

the sustainable collection

empowering you to make choices that are kinder to the planet.

blueleaf 
care

sustainability in a changing landscape

While environmental responsibility and wider ESG themes remain strategically important, the Care Quality Commission's (CQC) approach has shifted.

Under the Single Assessment Framework (SAF), environmental sustainability was previously included within the Well-led category. Following a 2024/25 review, the standalone Environmental Sustainability Quality Statement has been removed for adult social care, reflecting feedback on clarity and consistency of application.

What this means for care organisations

Environmental sustainability remains important, but is now assessed as part of a broader leadership and governance framework.

Providers are expected to demonstrate:

- A shared direction and positive culture
- Inclusive, compassionate leadership
- Openness and freedom to speak up
- A strong focus on equality, diversity and inclusion
- Effective governance, management and sustainability
- Collaboration with partners and communities
- A commitment to learning, improvement and innovation

Key message

Sustainability now sits within leadership and governance rather than as a separate assessment area, with care homes still expected to show progress as part of wider organisational quality, stewardship and accountability.

sustainability made easy

Our Sustainability Collection brings together everyday products that are kinder to the planet.

From FSC-certified paper and plastic bags made with 100% recycled materials to plant-based wipes and cleaning solutions, every item has been chosen for its positive environmental impact.

By picking from this collection, you can feel good knowing your choices are helping to create a healthier, more sustainable world.

cleaning solutions

n-kind
redefining what's possible

Plant based to make the product 100% bio-degradable and kinder to the environment.

Extensively tested to deliver excellent infection control and cleaning performance, and is the only plant-based product with certification to BS EN 1276 and 14476 with 30 second contact time.

Comprehensive range of products covers every area in your care home.

Concentrated products are diluted at site to reduce the environmental impact of transport.

Packaging is made from recycled plastics, which can be recycled.

cleaning
solutions

Cleneco

Our Cleneco dosage bottle collection offers highly concentrated, ecological cleaning agents that are up to **5 times more concentrated** than regular products.

In fact, **1 litre of our Cleneco cleaning solution is the equivalent of 200 ready to use trigger bottles.**

By switching to our Cleneco concentrate dosage bottles, you could reduce plastic usage but also the carbon emissions produced by deliveries. 1 case of Cleneco = 66 cases of trigger bottles, and therefore 66 separate deliveries.

Cleneco No.1 Hard Surface Cleaner & Disinfectant Dosage Bottles – 2 x 1ltr
CT531010

care

refuse sacks & bin liners

The use of refuse sacks is unavoidable. An essential product that helps you to ensure all areas are kept clean and tidy, refuse sacks are something that need to be replaced and changed on a regular basis.

However, this doesn't have to mean they have a negative impact on the environment.

Our Fortys refuse sacks collection is **manufactured using 100% recycled materials and renewable energy**, helping you to reduce the environmental impact of this daily necessity.

new product spotlight | Green Compostable Bin Liners

Clean up with a conscience using these Compostable Sacks in Green. Created to be 100% compostable and biodegradable, complying with EN 13432, these sacks can be used for disposing of organic waste from kitchens or gardens effectively without causing harm to the environment.

Ideal for separating food recycling waste within large companies who want to reduce their impact on the environment, each bag can be used to line waste caddies or bins effectively, minimising clean up and making waste removal a quicker, straight-forward process.

janitorial products

Making small changes to your every day cleaning regime can have a huge environmental impact.

Our mop heads are made from recycled non-woven fabric and manufactured in the UK, helping to reduce transport emissions. An improved socket design now makes them even more sustainable, with a recyclable fitting that biodegrades in landfill – helping to reduce plastic waste.

Reduced plastic impact with innovative socket design

Big White Screw Fit Mop Head

These are a cost effective alternative to cotton yarn mops. As they are so absorbent, floors dry much quicker after cleaning, and they also lint a lot less than cotton mops.

want help reducing your carbon footprint?

Blueleaf Care can support you on meeting the 'well-led' specification of the **new CQC single assessment framework** by following these steps:

- 🌿 Make contact with your account manager to discuss your sustainability goals.
- 🌿 Review the products you are purchasing.
- 🌿 Switch to sustainable product offerings from Blueleaf Care where possible.
- 🌿 Blueleaf Care can help provide evidence of sustainability on products & services being purchased by your home to aid in your assessment.

don't just take our word for it...

"It has been a pleasure to work with Blueleaf with their n-kind plant based product range to develop a system and new ways of working with the products in our homes. We are very proud to be the first company globally to implement the n-kind system into all of our English based homes. The products are fantastic and we have received so many compliments on the cleaning power and the fragrance within our homes."

By using n-kind products, we have been able to follow the 4 S's:

- *Streamline - Reduce the amount of cleaning products.*
- *Safe - Using a safe product (COSHH free when in use) Non pathogenic probiotic bacteria*
- *Sustainable - Plant based product reducing our carbon footprint and becoming kinder to the environment. PCR packaging and fully recyclable.*
- *Science - Harnessing the power of good bacteria to ensure regenerative enzyme production."*
