pollinators, and it's easy to maintain.

A member of our gardening team will visit your care home to help you choose the right spot for your new wildflower meadow. We'll come equipped with gardening gloves, tools and seeds. Together with residents and staff members, we'll prepare the ground, sow the seeds and water your new meadow. We'll also help to dispose of any weeds or other waste. In just a few months, your bare plot will have grown into a beautiful wildflower meadow for residents and wildlife to enjoy.

see our projects
in action

ways to get involved

active learning. progress is something we build together.

It's not always easy to cut through the digital clutter to find useful sustainability advice. Advice that's both practical and relevant to care settings. So, we want to build a community specifically for care providers. A community where we can all share actionable resources and knowledge – from eco-friendly cleaning hacks and waste reduction tips, to webinars about new regulations.

We'll celebrate successes, create new best practices, and raise the bar, together. Because by working together, we can make a real impact that will be felt across the care sector and beyond.
