WellStat

WELLSTAT ENERGY MANAGEMENT

WellStat's Energy Management Software enables customers to make informed decisions about their energy use.

WellStat is used by management teams to responsibly assure healthy buildings, while lowering operating costs and their carbon footprint. Our clients have used WellStat for re-occupancy planning, leasing and marketing initiatives, sustainability applications and most importantly, to create safer and healthier indoor environments.

WellStat Energy Management features:

Create Utility Budgets

Actionable and Intuitive Reporting

Centralized Energy Operations Management

Customizable dashboard

Sustainability Metrics

Budget Reporting

Enterprise Management

Annual Energy Savings

Real Time Alerting

All energy usage is represented in utility dollars to highlight where building expenses are coming from and alert users to anomalies. WellStat has many different ways to process, visualize, and export your data to empower the intelligently run buildings of the future.
