

Corporate Apache JMeter Training Course

Instructor-led — Virtual, On-site, Off-site

JMeter GUI

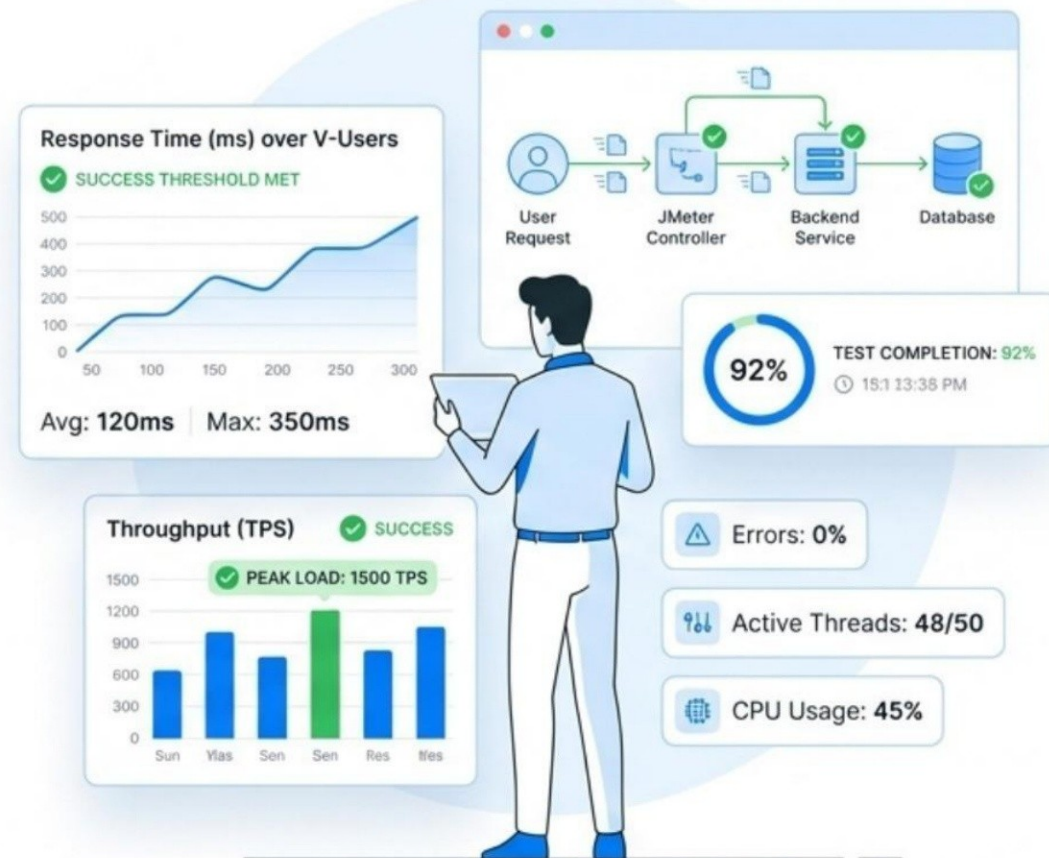

Assertion Validation

Thread Groups

Performance Analysis

UI Automation

Timer Utilization

Training for Global Performance Testing Teams

12-16 hrs

Comprehensive
Instructor-Led
Duration

**10
Languages**

Including English,
Mandarin, Spanish
& German

**100+
Countries**

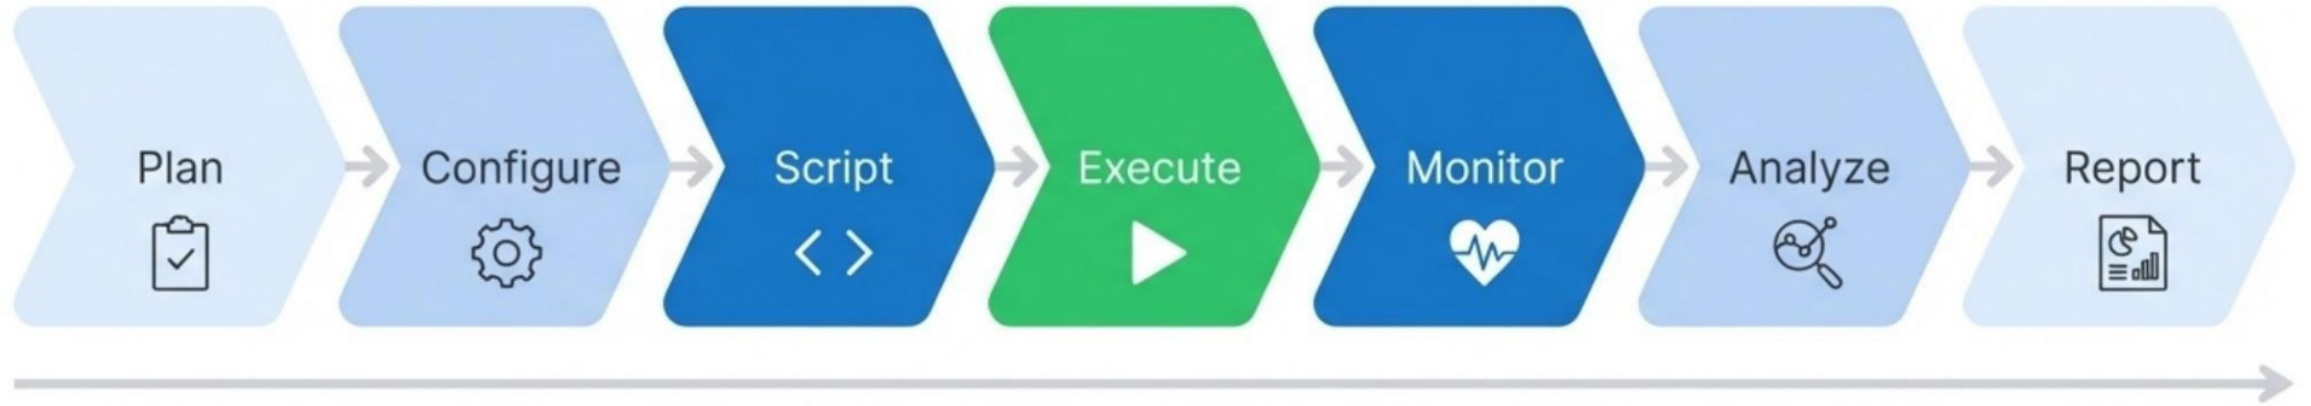

Seamless Global
Delivery
Capability

**10,000+
Trainers**

Verified Experts
on the Edstellar
Platform

The JMeter Performance Testing Workflow

13 Comprehensive Training Modules

Basics of Performance Testing

JMeter Installation and Configuration

Thread Groups, Listeners, Controllers

JMeter Timers and Configuration

JMeter Preprocessor Elements

Test Elements and JMeter Assertions

Performance Testing with UI Automation

Various Types of Performance Testing

Stress Testing and Peak Load

Step Load Testing

JMeter Security Testing

JMeter REST Testing

JMeter Web Services

Key Skills Employees Gain

Key Learning Outcomes

Understand JMeter GUI and components

Use JMeter assertions for validation

Perform UI automation performance testing

Understand thread groups, listeners, controllers

Analyze results and identify bottlenecks

Utilize timers for realistic load scenarios

Conduct stress testing and peak load

Design and execute performance test scripts

Implement preprocessors for data manipulation

Know performance testing types and when to use them

What Your Team Will Master

Mastering load testing, stress testing, REST API testing, security testing, and CI/CD integration with JMeter.

Enhance performance testing capabilities

Conduct comprehensive reliable load tests

Increase application scalability and stability

Reduce failures and downtime in production

Identify and resolve performance bottlenecks

Who Is This Training For?

Performance Testers

QA Analysts

DevOps Engineers

Software Developers

Test Automation Engineers

IT Managers

Web Developers

Application Support Analysts

System Engineers

Performance Engineers

Technical Leads

Project Managers

Prerequisites for This Course:

Fundamentals of Software Testing

Basic Java and Program Execution

9 Types of Performance Testing Covered

Load

Stress

Endurance

Spike

Volume

Soak

Scalability

Failover

Security

Flexible Corporate Training Delivery

Virtual

Anywhere, highly scalable, consistent global quality without travel constraints.

On-site

Face-to-face JMeter demos, tailored environments, and direct team collaboration.

Off-site

Distraction-free focus, dedicated scheduling, and improved team bonding.

Why Choose Edstellar

Experienced Trainers

Practical, industry expertise

Quality

Global track record for engagement

Industry Curriculum

Expert-designed for current demands

Customizable

Tailored to your organizational goals

Support

Comprehensive pre and post-training support

Multilingual

Delivered in 10 global languages

Training Packages

Tailor-Made Trainee Licenses with Our Exclusive Training Packages

Globally Trusted by Top Clientele

Course Completion Certificate

CERTIFICATE
OF COMPLETION

AWARDED TO:
[PARTICIPANT NAME]
