

Corporate AngularJS Training Course

Instructor-led — Virtual, On-site, Off-site

-  Efficient Routing
-  Two-Way Data Binding
-  API Integration
-  Modular Design
-  Web App Optimization
-  Tool Evaluation

Training for Global Web Dev Teams

16-24 hrs

Instructor-led
duration

10 Languages

English, Español,
Mandarin, Deutsch,
Arabic, Português,
Hindi, Français,
Japanese, Italiano

**100+
Countries**

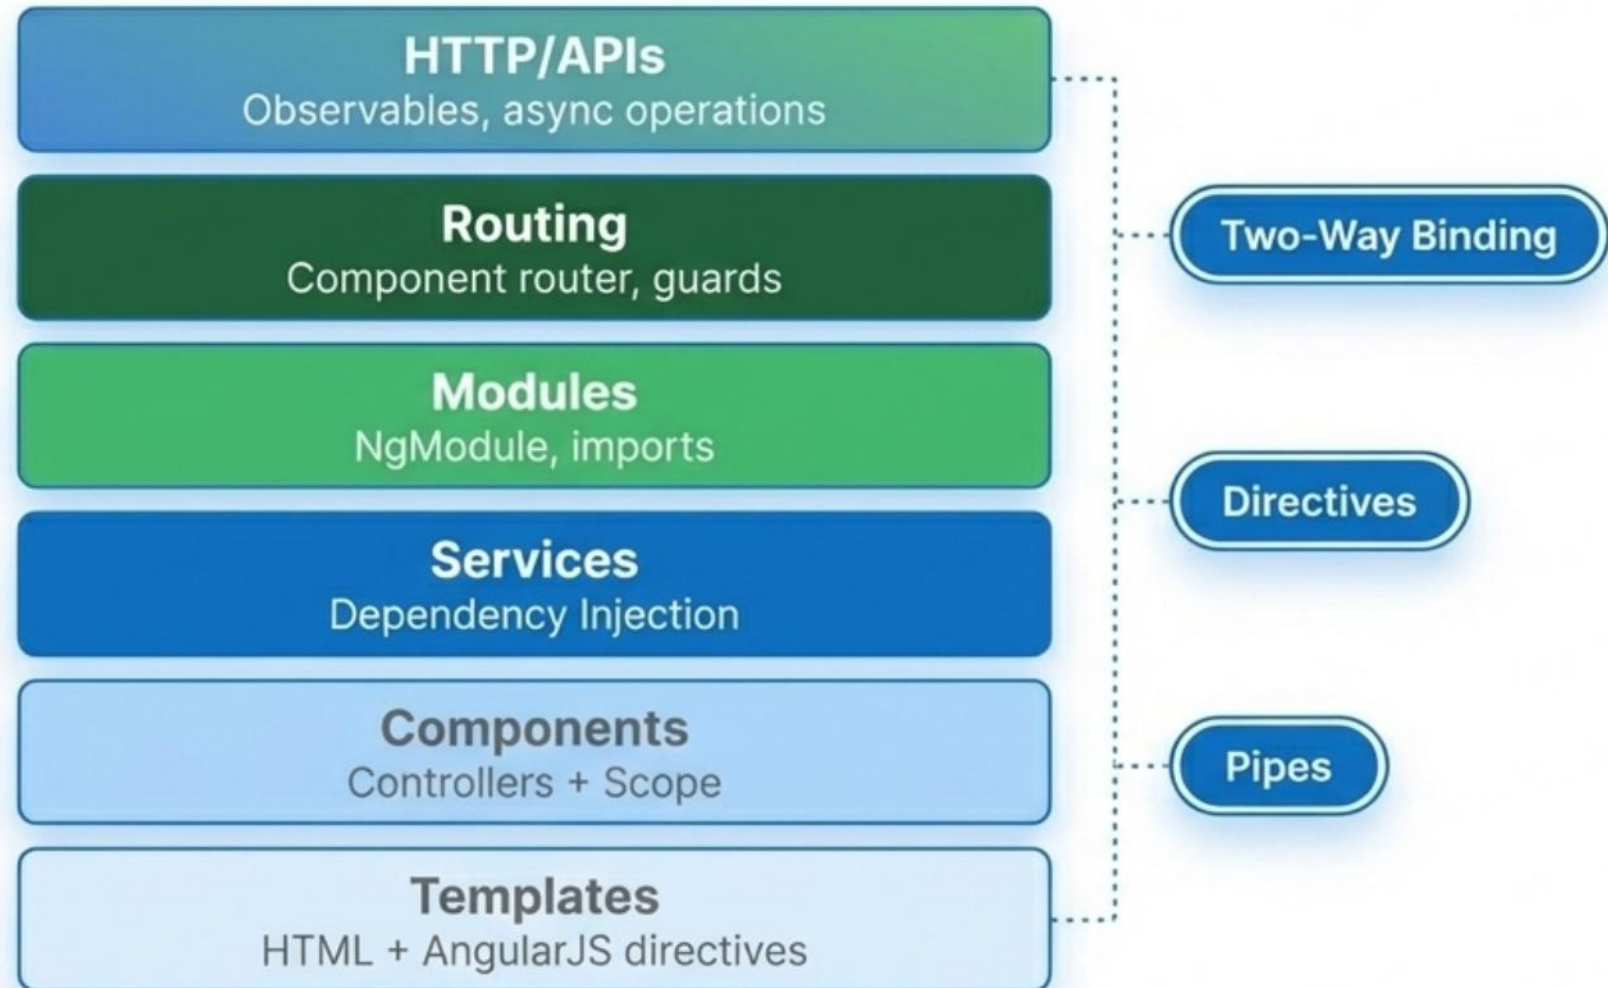

Delivery capability
globally

**10,000+

AngularJS Architecture Overview

18 Comprehensive Training Modules

Introduction to AngularJS

Angular World

Introduction to TypeScript

ES2015 Primer

Environment Setup

Modules

Components

Templates

Custom Directives

Pipes

Services and Dependency Injection

Lifecycle Hooks and Change Detection

Routing and Advanced Routing

Template-Driven and Model-Driven Forms

Async Operations and Advanced HTTP

Component Styling

Animations

Testing, Security, Performance, Deployment

Key Skills Employees Gain

Efficient Routing Solutions

API Integration

Modular Application Design

Web App Optimization

Two-Way Data Binding

Tool and Library Evaluation

Key Learning Outcomes

✓ Create efficient routing for single-page applications

✓ Analyze web apps for optimization potential

✓ Integrate external APIs into AngularJS apps

✓ Understand AngularJS architecture and principles

✓ Apply two-way data binding for interactive UIs

✓ Design modular apps with components, directives, services

✓ Evaluate AngularJS tools and libraries for dev needs

Hands-On Technical Mastery

Mastering TypeScript, custom directives, advanced routing, reactive forms, multi-step animations, Jasmine/Karma testing, and production SPA deployment.

Resulting Business Value

Rapidly prototype and deploy SPAs to accelerate time-to-market

In-house expertise to stay ahead of web dev competitors

Streamline the full software development lifecycle

Build dynamic, user-friendly single-page apps

Signal organizational commitment to continuous professional learning

Who Is This Training For?

Prerequisite: Basic HTML, JavaScript and CSS

Web Developers

Front-End Developers

Full-Stack Developers

JavaScript Developers

UI/UX Designers

Software Engineers

Mobile App Developers

Technical Leads

Software Architects

DevOps Engineers

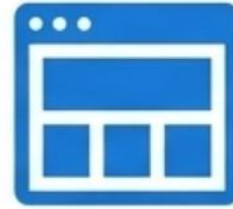

QA Managers

Test Engineers

Prerequisites for This Course

**Basic Knowledge
of HTML and
JavaScript**

**Familiarity with
CSS and Web
Concepts**

Flexible Corporate Training Delivery

Virtual

Train from anywhere, highly scalable for large groups, consistent quality across global teams.

On-site

Face-to-face in-house. High engagement, tailored to actual workplace environment, hands-on demos, instant doubt clarification.

Off-site

Face-to-face dedicated venue. Distraction-free environment, dedicated schedule, accelerates team bonding and morale.

Why Choose Edstellar

Experienced Trainers

Practical, industry-veteran instructors.

Industry Curriculum

Content mapped directly to modern production demands.

Comprehensive Support

End-to-end administration and post-training support.

Quality Track Record

High engagement and verified outcomes globally.

Fully Customizable

Modules adapted to your specific stack and goals.

Multilingual

Delivery capability in 10 different global languages.

Tailored Training Packages

Most Popular

Starter

- 120 Licenses
- 64 hours group training
- Ideal for SMBs

Growth

- 320 Licenses
- 160 hours group training
- Ideal for scaling teams.

Enterprise

- 800 Licenses
- 400 hours group training
- Designed for large corporations.

Custom

- Unlimited Licenses
- Unlimited duration
- Deep enterprise integration.

What Our Clients Say

“Revolutionized how I approach daily responsibilities. Handled complex technical scenarios with systematic efficiency.”

Vaughn Chandler, Senior Software Engineer

“Critical insights into advanced methodologies. Enabled us to secure a transformative contract with a Fortune 100 organization.”

Yuri Volkov, Senior Software Engineer

“Automated eighteen critical business processes, reducing manual effort by 70%.”

Rukmini Natarajan, Senior Software Engineer

“Instrumental in strengthening engineering teams and building future-ready capabilities across multiple projects.”

Aditi Rao, L&D Head
